Summary Section

CrossingBridge Low Duration High Income Fund

Investment Objective

The CrossingBridge Low Duration High Income Fund (the “Low Duration High Income Fund” or “Fund”) seeks high current income and capital appreciation consistent with the preservation of capital.

Fees and Expenses of the Fund

This table describes the fees and expenses that you may pay if you buy, hold and sell shares of the Fund. **You may pay other fees, such as brokerage commissions and other fees to financial intermediaries, which are not reflected in the table and Example below.**

Annual Fund Operating Expenses <i>(expenses that you pay each year as a percentage of the value of your investment)</i>	Institutional Class	Retail Class
Management Fees	0.65%	0.65%
Distribution and Service (12b-1) Fees	None	0.25%
Shareholder Servicing Plan Fees ⁽¹⁾	0.10%	0.10%
Other Expenses ⁽²⁾	0.14%	0.14%
Total Annual Fund Operating Expenses⁽²⁾	0.89%	1.14%

⁽¹⁾ The Trust’s Board of Trustees (the “Board of Trustees”) has authorized a shareholder servicing plan fee up to 0.15% of the Fund’s average daily net assets. Currently, the shareholder servicing plan fee being charged is 0.10% of the Fund’s average daily net assets; however, the fee may be increased to 0.15% of the Fund’s average daily net assets at any time. Shareholder servicing plan fees reflect the current amounts charged to the Fund.

⁽²⁾ Other Expenses includes acquired fund fees and expenses (“AFFE”), which are indirect fees and expenses that the Fund incurs from investing in the shares of other mutual funds, including money market funds. Please note that the amount of Total Annual Fund Operating Expenses shown in the above table will differ from the Ratio of Expenses to Average Net Assets figures found within the “Financial Highlights” section of the Prospectus, which reflects the direct operating expenses of the Fund and does not include indirect expenses, such as AFFE. Total Annual Fund Operating Expenses also will not correlate to the Ratio of Expenses to Average Net Assets because the shareholder servicing plan fees above reflect the current amounts charged to the Fund.

Example

This Example is intended to help you compare the cost of investing in the Fund with the cost of investing in other mutual funds. The Example assumes that you invest \$10,000 in the Fund for the time periods indicated and then hold or redeem all of your shares at the end of those periods. The Example also assumes that your investment has a 5% return each year and that the Fund’s operating expenses remain the same. Although your actual costs may be higher or lower, based on these assumptions, your costs would be:

Share Class	One Year	Three Years	Five Years	Ten Years
Institutional Class	\$91	\$284	\$493	\$1,096
Retail Class	\$116	\$362	\$628	\$1,386

Portfolio Turnover

The Fund pays transaction costs, such as commissions or spreads, when it buys and sells securities (or “turns over” its portfolio). A higher portfolio turnover rate may indicate higher transaction costs and may result in higher taxes when Fund shares are held in a taxable account. These costs, which are not reflected in the Total Annual Fund Operating Expenses or in the Example, affect the Fund’s performance.

During the most recent fiscal year, the Fund's portfolio turnover rate was 124.47% of the average value of its portfolio.

Principal Investment Strategies

Under normal market conditions, the Fund seeks to achieve its investment objective by investing at least 80% of its net assets (plus any borrowings for investment purposes) in a portfolio of income producing fixed income securities. CrossingBridge Advisors, LLC (the "Adviser"), the Fund's investment adviser, will construct a portfolio for the Fund that the Adviser believes has the potential to generate a high level of current income, while maintaining a fixed income portfolio duration of 2.0 or less.

The income producing fixed income securities in which the Fund invests include: bills, notes, bonds, debentures, convertible bonds, bank loans, loan participations, mortgage- and asset-backed securities, Rule 144A fixed income securities, zero coupon securities, syndicated loan assignments, sovereign debt and other evidence of indebtedness issued by U.S. or foreign corporations, governments, government agencies or government instrumentalities, including floating-rate securities (*i.e.*, fixed income securities that provide income that can increase or decrease with interest rates), commercial paper, and preferred stocks. The Fund may also invest in fixed income-like equity securities such as special purpose acquisition companies ("SPACs") that provide interest income and/or the potential for capital appreciation while having an effective maturity. The Fund invests in individual fixed income securities without restriction as to issuer credit quality, capitalization or security maturity. The Fund may invest up to 100% of its assets in lower-quality fixed income securities — commonly known as "high yield" or "junk" bonds. Junk bonds are generally rated lower than Baa3 by Moody's Investors Service ("Moody's") or lower than BBB- by Standard and Poor's Rating Group ("S&P"). The Fund may invest in junk bonds that are in default, subject to bankruptcy or reorganization. High yield bonds have a higher expected rate of default than higher quality bonds. The Fund may also invest up to 35% of its total assets in foreign currency denominated securities. To the extent the Fund invests in other investment companies, including exchange-traded funds ("ETFs"), the Fund will consider the underlying holdings of such funds for purposes of meeting its policy of investing at least 80% of its net assets in a portfolio of income producing fixed income securities.

The Adviser seeks to manage interest rate, default and currency risks. The Adviser manages interest rate risk by maintaining, under normal market conditions, an average fixed income portfolio duration of 2.0 or less by primarily investing in short-term, medium-term and floating rate securities. Duration is a measure of sensitivity of a security's price to changes in interest rates. For example, a security with a duration of 2.0 would be expected to decrease in price 2% for every 1% rise in interest rates (the inverse is true as well). The stated maturity for a fixed income security may be longer than the expected maturity that will be used for the Fund's portfolio duration calculation. The stated maturity may differ from the expected maturity as a result of market conditions or the terms of the security (such as provisions that would give a holder or issuer a right to require redemption in certain circumstances).

The Adviser manages default risk by selecting securities of issuers that it believes will pay interest and principal regardless of their credit rating, based upon the Adviser's credit analysis of each issuer. The Adviser may also select securities that are in default, subject to bankruptcy or reorganization where the Adviser believes the risks to be consistent with capital preservation, based on the Adviser's analysis of an issuer's liquidation value or post-bankruptcy or post-reorganization value.

The Adviser manages foreign currency risk by investing primarily in securities denominated in U.S. dollars, such as Yankee bonds or, where appropriate, by hedging foreign currency exposure. When deemed appropriate, the Adviser may hedge the foreign currency exposure typically, and primarily, with

forward currency contracts. A forward currency contract is an obligation to purchase or sell a specific currency at a future date, which may be any fixed number of days from the date of the contract agreed upon by the parties.

The Fund's investments in derivative instruments, specifically options, swap agreements and forward currency contracts (collectively, "Derivatives") are generally used to reduce exposure to, or "hedge" against, market volatilities and other risks. The Fund may also use a Derivative rather than investing directly in an underlying asset class as a low-cost, effective means to gain exposure to such asset class. The Fund will count the notional value of investments in derivative instruments towards compliance with the 80% investment policy discussed above, except that investments in derivative instruments for the purpose of hedging foreign currency risk will not be counted towards the 80% investment policy.

The Fund will sell an investment during portfolio rebalancing periods when the Fund's holdings in that investment are larger than the allocation suggested by the Adviser's investment models or when a more attractive investment becomes available. The Adviser may engage in active trading of the Fund's portfolio investments, resulting in a high portfolio turnover rate, to achieve the Fund's investment objective.

There is no assurance the Fund will achieve its investment objective.

Principal Risks

Before investing in the Fund, you should carefully consider your own investment goals, the amount of time you are willing to leave your money invested, and the amount of risk you are willing to take. Remember, in addition to possibly not achieving your investment goals, **you could lose money by investing in the Fund**. The Fund's principal risks are presented in alphabetical order to facilitate finding particular risks and comparing them with other funds. Each risk summarized below is considered a "principal risk" of investing in the Fund, regardless of the order in which it appears. The principal risks of investing in the Fund are:

Asset-Backed and Mortgage-Backed Securities Risk. Asset-backed and mortgage-backed securities are subject to risk of prepayment. These types of securities may also decline in value because of mortgage foreclosures or defaults on the underlying obligations. Asset-backed and mortgage-backed securities are also subject to extension risk, the risk that rising interest rates could cause prepayments to decrease, extending the life of asset-backed and mortgage-backed securities with lower payment rates.

Bank Loans Risk. The Fund's investments in secured and unsecured assignments and/or participations in bank loans may create substantial risk. In making investments in such loans, which are made by banks or other financial intermediaries to borrowers, the Fund will depend primarily upon the creditworthiness of the borrower for payment of principal and interest. As a result, sale proceeds related to the sale of loans may not be available to make additional investments or to meet the Fund's redemption obligations until potentially a substantial period after the sale of the loans. The Fund, therefore, may be forced to sell other assets at a loss to pay redemption proceeds. A significant portion of bank loans may be "covenant lite" loans that may contain fewer or less restrictive constraints on the borrower and fewer or no financial maintenance covenants and restrictions. A covenant lite loan typically contains fewer clauses which allow an investor to proactively enforce financial covenants. Covenant lite loans also generally provide fewer investor protections if certain criteria are breached. The Fund may experience losses or delays in enforcing its rights on its holdings of covenant lite loans. The secondary market for bank loans is a private, unregulated inter-dealer or inter-bank resale market. Purchases and sales of loans are generally subject to contractual restrictions that must be satisfied before a loan can be bought or sold. These restrictions may impede the Fund's ability to buy or sell loans and may negatively impact the transaction

price. It may take longer than seven days for transactions in loans to settle. The Fund may hold cash, sell investments or temporarily borrow from banks to meet short-term liquidity needs due to the extended loan settlement process, such as to satisfy redemption requests from Fund shareholders. U.S. federal securities laws afford certain protections against fraud and misrepresentation in connection with the offering or sale of a security, as well as against manipulation of trading markets for securities. The typical practice of a lender in relying exclusively or primarily on reports from the borrower may involve the risk of fraud, misrepresentation, or market manipulation by the borrower. It is unclear whether U.S. federal securities law protections are available to an investment in a loan. In certain circumstances, loans may not be deemed to be securities, and in the event of fraud or misrepresentation by a borrower, lenders may not have the protection of the anti-fraud provisions of the federal securities laws. However, contractual provisions in the loan documents may offer some protections, and lenders may also avail themselves of common-law fraud protections under applicable state law.

Below Investment Grade Securities Risks (commonly referred to as “junk” bonds). The Fund may invest up to 100% of its assets in fixed income instruments that are or are deemed to be the equivalent in terms of quality to securities rated below investment grade by nationally recognized statistical rating organizations (“NRSROs”) and accordingly involve great risk. Such securities are regarded as predominantly speculative with respect to the issuer’s capacity to pay interest and repay principal in accordance with the terms of the obligations and involve major risk to adverse conditions. These securities offer higher returns than bonds with higher ratings as compensation for holding an obligation of an issuer perceived to be less creditworthy. The market prices of such securities are also subject to abrupt and erratic market movements and above-average price volatility, and the spread between the bid and ask prices of such securities may be greater than those prevailing in other securities markets. Changes in economic conditions or developments regarding issuers of non-investment grade debt securities are more likely to cause price volatility and weaken the capacity of such issuers to make principal and interest payments than is the case for higher grade debt securities. In addition, the market for lower grade debt securities may be thinner and less active than for higher grade debt securities.

Convertible Securities Risk. A convertible security is a fixed income security (a debt instrument or a preferred stock) which may be converted at a stated price within a specified period of time into a certain quantity of the common stock of the same or a different issuer. The market value of a convertible security performs like that of a regular debt security, that is, if market interest rates rise, the value of the convertible security falls.

Corporate Events Risk. Corporate events risk is the risk that a corporate transaction or opportunity will not occur, or a natural disaster or regulatory change will cause an abrupt downgrade in a corporate bond which may lower the Fund’s performance.

Counterparty Risk. Counterparty risk arises upon entering into borrowing arrangements or Derivative transactions and is the risk from the potential inability of counterparties to meet the terms of their contracts.

Credit-Related Instruments Risk. Interest rates may go up resulting in a decrease in the value of the securities held by the Fund. Interest rates have risen from historically low levels, and may rise further. A credit rating assigned to a particular debt security is essentially the opinion of an NRSRO as to the credit quality of an issuer and may prove to be inaccurate. There is also the risk that a bond issuer may “call,” or repay, its high yielding bonds before their maturity dates. Debt securities subject to prepayment can offer less potential for gains during a declining interest rate environment and similar or greater potential for loss in a rising interest rate environment. Limited trading opportunities for certain fixed income securities may make it more difficult to sell or buy a security at a favorable price or time, particularly during periods of market turmoil, and may also make these securities difficult to value.

Credit Risk. Debt portfolios are subject to credit risk. Credit risk refers to the likelihood that an issuer will default in the payment of principal and/or interest on an instrument. Financial strength and solvency of an issuer are the primary factors influencing credit risk. In addition, lack or inadequacy of collateral or credit enhancement for a debt instrument may affect its credit risk. Credit risk may change over the life of an instrument, and debt obligations which are rated by rating agencies are often reviewed and may be subject to downgrade.

Cybersecurity Risk. With the widespread use of technologies such as the Internet to conduct business, the Fund is susceptible to operational, information security, and related risks. Cyber incidents affecting the Fund or its service providers have the ability to cause disruptions and impact business operations, potentially resulting in financial losses, interference with the Fund's ability to calculate its NAV, impediments to trading, the inability of shareholders to transact business, violations of applicable privacy and other laws, regulatory fines, penalties, reputational damage, reimbursement or other compensation costs, or additional compliance costs.

Derivatives Risk. The Fund's use of swap contracts and options on interest rate futures involves risks different from, or possibly greater than the risks associated with investing directly in securities including leverage risk, tracking risk and counterparty default risk. Option positions may expire worthless exposing the Fund to potentially significant losses. To the extent the Fund invests in Derivatives, the risks below may affect its performance:

Interest Rate Risk. Underlying investments may lose value due to interest rate changes.

Liquidity Risk. The Fund may not be able to sell or close out a Derivative instrument.

Options Risk. Options contracts may be more volatile than investments directly in the underlying securities, involve additional costs and may involve a small initial investment relative to the risk assumed.

Swap Agreements Risk. A swap contract may not be assigned without the consent of the counterparty, and may result in losses in the event of a default or bankruptcy of the counterparty.

Distressed Securities Risk. The Fund may invest in securities of companies that are experiencing significant financial or business difficulties, including companies involved in bankruptcy or other reorganization and liquidation proceedings. Although such investments may result in significant returns to the Fund, they involve a substantial degree of risk. Any one or all of the issuers of the securities in which the Fund may invest may be unsuccessful or not show any return for a considerable period of time. The level of analytical sophistication, both financial and legal, necessary for successful investment in companies experiencing significant business and financial difficulties is unusually high. There is no assurance that the Adviser will correctly evaluate the value of the assets collateralizing the Fund's loans or the prospects for a successful reorganization or similar action. In any reorganization or liquidation proceeding relating to a company in which the Fund invests, the Fund may lose its entire investment or may be required to accept cash or securities with a value less than the Fund's original investment. Under such circumstances, the returns generated from the Fund's investments in distressed securities may not adequately compensate for the risks assumed. In addition, there is no minimum credit standard that is a prerequisite to the Fund's investment in any instrument, and a significant portion of the obligations and preferred stock in which the Fund invests may be less than investment grade.

Equity Securities Risk. The Fund may invest in income producing equity securities. Although investments in income producing equity securities are considered safer than equity securities in general, and equities historically have been a leading choice for long-term investors, the values of stocks rise and

fall depending on many factors. The stock or other security of a company may not perform as well as expected, and may decrease in value, because of factors related to the company (such as poorer than expected earnings or certain management decisions) or to the industry in which the company is engaged (such as a reduction in the demand for products or services in a particular industry). Market and economic factors may adversely affect securities markets generally, which could in turn adversely affect the value of the Fund's investments, regardless of the performance or expected performance of companies in which the Fund invests.

Fixed Income Securities Market Risk. Difficult conditions in the broader financial markets have in the past resulted in a temporary but significant contraction in liquidity for fixed income securities. Liquidity relates to the ability of the Fund to sell its investments in a timely manner at a price approximately equal to its value on the Fund's books. To the extent that the market for fixed income securities suffers such a contraction, securities that were considered liquid at the time of investment could become temporarily illiquid, and the Adviser may experience delays or difficulty in selling assets at the prices at which the Fund carries such assets, which may result in a loss to the Fund. There is no way to predict reliably when such market conditions could re-occur or how long such conditions could persist.

In the event of a severe market contraction precipitated by general market turmoil, economic conditions, changes in prevailing interest rates or otherwise, coupled with extraordinary levels of Fund shareholder redemption requests, the Fund may have to consider selling its holdings at a loss including at prices below the current value on the Fund's books, borrowing money to satisfy redemption requests in accordance with the Fund's borrowing policy or postponing payment of redemption requests for up to seven days or longer, as permitted by applicable law, or other extraordinary measures. In addition, if the Fund needed to sell large blocks of investments to meet shareholder redemption requests or to raise cash, those sales could further reduce prices, particularly for lower-rated and unrated securities.

In 2022 and 2023, the Federal Reserve increased interest rates in an effort to combat inflation which has resulted in periods of volatility. Additional interest rate changes may have adverse effects on investment, volatility and liquidity in the market for fixed income securities. In general, the market price of fixed income securities with longer maturities will increase or decrease more in response to changes in interest rates than shorter-term securities.

Fixed Income Securities Risk. The Fund invests a significant portion of its assets in fixed income securities. Fixed income securities are subject to credit risk and market risk, including interest rate risk. Credit risk is the risk of the issuer's inability to meet its principal and interest payment obligations. Market risk is the risk of price volatility due to such factors as interest rate sensitivity, market perception of the creditworthiness of the issuer and general market liquidity. There is no limitation on the maturities of fixed income securities in which the Fund invests. Securities having longer maturities generally involve greater risk of fluctuations in value resulting from changes in interest rates.

Floating Rate Risk. Securities with floating interest rates generally are less sensitive to interest rate changes but may decline in value if their interest rates do not rise as much, or as quickly, as interest rates in general. Conversely, floating rate instruments will not generally increase in value if interest rates decline. Changes in interest rates will also affect the amount of interest income the Fund earns on its floating rate investments.

Foreign Investments Risk. Investments in fixed income securities and instruments that are linked to fixed income securities (collectively, "Credit-Related Instruments") of foreign issuers involve certain risks not generally associated with investments in the securities of U.S. issuers, including changes in currency exchange rates, unstable political, social and economic conditions, a lack of adequate or accurate company information, differences in the way securities markets operate, less secure international banks or

securities depositories than those in the U.S. and foreign controls on investment. In addition, individual international country economies may differ favorably or unfavorably from the U.S. economy in such respects as growth of gross domestic product, rates of inflation, capital reinvestment, resources, self-sufficiency and balance of payments position. Income earned on foreign investments may be subject to foreign withholding taxes.

Forward Currency Contracts Risk. The Fund may enter into forward currency contracts. A forward currency contract is an obligation to purchase or sell a specific currency at a future date, which may be any fixed number of days from the date of the contract agreed upon by the parties, at a price set at the time of the contract. For example, the Fund might purchase a particular currency or enter into a forward currency contract to preserve the U.S. dollar price of securities it intends to or has contracted to purchase. Alternatively, it might sell a particular currency on either a spot or forward basis to hedge against an anticipated decline in the dollar value of securities it intends to or has contracted to sell. Although this strategy could minimize the risk of loss due to a decline in the value of the hedged currency, it could also limit any potential gain from an increase in the value of the currency.

General Market Risk. Certain securities selected for the Fund's portfolio may be worth less than the price originally paid for them, or less than they were worth at an earlier time.

Government Securities Risk. The Fund invests in securities issued or guaranteed by the U.S. Government, its agencies and instrumentalities (including government-sponsored enterprises). Securities issued by agencies and instrumentalities may not be guaranteed or insured by the U.S. Government and may only be supported by the credit of the issuing entity.

High Portfolio Turnover Rate Risk. The Fund pays transaction costs, such as commissions, when it buys and sells securities (or "turns over" its portfolio). A higher portfolio turnover rate may indicate higher transaction costs and may result in higher taxes when Fund shares are held in a taxable account. These costs, which are not reflected in Annual Fund Operating Expenses or in the Example, affect the Fund's performance.

Interest Rate Risk. The prices of securities in general and fixed income securities in particular tend to be sensitive to interest rate fluctuations. Increases in interest rates can result in significant declines in the prices of fixed income securities. Securities with floating interest rates generally are less sensitive to interest rate changes but may decline in value if their interest rates do not rise as much, or as quickly, as interest rates in general. The negative impact on fixed income securities generally from rate increases, regardless of the cause, could be swift and significant, which could result in losses by the Fund, even if anticipated by the Adviser.

Leverage Risk. Derivatives may create economic leverage and can result in losses to the Fund that exceed the original amount invested.

Liquidity Risk. Certain investments and markets can become illiquid at times and negatively impact the price of an investment if the Fund were to sell during times of illiquidity.

Management Risk. Investment strategies employed by the Adviser in selecting investments for the Fund may not result in an increase in the value of your investment or in overall performance equal to other investments.

Other Investment Company and Exchange-Traded Fund Risk. When the Fund invests in other investment companies, including closed-end funds and ETFs, it will bear additional expenses based on its pro rata share of the other investment company's operating expenses, including the potential duplication of

management fees. The risk of owning another investment company generally reflects the risks of owning the underlying investments the other investment company holds. The Fund also will incur brokerage costs when it purchases and sells investment company shares, ETFs may trade at a discount or premium to NAV. There can be no assurance that an active trading market for an ETF's shares will exist. Shares of closed-end funds frequently trade at a price per share that is less than the net asset value ("NAV") per share. There can be no assurance that the market discount on shares of any closed-end fund purchased by the Fund will ever decrease or that when the Fund seeks to sell shares of a closed-end fund, it can receive the NAV of those shares. There are greater risks involved in investing in securities with limited market liquidity.

Preferred Stock Risk. Preferred stocks may be more volatile than fixed income securities and are more correlated with the issuer's underlying common stock than fixed income securities. Additionally, the dividend on a preferred stock may be changed or omitted by the issuer, and participation in the growth of an issuer may be limited.

Prepayment Risk. The risk that the issuer of a debt security repays all or a portion of the principal prior to the security's maturity therefore resulting in lower yields to shareholders of the Fund. The Fund may be unable to re-invest the proceeds in an investment with as great a yield.

Recent Market Events Risk. U.S. and international markets have experienced and may continue to experience significant periods of volatility in recent years and months due to a number of economic, political and global macro factors including uncertainty regarding inflation and central banks' interest rate changes, the possibility of a national or global recession, trade tensions, political events, the war between Russia and Ukraine, and armed conflict between Israel and Hamas in the Middle East. As a result of continuing political tensions and armed conflicts, including the war between Ukraine and Russia, the U.S. and the European Union imposed sanctions on certain Russian individuals and companies, including certain financial institutions, and have limited certain exports and imports to and from Russia. The war has contributed to recent market volatility and may continue to do so. Continuing market volatility as a result of recent market conditions or other events may have an adverse effect on the performance of the Fund.

Redemption Risk. The Fund may experience periods of heavy redemptions that could cause the Fund to liquidate its assets at inopportune times or at a loss or depressed value, particularly during periods of declining or illiquid markets.

Rule 144A Securities Risk. The market for Rule 144A securities typically is less active than the market for publicly-traded securities. Rule 144A securities carry the risk that the liquidity of these securities may become impaired, making it more difficult for the Fund to sell these securities.

SPACs Risk. The Fund invests in equity securities of SPACs, which raise assets to seek potential business combination opportunities. Unless and until a business combination is completed, a SPAC generally invests its assets in U.S. government securities, money market securities, and cash. Because SPACs have no operating history or ongoing business other than seeking a business combination, the value of their securities is particularly dependent on the ability of the entity's management to identify and complete a profitable business combination. There is no guarantee that the SPACs in which the Fund invests will complete a business combination or that any business combination that is completed will be profitable. The market perception of a SPAC's ability to complete a business combination could materially impact the market value of the SPAC's securities. Public stockholders of SPACs may not be afforded a meaningful opportunity to vote on a proposed initial business combination because certain stockholders, including stockholders affiliated with the management of the SPAC, may have sufficient voting power, and a financial incentive, to approve such a transaction without support from public stockholders. As a

result, a SPAC may complete a business combination even though a majority of its public stockholders do not support such a combination. Some SPACs may pursue a business combination only within certain industries or regions, which may increase the volatility of their prices.

Tax Risk. The Fund's investment strategies, specifically its investments in Derivatives, may subject the Fund to special tax rules, the effect of which may be to accelerate income to the Fund, defer losses to the Fund, cause adjustments in the holding periods of the Fund's securities, convert long-term capital gains into short-term capital gains or convert short-term capital losses into long-term capital losses.

Tracking Risk. The value of the Derivative instruments the Fund uses may not correlate to (or track) the values of the underlying securities. When used for hedging purposes, lack of correlation between price or rate movements of the Derivative instrument and the underlying investment sought to be hedged may prevent the Fund from achieving the intended hedging effect or expose the Fund to risk of loss.

Trade Versus Settlement Risk. The Fund may invest in securities that have varied settlement terms and dates. The longer the amount of time between trade date and settlement date the greater the risk that settlement will occur on a timely basis.

Yankee Bond Risk. Yankee bonds are subject to the same risks as other debt issues, notably credit risk, market risk, currency and liquidity risk. Other risks include adverse political and economic developments; the extent and quality of government regulations of financial markets and institutions; the imposition of foreign withholding taxes; and the expropriation or nationalization of foreign issuers.

Zero Coupon Securities Risk. While interest payments are not made on such securities, holders of such securities are deemed to have received income annually, notwithstanding that cash may not be received currently. Some of these securities may be subject to substantially greater price fluctuations during periods of changing market interest rates than are comparable securities that pay interest currently. Longer term zero coupon bonds are more exposed to interest rate risk than shorter term zero coupon bonds.

Performance

The bar chart demonstrates some of the risks of investing in the Fund by showing changes in the performance of the Institutional Class shares of the Fund from year-to-year. The Average Annual Total Returns table also demonstrates these risks by showing how the Fund's average annual total returns for the one year, five year and since inception periods compare with those of a broad measure of market performance, as well as three additional indices provided to show perspective on the market for fixed income securities. The Fund's past performance, before and after taxes, is not necessarily an indication of how the Fund will perform in the future. Updated performance information is available on the Fund's website at www.crossingbridgefunds.com or by calling the Fund toll-free at 888-898-2780.

Calendar Year Returns as of December 31*

* The returns shown in the bar chart are for Institutional Class shares of the Fund. Retail Class shares would have substantially similar annual returns because the shares are invested in the same portfolio of securities and the annual returns would differ only to the extent that the classes do not have the same expenses. Performance for Retail Class shares would be lower as expenses for Retail Class shares are higher.

During the period shown in the bar chart, the best performance for a quarter for the Fund's Institutional Class shares was 4.34% (for the quarter ended June 30, 2020) and the worst performance for a quarter for the Fund's Institutional Class shares was -5.07% (for the quarter ended March 31, 2020).

Average Annual Total Returns

(for the periods ended December 31, 2024)

	One Year	Five Year	Since Inception (February 1, 2018)
Institutional Class Shares			
Return Before Taxes	7.18%	5.33%	4.59%
Return After Taxes on Distributions	4.16%	2.91%	2.55%
Return After Taxes on Distributions and Sale of Fund Shares	4.22%	3.05%	2.64%
Bloomberg U.S. Aggregate Bond Index (reflects no deduction for fees, expenses, or taxes)	1.25%	-0.33%	1.15%
ICE BofA 0-3 Year U.S. High Yield Excluding Financials Index (reflects no deduction for fees, expenses, or taxes)	9.38%	5.27%	5.08%
ICE BofA 0-3 Year U.S. Treasury Index (reflects no deduction for fees, expenses, or taxes)	4.47%	1.74%	2.00%
ICE BofA 1-3 Year U.S. Corporate Bond Index (reflects no deduction for fees, expenses, or taxes)	5.40%	2.15%	2.60%

After-tax returns are calculated using the historical highest individual federal marginal income tax rates and do not reflect the impact of state and local taxes. Actual after-tax returns depend on an investor's tax situation and may differ from those shown, and after-tax returns shown are not relevant to investors who hold their Fund shares through tax-deferred or other tax-advantaged arrangements such as 401(k) plans or individual retirement accounts ("IRA"). The after tax returns are shown for Institutional Class shares only and after tax returns for Retail Class shares will vary.

In certain cases, the figure representing “Return After Taxes on Distributions and Sale of Fund Shares” may be higher than the other return figures for the same period. A higher after-tax return results when a capital loss occurs upon redemption and provides an assumed tax benefit to the investor.

Management

Investment Adviser. CrossingBridge Advisors, LLC, located at 427 Bedford Road, Suite 220, Pleasantville, New York, 10570, is the Fund’s investment adviser.

Portfolio Managers. David K. Sherman, Chief Investment Officer (“CIO”) of the Adviser, has served as a Portfolio Manager of the Fund since its inception in 2018. T. Kirk Whitney, CFA[®], Portfolio Manager of the Adviser, has served as a Portfolio Manager of the Fund since 2025. Previously, Mr. Whitney had served as Assistant Portfolio Manager of the Fund since 2021.

For important information about the purchase and sale of Fund shares, tax information and financial intermediary compensation, please turn to “Purchase and Sale of Fund Shares, Taxes and Financial Intermediary Compensation” on page 51 of the Prospectus.

CrossingBridge Ultra-Short Duration Fund

Investment Objective

The CrossingBridge Ultra-Short Duration Fund (“Ultra-Short Duration Fund” or the “Fund”) seeks to offer a higher yield than cash instruments while maintaining a low duration.

Fees and Expenses of the Fund

This table describes the fees and expenses that you may pay if you buy, hold and sell shares of the Fund. You may pay other fees, such as brokerage commissions and other fees to financial intermediaries, which are not reflected in the table and Example below.

Annual Fund Operating Expenses <i>(expenses that you pay each year as a percentage of the value of your investment)</i>	Institutional Class
Management Fees	0.65%
Distribution and Service (12b-1) Fees	None
Shareholder Servicing Plan Fees ⁽¹⁾	0.10%
Other Expenses ⁽²⁾	0.25%
Total Annual Fund Operating Expenses ⁽²⁾	1.00%
Less: Fee Waiver and/or Expense Reimbursement	-0.09%
Total Annual Fund Operating Expenses After Fee Waiver and/or Expense Reimbursement ⁽²⁾⁽³⁾	0.91%

⁽¹⁾ The Trust’s Board of Trustees (the “Board of Trustees”) has authorized a shareholder servicing plan fee up to 0.15% of the Fund’s average daily net assets. Currently, the shareholder servicing plan fee being charged is 0.10% of the Fund’s average daily net assets; however, the fee may be increased to 0.15% of the Fund’s average daily net assets at any time.

⁽²⁾ Other Expenses includes acquired fund fees and expenses (“AFFE”), which are indirect fees and expenses that the Fund incurs from investing in the shares of other mutual funds, including money market funds. Please note that the amount of Total Annual Fund Operating Expenses After Fee Waiver and/or Expense Reimbursement shown in the above table will differ from the Ratio of Expenses to Average Net Assets figures found within the “Financial Highlights” section of the Prospectus, which reflects the direct operating expenses of the Fund and does not include indirect expenses, such as AFFE.

⁽³⁾ Pursuant to an operating expense limitation agreement between CrossingBridge Advisors, LLC (the “Adviser”), the Fund’s investment adviser, and the Trust, on behalf of the Fund, the Adviser has agreed to waive its management fees and/or reimburse Fund expenses to ensure that Total Annual Fund Operating Expenses (exclusive of front-end or contingent deferred loads, Rule 12b-1 plan fees, shareholder servicing plan fees, leverage (*i.e.*, any expenses incurred in connection with borrowings made by the Fund) interest (including interest incurred in connection with bank and custody overdrafts), brokerage commissions and other transactional expenses, expenses incurred in connection with any merger or reorganization, dividends or interest on short positions, acquired fund fees and expenses or extraordinary expenses such as litigation (collectively “Excluded Expenses”)) do not exceed 0.80% of the Fund’s average annual net assets, through at least January 31, 2026. To the extent the Fund incurs Excluded Expenses, Total Annual Fund Operating Expenses After Fee Waiver and/or Expense Reimbursement may be greater than 0.80%. The operating expense limitation agreement can be terminated only by, or with the consent of, the Board of Trustees. The Adviser may request recoupment of previously waived fees and paid expenses from the Fund up to three years from the date such fees and expenses were waived or paid, subject to the operating expense limitation agreement, if such reimbursement will not cause the Fund’s expense ratio, after recoupment has been taken into account, to exceed the lesser of: (1) the expense limitation in place at the time of the waiver and/or expense payment; or (2) the expense limitation in place at the time of the recoupment.

Example

This Example is intended to help you compare the cost of investing in the Fund with the cost of investing in other mutual funds. The Example assumes that you invest \$10,000 in the Fund for the time periods indicated and then hold or redeem all of your shares at the end of those periods. The Example also assumes that your investment has a 5% return each year and that the Fund’s operating expenses remain the same. The operating expense limitation agreement discussed in the table above is reflected only

through January 31, 2026. Although your actual costs may be higher or lower, based on these assumptions, your costs would be:

<u>One Year</u>	<u>Three Years</u>	<u>Five Years</u>	<u>Ten Years</u>
\$93	\$309	\$544	\$1,216

Portfolio Turnover

The Fund pays transaction costs, such as commissions or spreads, when it buys and sells securities (or “turns over” its portfolio). A higher portfolio turnover rate may indicate higher transaction costs and may result in higher taxes when Fund shares are held in a taxable account. These costs, which are not reflected in the Total Annual Fund Operating Expenses or in the Example, affect the Fund’s performance. During the most recent fiscal year, the Fund’s portfolio turnover rate was 154.21% of the average value of its portfolio.

Principal Investment Strategies

The Fund seeks to offer a higher yield than cash instruments while maintaining a low duration by investing primarily in fixed income securities consistent with capital preservation. The Fund defines fixed income securities to include: bills, notes, bonds, debentures, convertible bonds, loan participations, syndicated loan assignments, mortgage- and asset-backed securities, Rule 144A fixed income securities, zero coupon securities, sovereign debt and other evidence of indebtedness issued by U.S. or foreign corporations, governments, government agencies or government instrumentalities, including floating-rate securities, preferred stock and fixed income-like equities. Convertible bonds, preferred stocks, and fixed income-like equities (e.g., special purpose acquisition companies (“SPACs”)) provide interest income and/or the potential for capital appreciation while having an effective maturity. Floating-rate securities provide interest income that can increase or decrease with interest rates. The Fund invests in individual fixed income securities without restriction as to issuer credit quality, capitalization or security maturity. Though the Fund can invest in securities domiciled in foreign countries and denominated in foreign currencies, the Fund invests primarily in securities denominated in U.S. dollars issued by issuers domiciled in developed markets. The Fund may invest up to 100% of its assets in lower-quality fixed income securities — commonly known as “high yield” or “junk” bonds. Junk bonds are generally rated lower than Baa3 by Moody’s Investors Service, Inc. (“Moody’s”) or lower than BBB- by S&P Global Ratings Services (“S&P”) (“S&P”). The Adviser believes these investments are consistent with the preservation of capital. The Fund may invest in companies that are in default, subject to bankruptcy or reorganization.

The Adviser seeks to manage interest rate, default and currency risks. The Adviser manages interest rate risk by maintaining, under normal market conditions, an average portfolio duration of 1.0 or less by investing in short-term, medium-term and floating rate securities. The stated maturity for a fixed income security may be longer than its expected maturity used for the portfolio duration calculation. The stated maturity may differ from the expected maturity as a result of market conditions or corporate actions (such as a change of control ‘put’ provision or corporate redemption feature). Duration is a measure of sensitivity of a security’s price to changes in interest rates. For example, a security with a duration of 1.0 would be expected to decrease in price 1% for every 1% rise in interest rates (the inverse is true as well).

The Adviser manages default risk by selecting securities of issuers that it believes will pay interest and principal regardless of their credit rating, based upon the Adviser’s credit analysis of each issuer. The Adviser may also select securities that are in default, subject to bankruptcy or reorganization where the Adviser believes the risks to be consistent with capital preservation, based on the Adviser’s analysis of an issuer’s liquidation value or post-bankruptcy or post-reorganization value.

The Adviser manages foreign currency risk by investing primarily in securities denominated in U.S. dollars, such as Yankee bonds. If the Fund were to invest in foreign currency denominated securities, the Fund restricts such activity to less than 35% of the Fund's total assets. When deemed appropriate, the Adviser may hedge the foreign currency exposure typically, and primarily, with forward currency contracts. A forward currency contract is an obligation to purchase or sell a specific currency at a future date, which may be any fixed number of days from the date of the contract agreed upon by the parties.

The Adviser may engage in active and frequent trading, resulting in a high portfolio turnover rate, to achieve the Fund's investment objective.

There is no assurance that the Fund will achieve its investment objective.

Principal Risks

Before investing in the Fund, you should carefully consider your own investment goals, the amount of time you are willing to leave your money invested, and the amount of risk you are willing to take. Remember, in addition to possibly not achieving your investment goals, **you could lose money by investing in the Fund**. The Fund's principal risks are presented in alphabetical order to facilitate finding particular risks and comparing them with other funds. Each risk summarized below is considered a "principal risk" of investing in the Fund, regardless of the order in which it appears. The principal risks of investing in the Fund are:

Asset-Backed and Mortgage-Backed Securities Risk. Asset-backed and mortgage-backed securities are subject to risk of prepayment. These types of securities may also decline in value because of mortgage foreclosures or defaults on the underlying obligations. Asset-backed and mortgage-backed securities are also subject to extension risk, the risk that rising interest rates could cause prepayments to decrease, extending the life of asset-backed and mortgage-backed securities with lower payment rates.

Bank Loans Risk. The Fund's investments in secured and unsecured assignments and/or participations in bank loans may create substantial risk. In making investments in such loans, which are made by banks or other financial intermediaries to borrowers, the Fund will depend primarily upon the creditworthiness of the borrower for payment of principal and interest. As a result, sale proceeds related to the sale of loans may not be available to make additional investments or to meet the Fund's redemption obligations until potentially a substantial period after the sale of the loans. The Fund, therefore, may be forced to sell other assets at a loss to pay redemption proceeds. A significant portion of bank loans may be "covenant lite" loans that may contain fewer or less restrictive constraints on the borrower and fewer or no financial maintenance covenants and restrictions. A covenant lite loan typically contains fewer clauses which allow an investor to proactively enforce financial covenants. Covenant lite loans also generally provide fewer investor protections if certain criteria are breached. The Fund may experience losses or delays in enforcing its rights on its holdings of covenant lite loans. The secondary market for bank loans is a private, unregulated inter-dealer or inter-bank resale market. Purchases and sales of loans are generally subject to contractual restrictions that must be satisfied before a loan can be bought or sold. These restrictions may impede the Fund's ability to buy or sell loans and may negatively impact the transaction price. It may take longer than seven days for transactions in loans to settle. The Fund may hold cash, sell investments or temporarily borrow from banks to meet short-term liquidity needs due to the extended loan settlement process, such as to satisfy redemption requests from Fund shareholders. U.S. federal securities laws afford certain protections against fraud and misrepresentation in connection with the offering or sale of a security, as well as against manipulation of trading markets for securities. The typical practice of a lender in relying exclusively or primarily on reports from the borrower may involve the risk of fraud, misrepresentation, or market manipulation by the borrower. It is unclear whether U.S. federal securities law protections are available to an investment in a loan. In certain circumstances, loans may not be

deemed to be securities, and in the event of fraud or misrepresentation by a borrower, lenders may not have the protection of the anti-fraud provisions of the federal securities laws. However, contractual provisions in the loan documents may offer some protections, and lenders may also avail themselves of common-law fraud protections under applicable state law.

Below Investment Grade Securities Risks (commonly referred to as “junk” bonds). The Fund may invest up to 100% of its assets in fixed income instruments that are or are deemed to be the equivalent in terms of quality to securities rated below investment grade by nationally recognized statistical rating organizations (“NRSROs”) and accordingly involve great risk. Such securities are regarded as predominantly speculative with respect to the issuer’s capacity to pay interest and repay principal in accordance with the terms of the obligations and involve major risk to adverse conditions. These securities offer higher returns than bonds with higher ratings as compensation for holding an obligation of an issuer perceived to be less creditworthy. The market prices of such securities are also subject to abrupt and erratic market movements and above-average price volatility, and the spread between the bid and ask prices of such securities may be greater than those prevailing in other securities markets. Changes in economic conditions or developments regarding issuers of non-investment grade debt securities are more likely to cause price volatility and weaken the capacity of such issuers to make principal and interest payments than is the case for higher grade debt securities. In addition, the market for lower grade debt securities may be thinner and less active than for higher grade debt securities.

Convertible Securities Risk. A convertible security is a fixed income security (a debt instrument or a preferred stock) which may be converted at a stated price within a specified period of time into a certain quantity of the common stock of the same or a different issuer. The market value of a convertible security performs like that of a regular debt security, that is, if market interest rates rise, the value of the convertible security falls.

Corporate Events Risk. Corporate events risk is the risk that a corporate transaction or opportunity will not occur, or a natural disaster or regulatory change will cause an abrupt downgrade in a corporate bond which may lower the Fund’s performance.

Credit-Related Instruments Risk. Interest rates may go up resulting in a decrease in the value of the securities held by the Fund. Interest rates have risen from historically low levels, and may rise further. A credit rating assigned to a particular debt security is essentially the opinion of an NRSRO as to the credit quality of an issuer and may prove to be inaccurate. There is also the risk that a bond issuer may “call,” or repay, its high yielding bonds before their maturity dates. Debt securities subject to prepayment can offer less potential for gains during a declining interest rate environment and similar or greater potential for loss in a rising interest rate environment. Limited trading opportunities for certain fixed income securities may make it more difficult to sell or buy a security at a favorable price or time, particularly during periods of market turmoil, and may also make these securities difficult to value.

Credit Risk. Debt portfolios are subject to credit risk. Credit risk refers to the likelihood that an issuer will default in the payment of principal and/or interest on an instrument. Financial strength and solvency of an issuer are the primary factors influencing credit risk. In addition, lack or inadequacy of collateral or credit enhancement for a debt instrument may affect its credit risk. Credit risk may change over the life of an instrument, and debt obligations which are rated by rating agencies are often reviewed and may be subject to downgrade.

Cybersecurity Risk. With the widespread use of technologies such as the Internet to conduct business, the Fund is susceptible to operational, information security, and related risks. Cyber incidents affecting the

Fund or its service providers have the ability to cause disruptions and impact business operations, potentially resulting in financial losses, interference with the Fund's ability to calculate its NAV, impediments to trading, the inability of shareholders to transact business, violations of applicable privacy and other laws, regulatory fines, penalties, reputational damage, reimbursement or other compensation costs, or additional compliance costs.

Distressed Securities Risk. The Fund may invest in securities of companies that are experiencing significant financial or business difficulties, including companies involved in bankruptcy or other reorganization and liquidation proceedings. Although such investments may result in significant returns to the Fund, they involve a substantial degree of risk. Any one or all of the issuers of the securities in which the Fund may invest may be unsuccessful or not show any return for a considerable period of time. The level of analytical sophistication, both financial and legal, necessary for successful investment in companies experiencing significant business and financial difficulties is unusually high. There is no assurance that the Adviser will correctly evaluate the value of the assets collateralizing the Fund's loans or the prospects for a successful reorganization or similar action. In any reorganization or liquidation proceeding relating to a company in which the Fund invests, the Fund may lose its entire investment or may be required to accept cash or securities with a value less than the Fund's original investment. Under such circumstances, the returns generated from the Fund's investments in distressed securities may not adequately compensate for the risks assumed. In addition, there is no minimum credit standard that is a prerequisite to the Fund's investment in any instrument, and a significant portion of the obligations and preferred stock in which the Fund invests may be less than investment grade.

Equity Securities Risk. The Fund may invest in income producing equity securities. Although investments in income producing equity securities are considered safer than equity securities in general, and equities historically have been a leading choice for long-term investors, the values of stocks rise and fall depending on many factors. The stock or other security of a company may not perform as well as expected, and may decrease in value, because of factors related to the company (such as poorer than expected earnings or certain management decisions) or to the industry in which the company is engaged (such as a reduction in the demand for products or services in a particular industry). Market and economic factors may adversely affect securities markets generally, which could in turn adversely affect the value of the Fund's investments, regardless of the performance or expected performance of companies in which the Fund invests.

Fixed Income Securities Market Risk. Difficult conditions in the broader financial markets have in the past resulted in a temporary but significant contraction in liquidity for fixed income securities. Liquidity relates to the ability of the Fund to sell its investments in a timely manner at a price approximately equal to its value on the Fund's books. To the extent that the market for fixed income securities suffers such a contraction, securities that were considered liquid at the time of investment could become temporarily illiquid, and the Adviser may experience delays or difficulty in selling assets at the prices at which the Fund carries such assets, which may result in a loss to the Fund. There is no way to predict reliably when such market conditions could re-occur or how long such conditions could persist.

In the event of a severe market contraction precipitated by general market turmoil, economic conditions, changes in prevailing interest rates or otherwise, coupled with extraordinary levels of Fund shareholder redemption requests, the Fund may have to consider selling its holdings at a loss including at prices below the current value on the Fund's books, borrowing money to satisfy redemption requests in accordance with the Fund's borrowing policy or postponing payment of redemption requests for up to seven days or longer, as permitted by applicable law, or other extraordinary measures. In addition, if the Fund needed to

sell large blocks of investments to meet shareholder redemption requests or to raise cash, those sales could further reduce prices, particularly for lower-rated and unrated securities.

In 2022 and 2023, the Federal Reserve increased interest rates in an effort to combat inflation which has resulted in periods of volatility. Additional interest rate changes may have adverse effects on investment, volatility and liquidity in the market for fixed income securities. In general, the market price of fixed income securities with longer maturities will increase or decrease more in response to changes in interest rates than shorter-term securities.

Fixed Income Securities Risk. The Fund invests a significant portion of its assets in fixed income securities. Fixed income securities are subject to credit risk and market risk, including interest rate risk. Credit risk is the risk of the issuer's inability to meet its principal and interest payment obligations. Market risk is the risk of price volatility due to such factors as interest rate sensitivity, market perception of the creditworthiness of the issuer and general market liquidity. There is no limitation on the maturities of fixed income securities in which the Fund invests. Securities having longer maturities generally involve greater risk of fluctuations in value resulting from changes in interest rates.

Floating Rate Risk. Securities with floating interest rates generally are less sensitive to interest rate changes but may decline in value if their interest rates do not rise as much, or as quickly, as interest rates in general. Conversely, floating rate instruments will not generally increase in value if interest rates decline. Changes in interest rates will also affect the amount of interest income the Fund earns on its floating rate investments.

Foreign Investments Risk. Investments in fixed income securities and instruments that are linked to fixed income securities (collectively, "Credit-Related Instruments") of foreign issuers involve certain risks not generally associated with investments in the securities of U.S. issuers, including changes in currency exchange rates, unstable political, social and economic conditions, a lack of adequate or accurate company information, differences in the way securities markets operate, less secure international banks or securities depositories than those in the U.S. and foreign controls on investment. In addition, individual international country economies may differ favorably or unfavorably from the U.S. economy in such respects as growth of gross domestic product, rates of inflation, capital reinvestment, resources, self-sufficiency and balance of payments position. Income earned on foreign investments may be subject to foreign withholding taxes.

Forward Currency Contracts Risk. The Fund may enter into forward currency contracts. A forward currency contract is an obligation to purchase or sell a specific currency at a future date, which may be any fixed number of days from the date of the contract agreed upon by the parties, at a price set at the time of the contract. For example, the Fund might purchase a particular currency or enter into a forward currency contract to preserve the U.S. dollar price of securities it intends to or has contracted to purchase. Alternatively, it might sell a particular currency on either a spot or forward basis to hedge against an anticipated decline in the dollar value of securities it intends to or has contracted to sell. Although this strategy could minimize the risk of loss due to a decline in the value of the hedged currency, it could also limit any potential gain from an increase in the value of the currency.

General Market Risk. Certain securities selected for the Fund's portfolio may be worth less than the price originally paid for them, or less than they were worth at an earlier time.

Government Securities Risk. The Fund invests in securities issued or guaranteed by the U.S. Government, its agencies and instrumentalities (including government-sponsored enterprises). Securities issued by

agencies and instrumentalities may not be guaranteed or insured by the U.S. Government and may only be supported by the credit of the issuing entity.

High Portfolio Turnover Rate Risk. The Fund pays transaction costs, such as commissions, when it buys and sells securities (or “turns over” its portfolio). A higher portfolio turnover rate may indicate higher transaction costs and may result in higher taxes when Fund shares are held in a taxable account. These costs, which are not reflected in Annual Fund Operating Expenses or in the Example, affect the Fund’s performance.

Interest Rate Risk. The prices of securities in general and fixed income securities in particular tend to be sensitive to interest rate fluctuations. Increases in interest rates can result in significant declines in the prices of fixed income securities. Securities with floating interest rates generally are less sensitive to interest rate changes but may decline in value if their interest rates do not rise as much, or as quickly, as interest rates in general. The negative impact on fixed income securities generally from rate increases, regardless of the cause, could be swift and significant, which could result in losses by the Fund, even if anticipated by the Adviser.

Liquidity Risk. Certain investments and markets can become illiquid at times and negatively impact the price of an investment if the Fund were to sell during times of illiquidity.

Management Risk. Investment strategies employed by the Adviser in selecting investments for the Fund may not result in an increase in the value of your investment or in overall performance equal to other investments.

Preferred Stock Risk. Preferred stocks may be more volatile than fixed income securities and are more correlated with the issuer’s underlying common stock than fixed income securities. Additionally, the dividend on a preferred stock may be changed or omitted by the issuer, and participation in the growth of an issuer may be limited.

Prepayment Risk. The risk that the issuer of a debt security repays all or a portion of the principal prior to the security’s maturity therefore resulting in lower yields to shareholders of the Fund. The Fund may be unable to re-invest the proceeds in an investment with as great a yield.

Recent Market Events Risk. U.S. and international markets have experienced and may continue to experience significant periods of volatility in recent years and months due to a number of economic, political and global macro factors including uncertainty regarding inflation and central banks’ interest rate changes, the possibility of a national or global recession, trade tensions, political events, the war between Russia and Ukraine, and armed conflict between Israel and Hamas in the Middle East. As a result of continuing political tensions and armed conflicts, including the war between Ukraine and Russia, the U.S. and the European Union imposed sanctions on certain Russian individuals and companies, including certain financial institutions, and have limited certain exports and imports to and from Russia. The war has contributed to recent market volatility and may continue to do so. Continuing market volatility as a result of recent market conditions or other events may have an adverse effect on the performance of the Fund.

Redemption Risk. The Fund may experience periods of heavy redemptions that could cause the Fund to liquidate its assets at inopportune times or at a loss or depressed value, particularly during periods of declining or illiquid markets.

Rule 144A Securities Risk. The market for Rule 144A securities typically is less active than the market for publicly-traded securities. Rule 144A securities carry the risk that the liquidity of these securities may become impaired, making it more difficult for the Fund to sell these securities.

Sovereign Debt Risk. The Fund may invest in securities issued or guaranteed by foreign governmental entities (known as sovereign debt securities). These investments are subject to the risk of payment delays or defaults, due, for example, to cash flow problems, insufficient foreign currency reserves, political considerations, large debt positions relative to the country's economy, or failure to implement economic reforms. There is no legal or bankruptcy process for collecting sovereign debt.

SPACs Risk. The Fund invests in equity securities of SPACs, which raise assets to seek potential business combination opportunities. Unless and until a business combination is completed, a SPAC generally invests its assets in U.S. government securities, money market securities, and cash. Because SPACs have no operating history or ongoing business other than seeking a business combination, the value of their securities is particularly dependent on the ability of the entity's management to identify and complete a profitable business combination. There is no guarantee that the SPACs in which the Fund invests will complete a business combination or that any business combination that is completed will be profitable. The market perception of a SPAC's ability to complete a business combination could materially impact the market value of the SPAC's securities. Public stockholders of SPACs may not be afforded a meaningful opportunity to vote on a proposed initial business combination because certain stockholders, including stockholders affiliated with the management of the SPAC, may have sufficient voting power, and a financial incentive, to approve such a transaction without support from public stockholders. As a result, a SPAC may complete a business combination even though a majority of its public stockholders do not support such a combination. Some SPACs may pursue a business combination only within certain industries or regions, which may increase the volatility of their prices.

Trade Versus Settlement Risk. The Fund may invest in securities that have varied settlement terms and dates. The longer the amount of time between trade date and settlement date the greater the risk that settlement will occur on a timely basis.

Yankee Bond Risk. Yankee bonds are subject to the same risks as other debt issues, notably credit risk, market risk, currency and liquidity risk. Other risks include adverse political and economic developments; the extent and quality of government regulations of financial markets and institutions; the imposition of foreign withholding taxes; and the expropriation or nationalization of foreign issuers.

Zero Coupon Securities Risk. While interest payments are not made on such securities, holders of such securities are deemed to have received income annually, notwithstanding that cash may not be received currently. Some of these securities may be subject to substantially greater price fluctuations during periods of changing market interest rates than are comparable securities that pay interest currently. Longer term zero coupon bonds are more exposed to interest rate risk than shorter term zero coupon bonds.

Performance

The bar chart demonstrates some of the risks of investing in the Fund by showing changes in the Fund's performance from year-to-year. The Average Annual Total Returns table also demonstrates these risks by showing how the Fund's average annual total returns for the one year and since inception periods compare with those of a broad measure of market performance, as well as three additional indices provided to show perspective on the market for fixed income securities. The Fund's past performance, before and after taxes, is not necessarily an indication of how the Fund will perform in the future.

Updated performance information is available on the Fund’s website at www.crossingbridgefunds.com or by calling the Fund toll-free at 888-898-2780.

Calendar Year Returns as of December 31

During the period shown in the bar chart, the best performance for a quarter was 1.70% (for the quarter ended December 31, 2023) and the worst performance was 0.00% (for the quarter ended March 31, 2022).

Average Annual Total Returns

(for the periods ended December 31, 2024)

	One Year	Since Inception (June 30, 2021)
Institutional Class Shares		
Return Before Taxes	5.81%	4.02%
Return After Taxes on Distributions	3.39%	2.29%
Return After Taxes on Distributions and Sale of Fund Shares	3.40%	2.34%
Bloomberg U.S. Aggregate Bond Index (reflects no deduction for fees, expenses, or taxes)	1.25%	-2.05%
ICE BofA 0-1 Year U.S. Corporate Bond Index (reflects no deduction for fees, expenses, or taxes)	5.74%	3.25%
ICE BofA 0-1 Year U.S. Treasury Index (reflects no deduction for fees, expenses, or taxes)	5.19%	3.08%
ICE BofA 0-3 Year U.S. Fixed Rate Asset Backed Securities Index (reflects no deduction for fees, expenses, or taxes)	5.83%	2.59%

After-tax returns are calculated using the historical highest individual federal marginal income tax rates and do not reflect the impact of state and local taxes. Actual after-tax returns depend on an investor’s tax situation and may differ from those shown, and after-tax returns are not relevant to investors who hold their Fund shares through tax-deferred or other tax-advantaged arrangements such as 401(k) plans or individual retirement accounts (“IRA”).

In certain cases, the figure representing “Return After Taxes on Distributions and Sale of Fund Shares” may be higher than the other return figures for the same period. A higher after-tax return results when a capital loss occurs upon redemption and provides an assumed tax benefit to the investor.

Management

Investment Adviser. CrossingBridge Advisors, LLC, located at 427 Bedford Road, Suite 220, Pleasantville, New York, 10570, is the Fund's investment adviser.

Portfolio Managers. David K. Sherman, Chief Investment Officer ("CIO") of the Adviser, has served as a Portfolio Manager of the Fund since its inception in 2021. T. Kirk Whitney, CFA[®], Portfolio Manager of the Adviser, has served as a Portfolio Manager of the Fund since 2025. Previously, Mr. Whitney served as the Assistant Portfolio Manager of the Fund since its inception in 2021. Michael De Kler, Portfolio Manager of the Adviser, has served as a Portfolio Manager of the Fund since 2025.

For important information about the purchase and sale of Fund shares, tax information and financial intermediary compensation, please turn to "Purchase and Sale of Fund Shares, Taxes and Financial Intermediary Compensation" on page 51 of the Prospectus.

CrossingBridge Responsible Credit Fund

Investment Objective

The CrossingBridge Responsible Credit Fund (“Responsible Credit Fund” or the “Fund”) seeks high current income and capital appreciation consistent with the preservation of capital.

Fees and Expenses of the Fund

This table describes the fees and expenses that you may pay if you buy, hold and sell shares of the Fund. You may pay other fees, such as brokerage commissions and other fees to financial intermediaries, which are not reflected in the table and Example below.

Annual Fund Operating Expenses <i>(expenses that you pay each year as a percentage of the value of your investment)</i>	Institutional Class
Management Fees	0.65%
Distribution and Service (12b-1) Fees	None
Shareholder Servicing Plan Fees ⁽¹⁾	0.10%
Other Expenses ⁽²⁾	0.76%
Total Annual Fund Operating Expenses ⁽²⁾	1.51%
Less: Fee Waiver and/or Expense Reimbursement	-0.60%
Total Annual Fund Operating Expenses After Fee Waiver and/or Expense Reimbursement ⁽²⁾⁽³⁾	0.91%

⁽¹⁾ The Trust’s Board of Trustees (the “Board of Trustees”) has authorized a shareholder servicing plan fee up to 0.15% of the Fund’s average daily net assets. Currently, the shareholder servicing plan fee being charged is 0.10% of the Fund’s average daily net assets; however, the fee may be increased to 0.15% of the Fund’s average daily net assets at any time.

⁽²⁾ Other Expenses include acquired fund fees and expenses (“AFFE”), which are indirect fees and expenses that the Fund incurs from investing in the shares of other mutual funds, including money market funds. Please note that the amount of Total Annual Fund Operating Expenses After Fee Waiver and/or Expense Reimbursement shown in the above table will differ from the Ratio of Expenses to Average Net Assets figures found within the “Financial Highlights” section of the Prospectus, which reflects the direct operating expenses of the Fund and does not include indirect expenses, such as AFFE.

⁽³⁾ Pursuant to an operating expense limitation agreement between CrossingBridge Advisors, LLC (the “Adviser”), the Fund’s investment adviser, and the Trust, on behalf of the Fund, the Adviser has agreed to waive its management fees and/or reimburse Fund expenses to ensure that Total Annual Fund Operating Expenses (exclusive of front-end or contingent deferred loads, Rule 12b-1 plan fees, shareholder servicing plan fees, leverage (*i.e.*, any expenses incurred in connection with borrowings made by the Fund) interest (including interest incurred in connection with bank and custody overdrafts), brokerage commissions and other transactional expenses, expenses incurred in connection with any merger or reorganization, dividends or interest on short positions, acquired fund fees and expenses or extraordinary expenses such as litigation (collectively “Excluded Expenses”)) do not exceed 0.80% of the Fund’s average annual net assets, through at least January 31, 2026. To the extent the Fund incurs Excluded Expenses, Total Annual Fund Operating Expenses After Fee Waiver and/or Expense Reimbursement may be greater than 0.80%. The operating expense limitation agreement can be terminated only by, or with the consent of, the Board of Trustees. The Adviser may request recoupment of previously waived fees and paid expenses from the Fund up to three years from the date such fees and expenses were waived or paid, subject to the operating expense limitation agreement, if such reimbursement will not cause the Fund’s expense ratio, after recoupment has been taken into account, to exceed the lesser of: (1) the expense limitation in place at the time of the waiver and/or expense payment; or (2) the expense limitation in place at the time of the recoupment.

Example

This Example is intended to help you compare the cost of investing in the Fund with the cost of investing in other mutual funds. The Example assumes that you invest \$10,000 in the Fund for the time periods indicated and then redeem all of your shares at the end of those periods. The Example also assumes that your investment has a 5% return each year and that the Fund’s operating expenses remain the same. The operating expense limitation agreement discussed in the table above is reflected only through January 31,

2026. Although your actual costs may be higher or lower, based on these assumptions, your costs would be:

<u>One Year</u>	<u>Three Years</u>	<u>Five Years</u>	<u>Ten Years</u>
\$93	\$418	\$767	\$1,750

Portfolio Turnover

The Fund pays transaction costs, such as commissions or spreads, when it buys and sells securities (or “turns over” its portfolio). A higher portfolio turnover rate may indicate higher transaction costs and may result in higher taxes when Fund shares are held in a taxable account. These costs, which are not reflected in the Total Annual Fund Operating Expenses or in the Example, affect the Fund’s performance. During the most recent fiscal year, the Fund’s portfolio turnover rate was 151.44% of the average value of its portfolio.

Principal Investment Strategies

The Fund seeks to achieve its investment objective by investing primarily in fixed income securities while actively managing interest rate and default risks. Under normal circumstances, the Fund invests at least 80% of its net assets (plus the amount of any borrowings for investment purposes) in fixed income securities and other credit-related instruments that meet the Adviser’s responsible investing criteria.

Investment decisions for the Fund are made by the Adviser based on a bottom-up analysis of an issuer’s business model, quantitative and qualitative factors, as well as the Adviser’s “responsible investing criteria” (*i.e.*, specific exclusionary and inclusionary criteria based on environmental, social and governance (“ESG”) standards). The Adviser utilizes a proprietary matrix to measure an issuer’s ESG engagement. The Adviser’s proprietary matrix sets a minimum threshold level that must be achieved for an issuer’s securities or other instruments to satisfy the Fund’s responsible investing criteria. The Adviser sources information relating to its responsible investing criteria from publicly-available resources such as financial filings, presentations, news articles, and management discussions. The Adviser monitors an issuer’s conformity to its responsible investing criteria and each holding will be formally reviewed by the Adviser at least annually.

The Adviser believes that ESG industry standards will evolve over time, and such standards will continue to enhance the Adviser’s ability to identify and measure behaviors. The Adviser believes that certain products and business practices of an issuer may be detrimental and incompatible with mainstream views of responsible investing. Therefore, certain exclusionary criteria are applied by the Adviser as a first step in determining an individual investment’s suitability for the Fund. Issuers whose business is primarily engaged in one of the following activities will be excluded from the Fund:

- Weapons;
- Tobacco;
- Alcohol and Marijuana (for Recreational Purposes);
- Gambling;
- Pornography/Adult Entertainment;
- Certain Fossil Fuels (including Coal Mining and Fracking Exploration);
- Nuclear Fission (typically Power Plants);
- International Norms Violations; and
- Corporations or Sovereign Entities not adhering to the United Nations Global Compact Principles and the Organization for Economic Co-operation and Development (OECD) Guidelines for Multi-National Enterprises.

The Adviser considers any issuer whose business generates 10% or more of its revenues from one of the activities noted above to be “primarily engaged” in such activities and subject to exclusion. The Adviser may expand the list of exclusionary activities from time to time. The Adviser applies its exclusionary criteria to any investment considered for inclusion in the Fund’s portfolio.

The Adviser believes that applying an exclusionary screen to issuers that are non-conforming to its ESG standards is an important first step, but believes it is also important to integrate those issuers that have a positive ESG impact or ESG mindfulness that meet the Adviser’s inclusionary criteria described in the objectives below. The Adviser believes that responsible issuers can reward shareholders while being mindful of their ESG impact. As a responsible investor, the Adviser seeks to invest with issuers providing positive leadership in the pursuit of the following objectives:

Environmental Objectives:

- Reduce the negative operational impact and practices on the environment;
- Reduce the use of scarce resources;
- Reduce carbon emissions; and
- Pursue resource efficiency, sustainability, and innovation.

Social Objectives:

- Treat all constituencies in a proper and ethical manner;
- Address all constituencies in a fair and equitable manner;
- Promote health and well-being for all constituencies;
- Protect sensitive data for all constituencies;
- Market products in a sincere and factual approach;
- Provide employees with development and opportunity in an appropriate workplace; and
- Recognize barriers of underrepresented groups by supporting diversity and inclusion.

Governance Objectives:

- Independent members of an issuers Board that provide checks and balances;
- Diversification of backgrounds, skills, and philosophy among an issuers Board or executive officers;
- Promote transparency and communication;
- Exercise and supports law abidingness externally and from within;
- Develop programs to measure and improve environmental impact and social practices;
- Respect lenders rights and value similarly to shareholders; and
- Advocate ethical standards in operations and dealings with customers, employees, regulators, business partners and the greater community.

At least 80% of the Fund’s assets will be comprised of investments of issuers satisfying the Adviser’s minimum threshold for the inclusionary criteria. The Adviser deems governmental securities of G7 countries (Canada, France, Germany, Italy, Japan, the United Kingdom and the United States) to be of the highest ESG quality. Governmental securities of non-G7 countries will be evaluated by the Adviser on a case-by-case basis for inclusion in the Fund’s investment portfolio.

The Fund defines fixed income securities to include: bills, notes, bonds, debentures, convertible bonds, loan participations, mortgage- and asset-backed securities, Rule 144A fixed income securities, zero coupon securities, syndicated loan assignments, sovereign debt and other evidence of indebtedness issued by U.S. or foreign corporations, governments, government agencies or government instrumentalities, including floating-rate securities, commercial paper, preferred stock and fixed income-like equities.

Convertible bonds, preferred stocks, and fixed income-like equities (e.g. special purpose acquisition companies (“SPACs”)) provide interest income and/or the potential for capital appreciation while having an effective maturity. Floating-rate securities provide interest income that can increase or decrease with interest rates. The Fund invests in individual fixed income securities without restriction as to issuer credit quality, capitalization or security maturity. The Fund may invest up to 100% of its assets in lower-quality fixed income securities — commonly known as “high yield” or “junk” bonds. Junk bonds are generally rated lower than Baa3 by Moody’s Investors Service (“Moody’s”) or lower than BBB- by Standard and Poor’s Rating Group (“S&P”). The Fund may invest in junk bonds that are in default, subject to bankruptcy or reorganization. High yield bonds have a higher expected rate of default than higher quality bonds.

The Adviser seeks to manage duration, currency, and default risks. Although the Adviser will take macro factors into consideration, the portfolio duration is primarily driven by bottom-up investment opportunities. Under normal market conditions, the Adviser will generally pursue a portfolio duration of 2.0 to 4.0. Duration is a measure of sensitivity of a security’s price to changes in interest rates. For example, a security with a duration of 2.0 would be expected to decrease in price 2% for every 1% rise in interest rates (the inverse is true as well).

The Adviser manages default risk by selecting securities of issuers that it believes will pay interest and principal regardless of their credit rating, based upon the Adviser’s credit analysis of each issuer. The Adviser may also select securities that are in default, subject to bankruptcy or reorganization where the Adviser believes the risks to be consistent with capital preservation, based on the Adviser’s analysis of an issuer’s liquidation value or post-bankruptcy or post-reorganization value.

The Adviser manages foreign currency risk by investing primarily in securities denominated in U.S. dollars, such as Yankee bonds. If the Fund were to invest in foreign currency denominated securities, the Fund restricts such activity to less than 35% of the Fund’s total assets. When deemed appropriate, the Adviser may hedge the foreign currency exposure typically, and primarily, with forward currency contracts. A forward currency contract is an obligation to purchase or sell a specific currency at a future date, which may be any fixed number of days from the date of the contract agreed upon by the parties.

The Fund is “non-diversified” for purposes of the Investment Company Act of 1940, as amended (the “1940 Act”), which means that the Fund may invest in fewer securities at any one time than a diversified fund. However, the adviser manages the impact of the risk of each investment by a considered analysis of appropriate sizing and portfolio diversification.

The Fund may engage in active trading of its portfolio, resulting in a high turnover rate.

There is no assurance that the Fund will achieve its investment objective.

Principal Risks

Before investing in the Fund, you should carefully consider your own investment goals, the amount of time you are willing to leave your money invested, and the amount of risk you are willing to take. Remember, in addition to possibly not achieving your investment goals, **you could lose money by investing in the Fund**. The Fund’s principal risks are presented in alphabetical order to facilitate finding particular risks and comparing them with other funds. Each risk summarized below is considered a “principal risk” of investing in the Fund, regardless of the order in which it appears. The principal risks of investing in the Fund are:

Asset-Backed and Mortgage-Backed Securities Risk. Asset-backed and mortgage-backed securities are subject to risk of prepayment. These types of securities may also decline in value because of mortgage foreclosures or defaults on the underlying obligations. Asset-backed and mortgage-backed securities are also subject to extension risk, the risk that rising interest rates could cause prepayments to decrease, extending the life of asset-backed and mortgage-backed securities with lower payment rates.

Bank Loans Risk. The Fund's investments in secured and unsecured assignments and/or participations in bank loans may create substantial risk. In making investments in such loans, which are made by banks or other financial intermediaries to borrowers, the Fund will depend primarily upon the creditworthiness of the borrower for payment of principal and interest. As a result, sale proceeds related to the sale of loans may not be available to make additional investments or to meet the Fund's redemption obligations until potentially a substantial period after the sale of the loans. The Fund, therefore, may be forced to sell other assets at a loss to pay redemption proceeds. A significant portion of bank loans may be "covenant lite" loans that may contain fewer or less restrictive constraints on the borrower and fewer or no financial maintenance covenants and restrictions. A covenant lite loan typically contains fewer clauses which allow an investor to proactively enforce financial covenants. Covenant lite loans also generally provide fewer investor protections if certain criteria are breached. The Fund may experience losses or delays in enforcing its rights on its holdings of covenant lite loans. The secondary market for bank loans is a private, unregulated inter-dealer or inter-bank resale market. Purchases and sales of loans are generally subject to contractual restrictions that must be satisfied before a loan can be bought or sold. These restrictions may impede the Fund's ability to buy or sell loans and may negatively impact the transaction price. It may take longer than seven days for transactions in loans to settle. The Fund may hold cash, sell investments or temporarily borrow from banks to meet short-term liquidity needs due to the extended loan settlement process, such as to satisfy redemption requests from Fund shareholders. U.S. federal securities laws afford certain protections against fraud and misrepresentation in connection with the offering or sale of a security, as well as against manipulation of trading markets for securities. The typical practice of a lender in relying exclusively or primarily on reports from the borrower may involve the risk of fraud, misrepresentation, or market manipulation by the borrower. It is unclear whether U.S. federal securities law protections are available to an investment in a loan. In certain circumstances, loans may not be deemed to be securities, and in the event of fraud or misrepresentation by a borrower, lenders may not have the protection of the anti-fraud provisions of the federal securities laws. However, contractual provisions in the loan documents may offer some protections, and lenders may also avail themselves of common-law fraud protections under applicable state law.

Below Investment Grade Securities Risks (commonly referred to as "junk" bonds). The Fund may invest up to 100% of its assets in fixed income instruments that are or are deemed to be the equivalent in terms of quality to securities rated below investment grade by nationally recognized statistical rating organizations ("NRSROs") and accordingly involve great risk. Such securities are regarded as predominantly speculative with respect to the issuer's capacity to pay interest and repay principal in accordance with the terms of the obligations and involve major risk to adverse conditions. These securities offer higher returns than bonds with higher ratings as compensation for holding an obligation of an issuer perceived to be less creditworthy. The market prices of such securities are also subject to abrupt and erratic market movements and above-average price volatility, and the spread between the bid and ask prices of such securities may be greater than those prevailing in other securities markets. Changes in economic conditions or developments regarding issuers of non-investment grade debt securities are more likely to cause price volatility and weaken the capacity of such issuers to make principal and interest payments than is the case for higher grade debt securities. In addition, the market for lower grade debt securities may be thinner and less active than for higher grade debt securities.

Convertible Securities Risk. A convertible security is a fixed income security (a debt instrument or a preferred stock) which may be converted at a stated price within a specified period of time into a certain quantity of the common stock of the same or a different issuer. The market value of a convertible security performs like that of a regular debt security, that is, if market interest rates rise, the value of the convertible security falls.

Corporate Events Risk. Corporate events risk is the risk that a corporate transaction or opportunity will not occur, or a natural disaster or regulatory change will cause an abrupt downgrade in a corporate bond which may lower the Fund's performance.

Credit-Related Instruments Risk. Interest rates may go up resulting in a decrease in the value of the securities held by the Fund. Interest rates have risen from historically low levels, and may rise further. A credit rating assigned to a particular debt security is essentially the opinion of an NRSRO as to the credit quality of an issuer and may prove to be inaccurate. There is also the risk that a bond issuer may "call," or repay, its high yielding bonds before their maturity dates. Debt securities subject to prepayment can offer less potential for gains during a declining interest rate environment and similar or greater potential for loss in a rising interest rate environment. Limited trading opportunities for certain fixed income securities may make it more difficult to sell or buy a security at a favorable price or time, particularly during periods of market turmoil, and may also make these securities difficult to value.

Credit Risk. Debt portfolios are subject to credit risk. Credit risk refers to the likelihood that an issuer will default in the payment of principal and/or interest on an instrument. Financial strength and solvency of an issuer are the primary factors influencing credit risk. In addition, lack or inadequacy of collateral or credit enhancement for a debt instrument may affect its credit risk. Credit risk may change over the life of an instrument, and debt obligations which are rated by rating agencies are often reviewed and may be subject to downgrade.

Cybersecurity Risk. With the widespread use of technologies such as the Internet to conduct business, the Fund is susceptible to operational, information security, and related risks. Cyber incidents affecting the Fund or its service providers have the ability to cause disruptions and impact business operations, potentially resulting in financial losses, interference with the Fund's ability to calculate its NAV, impediments to trading, the inability of shareholders to transact business, violations of applicable privacy and other laws, regulatory fines, penalties, reputational damage, reimbursement or other compensation costs, or additional compliance costs.

Distressed Securities Risk. The Fund may invest in securities of companies that are experiencing significant financial or business difficulties, including companies involved in bankruptcy or other reorganization and liquidation proceedings. Although such investments may result in significant returns to the Fund, they involve a substantial degree of risk. Any one or all of the issuers of the securities in which the Fund may invest may be unsuccessful or not show any return for a considerable period of time. The level of analytical sophistication, both financial and legal, necessary for successful investment in companies experiencing significant business and financial difficulties is unusually high. There is no assurance that the Adviser will correctly evaluate the value of the assets collateralizing the Fund's loans or the prospects for a successful reorganization or similar action. In any reorganization or liquidation proceeding relating to a company in which the Fund invests, the Fund may lose its entire investment or may be required to accept cash or securities with a value less than the Fund's original investment. Under such circumstances, the returns generated from the Fund's investments in distressed securities may not adequately compensate for the risks assumed. In addition, there is no minimum credit standard that is a

prerequisite to the Fund's investment in any instrument, and a significant portion of the obligations and preferred stock in which the Fund invests may be less than investment grade.

Equity Securities Risk. The Fund may invest in income producing equity securities. Although investments in income producing equity securities are considered safer than equity securities in general, and equities historically have been a leading choice for long-term investors, the values of stocks rise and fall depending on many factors. The stock or other security of a company may not perform as well as expected, and may decrease in value, because of factors related to the company (such as poorer than expected earnings or certain management decisions) or to the industry in which the company is engaged (such as a reduction in the demand for products or services in a particular industry). Market and economic factors may adversely affect securities markets generally, which could in turn adversely affect the value of the Fund's investments, regardless of the performance or expected performance of companies in which the Fund invests.

ESG Investment Risk. The Fund's focus on sustainability considerations (ESG criteria) may limit the number of investment opportunities available to the Fund, and as a result, at times, the Fund may underperform funds that are not subject to similar investment considerations.

Fixed Income Securities Market Risk. Difficult conditions in the broader financial markets have in the past resulted in a temporary but significant contraction in liquidity for fixed income securities. Liquidity relates to the ability of the Fund to sell its investments in a timely manner at a price approximately equal to its value on the Fund's books. To the extent that the market for fixed income securities suffers such a contraction, securities that were considered liquid at the time of investment could become temporarily illiquid, and the Adviser may experience delays or difficulty in selling assets at the prices at which the Fund carries such assets, which may result in a loss to the Fund. There is no way to predict reliably when such market conditions could re-occur or how long such conditions could persist.

In the event of a severe market contraction precipitated by general market turmoil, economic conditions, changes in prevailing interest rates or otherwise, coupled with extraordinary levels of Fund shareholder redemption requests, the Fund may have to consider selling its holdings at a loss including at prices below the current value on the Fund's books, borrowing money to satisfy redemption requests in accordance with the Fund's borrowing policy or postponing payment of redemption requests for up to seven days or longer, as permitted by applicable law, or other extraordinary measures. In addition, if the Fund needed to sell large blocks of investments to meet shareholder redemption requests or to raise cash, those sales could further reduce prices, particularly for lower-rated and unrated securities.

In 2022 and 2023, the Federal Reserve increased interest rates in an effort to combat inflation which has resulted in periods of volatility. Additional interest rate changes may have adverse effects on investment, volatility and liquidity in the market for fixed income securities. In general, the market price of fixed income securities with longer maturities will increase or decrease more in response to changes in interest rates than shorter-term securities.

Fixed Income Securities Risk. The Fund invests a significant portion of its assets in fixed income securities. Fixed income securities are subject to credit risk and market risk, including interest rate risk. Credit risk is the risk of the issuer's inability to meet its principal and interest payment obligations. Market risk is the risk of price volatility due to such factors as interest rate sensitivity, market perception of the creditworthiness of the issuer and general market liquidity. There is no limitation on the maturities of fixed income securities in which the Fund invests. Securities having longer maturities generally involve greater risk of fluctuations in value resulting from changes in interest rates.

Floating Rate Risk. Securities with floating interest rates generally are less sensitive to interest rate changes but may decline in value if their interest rates do not rise as much, or as quickly, as interest rates in general. Conversely, floating rate instruments will not generally increase in value if interest rates decline. Changes in interest rates will also affect the amount of interest income the Fund earns on its floating rate investments.

Foreign Investments Risk. Investments in fixed income securities and instruments that are linked to fixed income securities (collectively, “Credit-Related Instruments”) of foreign issuers involve certain risks not generally associated with investments in the securities of U.S. issuers, including changes in currency exchange rates, unstable political, social and economic conditions, a lack of adequate or accurate company information, differences in the way securities markets operate, less secure international banks or securities depositories than those in the U.S. and foreign controls on investment. In addition, individual international country economies may differ favorably or unfavorably from the U.S. economy in such respects as growth of gross domestic product, rates of inflation, capital reinvestment, resources, self-sufficiency and balance of payments position. Income earned on foreign investments may be subject to foreign withholding taxes.

Forward Currency Contracts Risk. The Fund may enter into forward currency contracts. A forward currency contract is an obligation to purchase or sell a specific currency at a future date, which may be any fixed number of days from the date of the contract agreed upon by the parties, at a price set at the time of the contract. For example, the Fund might purchase a particular currency or enter into a forward currency contract to preserve the U.S. dollar price of securities it intends to or has contracted to purchase. Alternatively, it might sell a particular currency on either a spot or forward basis to hedge against an anticipated decline in the dollar value of securities it intends to or has contracted to sell. Although this strategy could minimize the risk of loss due to a decline in the value of the hedged currency, it could also limit any potential gain from an increase in the value of the currency.

General Market Risk. Certain securities selected for the Fund’s portfolio may be worth less than the price originally paid for them, or less than they were worth at an earlier time.

Government Securities Risk. The Fund invests in securities issued or guaranteed by the U.S. Government, its agencies and instrumentalities (including government-sponsored enterprises). Securities issued by agencies and instrumentalities may not be guaranteed or insured by the U.S. Government and may only be supported by the credit of the issuing entity.

High Portfolio Turnover Rate Risk. The Fund pays transaction costs, such as commissions, when it buys and sells securities (or “turns over” its portfolio). A higher portfolio turnover rate may indicate higher transaction costs and may result in higher taxes when Fund shares are held in a taxable account. These costs, which are not reflected in Annual Fund Operating Expenses or in the Example, affect the Fund’s performance.

Interest Rate Risk. The prices of securities in general and fixed income securities in particular tend to be sensitive to interest rate fluctuations. Increases in interest rates can result in significant declines in the prices of fixed income securities. Securities with floating interest rates generally are less sensitive to interest rate changes but may decline in value if their interest rates do not rise as much, or as quickly, as interest rates in general. The negative impact on fixed income securities generally from rate increases, regardless of the cause, could be swift and significant, which could result in losses by the Fund, even if anticipated by the Adviser.

Liquidity Risk. Certain investments and markets can become illiquid at times and negatively impact the price of an investment if the Fund were to sell during times of illiquidity.

Management Risk. Investment strategies employed by the Adviser in selecting investments for the Fund may not result in an increase in the value of your investment or in overall performance equal to other investments.

Non-Diversification Risk. The Fund is classified as a “non-diversified” investment company under the Investment Company Act of 1940, as amended (the “1940 Act”). Therefore, the Fund may invest a relatively high percentage of its assets in a smaller number of issuers or may invest a larger proportion of its assets in the obligations of a single issuer. As a result, the gains and losses on a single investment may have a greater impact on the Fund’s net asset value (“NAV”) and may make the Fund more volatile than more diversified funds.

Preferred Stock Risk. Preferred stocks may be more volatile than fixed income securities and are more correlated with the issuer’s underlying common stock than fixed income securities. Additionally, the dividend on a preferred stock may be changed or omitted by the issuer, and participation in the growth of an issuer may be limited.

Prepayment Risk. The risk that the issuer of a debt security repays all or a portion of the principal prior to the security’s maturity therefore resulting in lower yields to shareholders of the Fund. The Fund may be unable to re-invest the proceeds in an investment with as great a yield.

Recent Market Events Risk. U.S. and international markets have experienced and may continue to experience significant periods of volatility in recent years and months due to a number of economic, political and global macro factors including uncertainty regarding inflation and central banks’ interest rate changes, the possibility of a national or global recession, trade tensions, political events, the war between Russia and Ukraine, and armed conflict between Israel and Hamas in the Middle East. As a result of continuing political tensions and armed conflicts, including the war between Ukraine and Russia, the U.S. and the European Union imposed sanctions on certain Russian individuals and companies, including certain financial institutions, and have limited certain exports and imports to and from Russia. The war has contributed to recent market volatility and may continue to do so. Continuing market volatility as a result of recent market conditions or other events may have an adverse effect on the performance of the Fund.

Redemption Risk. The Fund may experience periods of heavy redemptions that could cause the Fund to liquidate its assets at inopportune times or at a loss or depressed value, particularly during periods of declining or illiquid markets.

Rule 144A Securities Risk. The market for Rule 144A securities typically is less active than the market for publicly-traded securities. Rule 144A securities carry the risk that the liquidity of these securities may become impaired, making it more difficult for the Fund to sell these securities.

Sovereign Debt Risk. The Fund may invest in securities issued or guaranteed by foreign governmental entities (known as sovereign debt securities). These investments are subject to the risk of payment delays or defaults, due, for example, to cash flow problems, insufficient foreign currency reserves, political considerations, large debt positions relative to the country’s economy, or failure to implement economic reforms. There is no legal or bankruptcy process for collecting sovereign debt.

SPACs Risk. The Fund invests in equity securities of SPACs, which raise assets to seek potential business combination opportunities. Unless and until a business combination is completed, a SPAC generally invests its assets in U.S. government securities, money market securities, and cash. Because SPACs have no operating history or ongoing business other than seeking a business combination, the value of their securities is particularly dependent on the ability of the entity's management to identify and complete a profitable business combination. There is no guarantee that the SPACs in which the Fund invests will complete a business combination or that any business combination that is completed will be profitable. The market perception of a SPAC's ability to complete a business combination could materially impact the market value of the SPAC's securities. Public stockholders of SPACs may not be afforded a meaningful opportunity to vote on a proposed initial business combination because certain stockholders, including stockholders affiliated with the management of the SPAC, may have sufficient voting power, and a financial incentive, to approve such a transaction without support from public stockholders. As a result, a SPAC may complete a business combination even though a majority of its public stockholders do not support such a combination. Some SPACs may pursue a business combination only within certain industries or regions, which may increase the volatility of their prices.

Trade Versus Settlement Risk. The Fund may invest in securities that have varied settlement terms and dates. The longer the amount of time between trade date and settlement date the greater the risk that settlement will occur on a timely basis.

Yankee Bond Risk. Yankee bonds are subject to the same risks as other debt issues, notably credit risk, market risk, currency and liquidity risk. Other risks include adverse political and economic developments; the extent and quality of government regulations of financial markets and institutions; the imposition of foreign withholding taxes; and the expropriation or nationalization of foreign issuers.

Zero Coupon Securities Risk. While interest payments are not made on such securities, holders of such securities are deemed to have received income annually, notwithstanding that cash may not be received currently. Some of these securities may be subject to substantially greater price fluctuations during periods of changing market interest rates than are comparable securities that pay interest currently. Longer term zero coupon bonds are more exposed to interest rate risk than shorter term zero coupon bonds.

Performance

The bar chart demonstrates some of the risks of investing in the Fund by showing changes in the Fund's performance from year-to-year. The Average Annual Total Returns table also demonstrates these risks by showing how the Fund's average annual total returns for the one year and since inception periods compare with those of a broad measure of market performance, as well as three additional indices provided to show perspective on the market for fixed income securities. The Fund's past performance, before and after taxes, is not necessarily an indication of how the Fund will perform in the future. Updated performance information is available on the Fund's website at www.crossingbridgefunds.com or by calling the Fund toll-free at 888-898-2780.

Calendar Year Returns as of December 31

During the period shown in the bar chart, the best performance for a quarter was 2.89% (for the quarter ended September 30, 2023) and the worst performance was -1.62% (for the quarter ended June 30, 2022).

Average Annual Total Returns

(for the periods ended December 31, 2024)

	One Year	Since Inception (June 30, 2021)
Institutional Class Shares		
Return Before Taxes	7.28%	5.18%
Return After Taxes on Distributions	3.66%	2.19%
Return After Taxes on Distributions and Sale of Fund Shares	4.26%	2.68%
Bloomberg U.S. Aggregate Bond Index (reflects no deduction for fees, expenses, or taxes)	1.25%	-2.05%
ICE BofA U.S. High Yield Total Return Index (reflects no deduction for fees, expenses, or taxes)	8.20%	2.95%
ICE BofA U.S. Corporate Bond Index (reflects no deduction for fees, expenses, or taxes)	2.76%	-1.66%
ICE BofA 3-7 Year U.S. Treasury Index (reflects no deduction for fees, expenses, or taxes)	1.94%	-1.26%

After-tax returns are calculated using the historical highest individual federal marginal income tax rates and do not reflect the impact of state and local taxes. Actual after-tax returns depend on an investor's tax situation and may differ from those shown, and after-tax returns are not relevant to investors who hold their Fund shares through tax-deferred or other tax-advantaged arrangements such as 401(k) plans or individual retirement accounts ("IRA").

In certain cases, the figure representing "Return After Taxes on Distributions and Sale of Fund Shares" may be higher than the other return figures for the same period. A higher after-tax return results when a capital loss occurs upon redemption and provides an assumed tax benefit to the investor.

Management

Investment Adviser. CrossingBridge Advisors, LLC, located at 427 Bedford Road, Suite 220, Pleasantville, New York, 10570, is the Fund's investment adviser.

Portfolio Managers. David K. Sherman, Chief Investment Officer (“CIO”) of the Adviser, has served as a Portfolio Manager of the Fund since its inception in 2021. T. Kirk Whitney, CFA[®], Portfolio Manager of the Adviser, has served as a Portfolio Manager of the Fund since 2025. Previously, Mr. Whitney served as the Assistant Portfolio Manager of the Fund since its inception in 2021. Spencer Rolfe, Portfolio Manager of the Adviser, has served as a Portfolio Manager of the Fund since January 2025.

RiverPark Strategic Income Fund

Investment Objective

The RiverPark Strategic Income Fund (the “Strategic Income Fund” or the “Fund”) seeks high current income and capital appreciation consistent with the preservation of capital.

Fees and Expenses of the Fund

This table describes the fees and expenses that you may pay if you buy, hold and sell shares of the Fund. **You may pay other fees, such as brokerage commissions and other fees to financial intermediaries, which are not reflected in the table and Example below.**

Annual Fund Operating Expenses <i>(expenses that you pay each year as a percentage of the value of your investment)</i>	Institutional Class	Retail Class
Management Fees	0.65%	0.65%
Distribution and Service (12b-1) Fees	None	0.25%
Shareholder Servicing Plan Fees ⁽¹⁾	0.11%	0.11%
Other Expenses ⁽²⁾	0.15%	0.16%
Interest Expense and Dividends on Short Positions	0.15%	0.13%
Total Annual Fund Operating Expenses⁽²⁾	1.06%	1.30%

⁽¹⁾ The Trust’s Board of Trustees (the “Board of Trustees”) has authorized a shareholder servicing plan fee up to 0.15% of the Fund’s average daily net assets. Currently, the shareholder servicing plan fee being charged is 0.11% of the Fund’s average daily net assets; however, the fee may be increased to 0.15% of the Fund’s average daily net assets at any time.

⁽²⁾ Other Expenses includes acquired fund fees and expenses (“AFFE”), which are indirect fees and expenses that the Fund incurs from investing in the shares of other mutual funds, including money market funds. Please note that the amount of Total Annual Fund Operating Expenses After Fee Waiver and/or Expense Reimbursement shown in the above table will differ from the Ratio of Expenses to Average Net Assets figures found within the “Financial Highlights” section of the Prospectus, which reflects the direct operating expenses of the Fund and does not include indirect expenses, such as AFFE.

Example

This Example is intended to help you compare the cost of investing in the Fund with the cost of investing in other mutual funds. The Example assumes that you invest \$10,000 in the Fund for the time periods indicated and then hold or redeem all of your shares at the end of those periods. The Example also assumes that your investment has a 5% return each year and that the Fund’s operating expenses remain the same. Although your actual costs may be higher or lower, based on these assumptions, your costs would be:

Share Class	One Year	Three Years	Five Years	Ten Years
Institutional Class	\$108	\$337	\$585	\$1,294
Retail Class	\$132	\$412	\$713	\$1,568

Portfolio Turnover

The Fund pays transaction costs, such as commissions or spreads, when it buys and sells securities (or “turns over” its portfolio). A higher portfolio turnover rate may indicate higher transaction costs and may result in higher taxes when Fund shares are held in a taxable account. These costs, which are not reflected in the Total Annual Fund Operating Expenses or in the Example, affect the Fund’s performance. During the most recent fiscal year, the Fund’s portfolio turnover rate was 116.98% of the average value of its portfolio.

Principal Investment Strategies

The Fund seeks to achieve its investment objective by investing in both investment grade and non-investment grade debt, preferred stock, convertible bonds (*i.e.*, debt securities that provide the Fund with a right or an obligation to exchange the debt security for a predetermined number of shares in the issuing company), bank loans, high yield bonds, mortgage- and asset-backed securities, special purpose acquisition companies (“SPACs”) and income producing equities (collectively, “Securities”) that CrossingBridge Advisors, LLC (the “Adviser”), the Fund’s investment adviser, deems appropriate for the Fund’s investment objective. The Fund will invest at least 80% of its net assets (plus the amount of any borrowings for investment purposes) in fixed income securities and income producing equities.

The Fund may invest up to 100% of its assets in fixed income securities. The fixed income securities in which the Fund will invest include fixed income securities of various credit qualities (*i.e.*, investment grade and below investment grade (*i.e.*, junk bonds)) and maturities (*i.e.*, long-term, intermediate and short-term). The Fund may invest up to 100% of its assets in below investment grade fixed income securities. The Fund will invest in individual fixed income securities without restriction as to duration. The Fund’s investment in below investment grade fixed income securities may include distressed securities, which are fixed income securities issued by companies experiencing significant financial or business difficulties such as bankruptcy, reorganization or liquidation proceedings. The income producing equities that the Fund may invest in include those that either have a substantial dividend yield or the Adviser believes the issuing company will distribute significant assets over a certain period of time.

The Fund will invest primarily in U.S. dollar-denominated securities but may invest up to 35% of its assets in foreign fixed income securities including sovereign debt and foreign currency-denominated securities. The Fund may hedge the foreign currency exposure by investing in forward currency contracts. A forward currency contract is an obligation to purchase or sell a specific currency at a future date, which may be any fixed number of days from the date of the contract agreed upon by the parties. The Fund may also invest up to 35% of its assets in income producing equities. The Fund’s investments will be diversified across individual issuers and industries. The Fund, however, will invest without restriction as to issuer credit quality, or security maturity.

Although the Adviser will take macro factors (*i.e.*, the effect of interest rates on the Fund’s investments) into consideration, the Fund’s portfolio construction is primarily driven by bottom-up investment analysis. This means that the Adviser looks at Securities on an individual basis to determine if a Security is an attractive investment opportunity and if it is consistent with the Fund’s investment objective. The Fund’s buy and sell decisions are driven by the Adviser’s investment process. The Fund may hold Securities until maturity but will sell a Security when the Adviser determines a Security is no longer an attractive investment opportunity consistent with the Fund’s investment objective, when a more attractive investment opportunity becomes available or to satisfy redemption requests. In addition, a Security may be purchased at a premium or discount and/or sold prior to maturity where the Adviser believes it is advantageous to do so. The Fund may invest up to 15% of the value of its total assets to effect short sales of securities, including up to 10% in short sales of exchange-traded funds (“ETFs”) to hedge the portfolio if the Adviser believes it is consistent with achieving the Fund’s investment objective. Other than for temporary purposes, the Fund will not borrow in order to gain leverage.

The Fund may engage in active trading of its portfolio, resulting in a high turnover rate.

There is no assurance that the Fund will achieve its investment objectives.

Principal Risks

Before investing in the Fund, you should carefully consider your own investment goals, the amount of time you are willing to leave your money invested, and the amount of risk you are willing to take. Remember, in addition to possibly not achieving your investment goals, **you could lose money by investing in the Fund**. The Fund's principal risks are presented in alphabetical order to facilitate finding particular risks and comparing them with other funds. Each risk summarized below is considered a "principal risk" of investing in the Fund, regardless of the order in which it appears. The principal risks of investing in the Fund are:

Asset-Backed and Mortgage-Backed Securities Risk. Asset-backed and mortgage-backed securities are subject to risk of prepayment. These types of securities may also decline in value because of mortgage foreclosures or defaults on the underlying obligations. Asset-backed and mortgage-backed securities are also subject to extension risk, the risk that rising interest rates could cause prepayments to decrease, extending the life of asset-backed and mortgage-backed securities with lower payment rates.

Bank Loans Risk. The Fund's investments in secured and unsecured assignments and/or participations in bank loans may create substantial risk. In making investments in such loans, which are made by banks or other financial intermediaries to borrowers, the Fund will depend primarily upon the creditworthiness of the borrower for payment of principal and interest. As a result, sale proceeds related to the sale of loans may not be available to make additional investments or to meet the Fund's redemption obligations until potentially a substantial period after the sale of the loans. The Fund, therefore, may be forced to sell other assets at a loss to pay redemption proceeds. A significant portion of bank loans may be "covenant lite" loans that may contain fewer or less restrictive constraints on the borrower and fewer or no financial maintenance covenants and restrictions. A covenant lite loan typically contains fewer clauses which allow an investor to proactively enforce financial covenants. Covenant lite loans also generally provide fewer investor protections if certain criteria are breached. The Fund may experience losses or delays in enforcing its rights on its holdings of covenant lite loans. The secondary market for bank loans is a private, unregulated inter-dealer or inter-bank resale market. Purchases and sales of loans are generally subject to contractual restrictions that must be satisfied before a loan can be bought or sold. These restrictions may impede the Fund's ability to buy or sell loans and may negatively impact the transaction price. It may take longer than seven days for transactions in loans to settle. The Fund may hold cash, sell investments or temporarily borrow from banks to meet short-term liquidity needs due to the extended loan settlement process, such as to satisfy redemption requests from Fund shareholders. U.S. federal securities laws afford certain protections against fraud and misrepresentation in connection with the offering or sale of a security, as well as against manipulation of trading markets for securities. The typical practice of a lender in relying exclusively or primarily on reports from the borrower may involve the risk of fraud, misrepresentation, or market manipulation by the borrower. It is unclear whether U.S. federal securities law protections are available to an investment in a loan. In certain circumstances, loans may not be deemed to be securities, and in the event of fraud or misrepresentation by a borrower, lenders may not have the protection of the anti-fraud provisions of the federal securities laws. However, contractual provisions in the loan documents may offer some protections, and lenders may also avail themselves of common-law fraud protections under applicable state law.

Below Investment Grade Securities Risks (commonly referred to as "junk" bonds). The Fund may invest up to 100% of its assets in fixed income instruments that are or are deemed to be the equivalent in terms of quality to securities rated below investment grade by nationally recognized statistical rating organizations ("NRSROs") and accordingly involve great risk. Such securities are regarded as predominantly speculative with respect to the issuer's capacity to pay interest and repay principal in

accordance with the terms of the obligations and involve major risk to adverse conditions. These securities offer higher returns than bonds with higher ratings as compensation for holding an obligation of an issuer perceived to be less creditworthy. The market prices of such securities are also subject to abrupt and erratic market movements and above-average price volatility, and the spread between the bid and ask prices of such securities may be greater than those prevailing in other securities markets. Changes in economic conditions or developments regarding issuers of non-investment grade debt securities are more likely to cause price volatility and weaken the capacity of such issuers to make principal and interest payments than is the case for higher grade debt securities. In addition, the market for lower grade debt securities may be thinner and less active than for higher grade debt securities.

Convertible Securities Risk. A convertible security is a fixed income security (a debt instrument or a preferred stock) which may be converted at a stated price within a specified period of time into a certain quantity of the common stock of the same or a different issuer. The market value of a convertible security performs like that of a regular debt security, that is, if market interest rates rise, the value of the convertible security falls.

Credit Risk. Debt portfolios are subject to credit risk. Credit risk refers to the likelihood that an issuer will default in the payment of principal and/or interest on an instrument. Financial strength and solvency of an issuer are the primary factors influencing credit risk. In addition, lack or inadequacy of collateral or credit enhancement for a debt instrument may affect its credit risk. Credit risk may change over the life of an instrument, and debt obligations which are rated by rating agencies are often reviewed and may be subject to downgrade.

Cybersecurity Risk. With the widespread use of technologies such as the Internet to conduct business, the Fund is susceptible to operational, information security, and related risks. Cyber incidents affecting the Fund or its service providers have the ability to cause disruptions and impact business operations, potentially resulting in financial losses, interference with the Fund's ability to calculate its NAV, impediments to trading, the inability of shareholders to transact business, violations of applicable privacy and other laws, regulatory fines, penalties, reputational damage, reimbursement or other compensation costs, or additional compliance costs.

Distressed Securities Risk. The Fund may invest in securities of companies that are experiencing significant financial or business difficulties, including companies involved in bankruptcy or other reorganization and liquidation proceedings. Although such investments may result in significant returns to the Fund, they involve a substantial degree of risk. Any one or all of the issuers of the securities in which the Fund may invest may be unsuccessful or not show any return for a considerable period of time. The level of analytical sophistication, both financial and legal, necessary for successful investment in companies experiencing significant business and financial difficulties is unusually high. There is no assurance that the Adviser will correctly evaluate the value of the assets collateralizing the Fund's loans or the prospects for a successful reorganization or similar action. In any reorganization or liquidation proceeding relating to a company in which the Fund invests, the Fund may lose its entire investment or may be required to accept cash or securities with a value less than the Fund's original investment. Under such circumstances, the returns generated from the Fund's investments in distressed securities may not adequately compensate for the risks assumed. In addition, there is no minimum credit standard that is a prerequisite to the Fund's investment in any instrument, and a significant portion of the obligations and preferred stock in which the Fund invests may be less than investment grade.

Equity Securities Risk. The Fund may invest in income producing equity securities. Although investments in income producing equity securities are considered safer than equity securities in general,

and equities historically have been a leading choice for long-term investors, the values of stocks rise and fall depending on many factors. The stock or other security of a company may not perform as well as expected, and may decrease in value, because of factors related to the company (such as poorer than expected earnings or certain management decisions) or to the industry in which the company is engaged (such as a reduction in the demand for products or services in a particular industry). Market and economic factors may adversely affect securities markets generally, which could in turn adversely affect the value of the Fund's investments, regardless of the performance or expected performance of companies in which the Fund invests.

Fixed Income Securities Market Risk. Difficult conditions in the broader financial markets have in the past resulted in a temporary but significant contraction in liquidity for fixed income securities. Liquidity relates to the ability of the Fund to sell its investments in a timely manner at a price approximately equal to its value on the Fund's books. To the extent that the market for fixed income securities suffers such a contraction, securities that were considered liquid at the time of investment could become temporarily illiquid, and the Adviser may experience delays or difficulty in selling assets at the prices at which the Fund carries such assets, which may result in a loss to the Fund. There is no way to predict reliably when such market conditions could re-occur or how long such conditions could persist.

In the event of a severe market contraction precipitated by general market turmoil, economic conditions, changes in prevailing interest rates or otherwise, coupled with extraordinary levels of Fund shareholder redemption requests, the Fund may have to consider selling its holdings at a loss including at prices below the current value on the Fund's books, borrowing money to satisfy redemption requests in accordance with the Fund's borrowing policy or postponing payment of redemption requests for up to seven days or longer, as permitted by applicable law, or other extraordinary measures. In addition, if the Fund needed to sell large blocks of investments to meet shareholder redemption requests or to raise cash, those sales could further reduce prices, particularly for lower-rated and unrated securities.

In 2022 and 2023, the Federal Reserve increased interest rates in an effort to combat inflation which has resulted in periods of volatility. Additional interest rate changes may have adverse effects on investment, volatility and liquidity in the market for fixed income securities. In general, the market price of fixed income securities with longer maturities will increase or decrease more in response to changes in interest rates than shorter-term securities.

Fixed Income Securities Risk. The Fund invests a significant portion of its assets in fixed income securities. Fixed income securities are subject to credit risk and market risk, including interest rate risk. Credit risk is the risk of the issuer's inability to meet its principal and interest payment obligations. Market risk is the risk of price volatility due to such factors as interest rate sensitivity, market perception of the creditworthiness of the issuer and general market liquidity. There is no limitation on the maturities of fixed income securities in which the Fund invests. Securities having longer maturities generally involve greater risk of fluctuations in value resulting from changes in interest rates.

Foreign Investments Risk. Investments in fixed income securities and instruments that are linked to fixed income securities (collectively, "Credit-Related Instruments") of foreign issuers involve certain risks not generally associated with investments in the securities of U.S. issuers, including changes in currency exchange rates, unstable political, social and economic conditions, a lack of adequate or accurate company information, differences in the way securities markets operate, less secure international banks or securities depositories than those in the U.S. and foreign controls on investment. In addition, individual international country economies may differ favorably or unfavorably from the U.S. economy in such respects as growth of gross domestic product, rates of inflation, capital reinvestment, resources, self-

sufficiency and balance of payments position. Income earned on foreign investments may be subject to foreign withholding taxes.

Forward Currency Contracts Risk. The Fund may enter into forward currency contracts. A forward currency contract is an obligation to purchase or sell a specific currency at a future date, which may be any fixed number of days from the date of the contract agreed upon by the parties, at a price set at the time of the contract. For example, the Fund might purchase a particular currency or enter into a forward currency contract to preserve the U.S. dollar price of securities it intends to or has contracted to purchase. Alternatively, it might sell a particular currency on either a spot or forward basis to hedge against an anticipated decline in the dollar value of securities it intends to or has contracted to sell. Although this strategy could minimize the risk of loss due to a decline in the value of the hedged currency, it could also limit any potential gain from an increase in the value of the currency.

General Market Risk. Certain securities selected for the Fund's portfolio may be worth less than the price originally paid for them, or less than they were worth at an earlier time.

High Portfolio Turnover Rate Risk. The Fund pays transaction costs, such as commissions, when it buys and sells securities (or "turns over" its portfolio). A higher portfolio turnover rate may indicate higher transaction costs and may result in higher taxes when Fund shares are held in a taxable account. These costs, which are not reflected in Annual Fund Operating Expenses or in the Example, affect the Fund's performance.

Illiquid Investments Risk. Illiquid investments include any investment that the Fund reasonably expects cannot be sold or disposed of in current market conditions in seven calendar days or less without the sale or dispositions significantly changing the market value of the investment, and include repurchase agreements maturing in more than seven days. The Fund's investments in certain types of fixed income securities such as bank loans, mortgage-backed securities and below investment grade fixed income securities could have the effect of increasing the amount of the Fund's assets invested in illiquid investments if market conditions develop that make such investments difficult to sell. Liquidity risk may be higher in a rising interest rate environment, when the value and liquidity of fixed income securities generally decline. Illiquid investments involve the risk that the securities will not be able to be sold at the time desired by the Adviser or at prices approximating the value at which the Fund is carrying the securities.

Interest Rate Risk. The prices of securities in general and fixed income securities in particular tend to be sensitive to interest rate fluctuations. Increases in interest rates can result in significant declines in the prices of fixed income securities. Securities with floating interest rates generally are less sensitive to interest rate changes but may decline in value if their interest rates do not rise as much, or as quickly, as interest rates in general. The negative impact on fixed income securities generally from rate increases, regardless of the cause, could be swift and significant, which could result in losses by the Fund, even if anticipated by the Adviser.

Management Risk. Investment strategies employed by the Adviser in selecting investments for the Fund may not result in an increase in the value of your investment or in overall performance equal to other investments.

Preferred Stock Risk. Preferred stocks may be more volatile than fixed income securities and are more correlated with the issuer's underlying common stock than fixed income securities. Additionally, the dividend on a preferred stock may be changed or omitted by the issuer, and participation in the growth of an issuer may be limited.

Recent Market Events Risk. U.S. and international markets have experienced and may continue to experience significant periods of volatility in recent years and months due to a number of economic, political and global macro factors including uncertainty regarding inflation and central banks' interest rate changes, the possibility of a national or global recession, trade tensions, political events, the war between Russia and Ukraine, and armed conflict between Israel and Hamas in the Middle East. As a result of continuing political tensions and armed conflicts, including the war between Ukraine and Russia, the U.S. and the European Union imposed sanctions on certain Russian individuals and companies, including certain financial institutions, and have limited certain exports and imports to and from Russia. The war has contributed to recent market volatility and may continue to do so. Continuing market volatility as a result of recent market conditions or other events may have an adverse effect on the performance of the Fund.

Short Sales Risk. A short sale is the sale by the Fund of a security which it does not own in anticipation of purchasing the same security in the future at a lower price to close the short position. A short sale will be successful if the price of the shorted security decreases. However, if the underlying security goes up in price during the period in which the short position is outstanding, the Fund will realize a loss. The risk on a short sale is unlimited because the Fund must buy the shorted security at the higher price to complete the transaction. Therefore, short sales may be subject to greater risks than investments in long positions. With a long position, the maximum sustainable loss is limited to the amount paid for the security plus the transaction costs, whereas there is no maximum attainable price of the shorted security. The Fund would also incur increased transaction costs associated with selling securities short. In addition, if the Fund sells securities short, it must maintain a segregated account with its custodian containing cash or high-grade securities equal to (i) the greater of the current market value of the securities sold short or the market value of such securities at the time they were sold short, less (ii) any collateral deposited with the Fund's broker (not including the proceeds from the short sales).

Sovereign Debt Risk. The Fund may invest in securities issued or guaranteed by foreign governmental entities (known as sovereign debt securities). These investments are subject to the risk of payment delays or defaults, due, for example, to cash flow problems, insufficient foreign currency reserves, political considerations, large debt positions relative to the country's economy, or failure to implement economic reforms. There is no legal or bankruptcy process for collecting sovereign debt.

SPACs Risk. The Fund invests in equity securities of SPACs, which raise assets to seek potential business combination opportunities. Unless and until a business combination is completed, a SPAC generally invests its assets in U.S. government securities, money market securities, and cash. Because SPACs have no operating history or ongoing business other than seeking a business combination, the value of their securities is particularly dependent on the ability of the entity's management to identify and complete a profitable business combination. There is no guarantee that the SPACs in which the Fund invests will complete a business combination or that any business combination that is completed will be profitable. The market perception of a SPAC's ability to complete a business combination could materially impact the market value of the SPAC's securities. Public stockholders of SPACs may not be afforded a meaningful opportunity to vote on a proposed initial business combination because certain stockholders, including stockholders affiliated with the management of the SPAC, may have sufficient voting power, and a financial incentive, to approve such a transaction without support from public stockholders. As a result, a SPAC may complete a business combination even though a majority of its public stockholders do not support such a combination. Some SPACs may pursue a business combination only within certain industries or regions, which may increase the volatility of their prices.

Performance

The bar chart demonstrates some of the risks of investing in the Fund by showing changes in the Fund's performance from year to year for Institutional Class shares. The Average Annual Total Returns table also demonstrates these risks by showing how average annual returns for the Fund's Institutional Class and Retail Class shares for the one year, five year, and ten year periods compare with those of a broad measure of market performance, as well as three additional indices provided to show perspective on the market for fixed income securities.

Effective on May 12, 2023, the RiverPark Strategic Income Fund, a series of RiverPark Funds Trust (the "Predecessor Fund") reorganized into the Fund, a newly-created series of the Trust (the "Reorganization"). For periods prior to the Reorganization, the performance figures for Institutional Class and Retail Class shares reflect the historical performance of the Institutional Class and Retail Class shares, respectively, of the Predecessor Fund. The Fund has adopted the performance and financial history of the Predecessor Fund. The Fund's past performance, before and after taxes, is not necessarily an indication of how the Fund will perform in the future. Updated performance information is available on the Fund's website at www.crossingbridgefunds.com or by calling the Fund toll-free at 888-898-2780.

Calendar Year Returns as of December 31*

* The returns shown in the bar chart are for Institutional Class shares of the Fund. Retail Class shares would have substantially similar annual returns because the shares are invested in the same portfolio of securities and the annual returns would differ only to the extent that the classes do not have the same expenses. Performance for Retail Class shares would be lower as expenses for Retail Class shares are higher.

During the period shown in the bar chart, the best performance for a quarter for the Fund's Institutional Class shares was 9.83% (for the quarter ended June 30, 2020) and the worst performance for a quarter for the Fund's Institutional Class shares was -12.86% (for the quarter ended March 31, 2020).

Average Annual Total Returns
(for the periods ended December 31, 2024)

	One Year	Five Year	Ten Year
Institutional Class Shares			
Return Before Taxes	8.42%	5.81%	4.46%
Return After Taxes on Distributions	5.12%	3.06%	1.96%
Return After Taxes on Distributions and Sales of Fund Shares	4.94%	3.25%	2.26%
Retail Class Shares			
Return Before Taxes	8.15%	5.60%	4.21%
Bloomberg U.S. Aggregate Bond Index (reflects no deduction for fees, expenses, or taxes)	1.25%	-0.33%	1.35%
ICE BofA U.S. High Yield Total Return Index (reflects no deduction for fees, expenses, or taxes)	8.20%	4.04%	5.08%
ICE BofA 3-7 Year U.S. Treasury Index (reflects no deduction for fees, expenses, or taxes)	1.94%	0.18%	1.23%
ICE BofA U.S. Corporate Bond Index (reflects no deduction for fees, expenses, or taxes)	2.76%	0.48%	2.52%

After-tax returns are calculated using the historical highest individual federal marginal income tax rates and do not reflect the impact of state and local taxes. Actual after-tax returns depend on an investor's tax situation and may differ from those shown, and after-tax returns shown are not relevant to investors who hold their Fund shares through tax-deferred or other tax-advantaged arrangements, such as 401(k) plans or individual retirement accounts ("IRAs"). The after-tax returns are shown for Institutional Class shares only and after-tax returns for Retail Class shares will vary.

In certain cases, the figure representing "Return After Taxes on Distributions and Sale of Fund Shares" may be higher than the other return figures for the same period. A higher after-tax return results when a capital loss occurs upon redemption and provides an assumed tax benefit to the investor.

Management

Investment Adviser. CrossingBridge Advisors, LLC, located at 427 Bedford Road, Suite 220, Pleasantville, New York, 10570, is the Fund's investment adviser.

Portfolio Managers. David K. Sherman, Chief Investment Officer ("CIO") of the Adviser, has served as a Portfolio Manager of the Fund since its inception in 2013. Spencer Rolfe, Portfolio Manager of the Adviser, has served as a Portfolio Manager of the Fund since 2025. Previously, Mr. Rolfe had served as the Assistant Portfolio Manager of the Fund since 2023.

For important information about the purchase and sale of Fund shares, tax information and financial intermediary compensation, please turn to "Purchase and Sale of Fund Shares, Taxes and Financial Intermediary Compensation" on page 51 of the Prospectus.

CrossingBridge Nordic High Income Fund

Investment Objective

The CrossingBridge Nordic High Income Bond Fund (the “Nordic High Income Bond Fund” or the “Fund”) seeks high current income and capital appreciation consistent with the preservation of capital.

Fees and Expenses of the Fund

This table describes the fees and expenses that you may pay if you buy, hold and sell shares of the Fund. **You may pay other fees, such as brokerage commissions and other fees to financial intermediaries, which are not reflected in the table and Example below.**

Annual Fund Operating Expenses <i>(expenses that you pay each year as a percentage of the value of your investment)</i>	Institutional Class
Management Fees	0.65%
Distribution and Service (12b-1) Fees	None
Shareholder Servicing Plan Fees ⁽¹⁾	0.10%
Other Expenses ⁽²⁾	0.31%
Total Annual Fund Operating Expenses ⁽²⁾⁽³⁾	1.06%
Less: Fee Waiver and/or Expense Reimbursement	-0.11%
Total Annual Fund Operating Expenses After Fee Waiver and/or Expense Reimbursement ⁽³⁾	0.95%

⁽¹⁾ The Trust’s Board of Trustees (the “Board of Trustees”) has authorized a shareholder servicing plan fee up to 0.15% of the Fund’s average daily net assets. Currently, the shareholder servicing plan fee being charged is 0.10% of the Fund’s average daily net assets; however, the fee may be increased to 0.15% of the Fund’s average daily net assets at any time.

⁽²⁾ Estimated for the Fund’s current fiscal year.

⁽³⁾ Pursuant to an operating expense limitation agreement between CrossingBridge Advisors, LLC (the “Adviser”), the Fund’s investment adviser, and the Trust, on behalf of the Fund, the Adviser has agreed to waive its management fees and/or reimburse Fund expenses to ensure that Total Annual Fund Operating Expenses (exclusive of front-end or contingent deferred loads, Rule 12b-1 plan fees, shareholder servicing plan fees, leverage (*i.e.*, any expenses incurred in connection with borrowings made by the Fund) interest (including interest incurred in connection with bank and custody overdrafts), brokerage commissions and other transactional expenses, expenses incurred in connection with any merger or reorganization, dividends or interest on short positions, acquired fund fees and expenses or extraordinary expenses such as litigation (collectively “Excluded Expenses”)) do not exceed 0.85% of the Fund’s average annual net assets, through at least September 30, 2026. To the extent the Fund incurs Excluded Expenses, Total Annual Fund Operating Expenses After Fee Waiver and/or Expense Reimbursement may be greater than 0.85%. The operating expense limitation agreement can be terminated only by, or with the consent of, the Board of Trustees. The Adviser may request recoupment of previously waived fees and paid expenses from the Fund up to three years from the date such fees and expenses were waived or paid, subject to the operating expense limitation agreement, if such reimbursement will not cause the Fund’s expense ratio, after recoupment has been taken into account, to exceed the lesser of: (1) the expense limitation in place at the time of the waiver and/or expense payment; or (2) the expense limitation in place at the time of the recoupment.

Example

This Example is intended to help you compare the cost of investing in the Fund with the cost of investing in other mutual funds. The Example assumes that you invest \$10,000 in the Fund for the time periods indicated and then hold or redeem all of your shares at the end of those periods. The Example also assumes that your investment has a 5% return each year and that the Fund’s operating expenses remain the same. The operating expense limitation agreement discussed in the table above is reflected only through September 30, 2026. Although your actual costs may be higher or lower, based on these assumptions, your costs would be:

One Year

\$97

Three Years

\$315

Portfolio Turnover

The Fund pays transaction costs, such as commissions or spreads, when it buys and sells securities (or “turns over” its portfolio). A higher portfolio turnover rate may indicate higher transaction costs and may result in higher taxes when Fund shares are held in a taxable account. These costs, which are not reflected in the Total Annual Fund Operating Expenses or in the Example, affect the Fund’s performance. Because the Fund had not commenced investment operations as of September 30, 2024, portfolio turnover information is not yet available.

Principal Investment Strategies

Under normal market conditions, the Fund seeks to achieve its investment objective by investing at least 80% of its net assets, (plus the amount of any borrowings for investment purposes) in income producing bonds that are issued, originated, or underwritten out of the Nordic Countries (as defined below). The Adviser considers the Nordic Countries to be Denmark, Finland, Iceland, Norway and Sweden. The Adviser will construct the Fund’s portfolio by investing in corporate bonds including, but not limited to, fixed or floating rate bonds, zero-coupon bonds and convertible bonds, and bonds issued by governments, government agencies or government instrumentalities of the Nordic Countries.

The Fund invests in individual securities without restriction as to issuer credit quality, capitalization, security maturity, or currency-denomination. The Fund may invest up to 100% of its assets in lower-quality bonds — commonly known as “high yield” or “junk” bonds. Junk bonds are generally rated lower than Baa3 by Moody’s Investors Service (“Moody’s”) or lower than BBB- by Standard and Poor’s Rating Group (“S&P”). The Fund may invest in junk bonds that are in default, subject to bankruptcy or reorganization. High yield bonds have a higher expected rate of default than higher quality bonds. The Fund will invest in both bonds that are secured by the assets of the issuer and unsecured bonds. The Fund may invest in privately placed bonds that may be resold to “qualified institutional buyers” in accordance with the provisions of Rule 144A under the Securities Act of 1933 (“Rule 144A Securities”). The Fund may also invest up to 100% of its total assets in foreign currency denominated securities.

The Adviser seeks to manage default and currency risks. The Adviser seeks to manage default risk by selecting securities of issuers that it believes will pay interest and principal regardless of their credit rating, based upon the Adviser’s credit analysis of each issuer. The Adviser may also select securities that are in default, subject to bankruptcy or reorganization where the Adviser believes the risks to be consistent with capital preservation, based on the Adviser’s analysis of an issuer’s liquidation value or post-bankruptcy or post-reorganization value.

The Adviser seeks to manage currency risk, when appropriate, by hedging foreign currency exposure typically, and primarily, with forward currency contracts. A forward currency contract is an obligation to purchase or sell a specific currency at a future date, which may be any fixed number of days from the date of the contract agreed upon by the parties. The Fund may also manage currency risk by investing in bonds denominated in U.S. dollars, such as Yankee bonds.

The Fund’s investments in derivative instruments, specifically options, swap agreements and forward currency contracts (collectively, “Derivatives”) are generally used to reduce exposure to, or “hedge” against, market volatilities and other risks. The Fund may also use a Derivative rather than investing directly in an underlying asset class as a low-cost, effective means to gain exposure to such asset class. The Fund will count the notional value of investments in derivative instruments towards compliance with

the 80% investment policy discussed above, except that investments in derivative instruments for the purpose of hedging foreign currency risk will not be counted towards the 80% investment policy.

The Fund will sell an investment during portfolio rebalancing periods when the Fund's holdings in that investment are larger than the allocation suggested by the Adviser's investment models or when a more attractive investment becomes available. The Adviser may engage in active trading of the Fund's portfolio investments, resulting in a high portfolio turnover rate, to achieve the Fund's investment objective.

There is no assurance the Fund will achieve its investment objective.

Principal Risks

Before investing in the Fund, you should carefully consider your own investment goals, the amount of time you are willing to leave your money invested, and the amount of risk you are willing to take. Remember, in addition to possibly not achieving your investment goals, **you could lose money by investing in the Fund**. The Fund's principal risks are presented in alphabetical order to facilitate finding particular risks and comparing them with other funds. Each risk summarized below is considered a "principal risk" of investing in the Fund, regardless of the order in which it appears. The principal risks of investing in the Fund are:

Below Investment Grade Securities Risks (commonly referred to as "junk" bonds). The Fund may invest up to 100% of its assets in fixed income instruments that are or are deemed to be the equivalent in terms of quality to securities rated below investment grade by nationally recognized statistical rating organizations ("NRSROs") and accordingly involve great risk. Such securities are regarded as predominantly speculative with respect to the issuer's capacity to pay interest and repay principal in accordance with the terms of the obligations and involve major risk to adverse conditions. These securities offer higher returns than bonds with higher ratings as compensation for holding an obligation of an issuer perceived to be less creditworthy. The market prices of such securities are also subject to abrupt and erratic market movements and above-average price volatility, and the spread between the bid and ask prices of such securities may be greater than those prevailing in other securities markets. Changes in economic conditions or developments regarding issuers of non-investment grade debt securities are more likely to cause price volatility and weaken the capacity of such issuers to make principal and interest payments than is the case for higher grade debt securities. In addition, the market for lower grade debt securities may be thinner and less active than for higher grade debt securities.

Convertible Securities Risk. A convertible security is a fixed income security which may be converted at a stated price within a specified period of time into a certain quantity of the common stock of the same or a different issuer. The market value of a convertible security performs like that of a regular debt security, that is, if market interest rates rise, the value of the convertible security falls.

Corporate Events Risk. Corporate events risk is the risk that a corporate transaction or opportunity will not occur, or a natural disaster or regulatory change will cause an abrupt downgrade in a corporate bond which may lower the Fund's performance.

Counterparty Risk. Counterparty risk arises upon entering into borrowing arrangements or Derivative transactions and is the risk from the potential inability of counterparties to meet the terms of their contracts.

Credit-Related Instruments Risk. Interest rates may go up resulting in a decrease in the value of the securities held by the Fund. Interest rates have risen from historically low levels, and may rise further. A credit rating assigned to a particular debt security is essentially the opinion of an NRSRO as to the credit quality of an issuer and may prove to be inaccurate. There is also the risk that a bond issuer may “call,” or repay, its high yielding bonds before their maturity dates. Debt securities subject to prepayment can offer less potential for gains during a declining interest rate environment and similar or greater potential for loss in a rising interest rate environment. Limited trading opportunities for certain fixed income securities may make it more difficult to sell or buy a security at a favorable price or time, particularly during periods of market turmoil, and may also make these securities difficult to value.

Credit Risk. Debt portfolios are subject to credit risk. Credit risk refers to the likelihood that an issuer will default in the payment of principal and/or interest on an instrument. Financial strength and solvency of an issuer are the primary factors influencing credit risk. In addition, lack or inadequacy of collateral or credit enhancement for a debt instrument may affect its credit risk. Credit risk may change over the life of an instrument, and debt obligations which are rated by rating agencies are often reviewed and may be subject to downgrade.

Cybersecurity Risk. With the widespread use of technologies such as the Internet to conduct business, the Fund is susceptible to operational, information security, and related risks. Cyber incidents affecting the Fund or its service providers have the ability to cause disruptions and impact business operations, potentially resulting in financial losses, interference with the Fund’s ability to calculate its NAV, impediments to trading, the inability of shareholders to transact business, violations of applicable privacy and other laws, regulatory fines, penalties, reputational damage, reimbursement or other compensation costs, or additional compliance costs.

Derivatives Risk. The Fund’s use of swap contracts and options involves risks different from, or possibly greater than the risks associated with investing directly in securities including leverage risk, tracking risk and counterparty default risk. Option positions may expire worthless exposing the Fund to potentially significant losses. To the extent the Fund invests in Derivatives, the risks below may affect its performance:

Interest Rate Risk. Underlying investments may lose value due to interest rate changes.

Liquidity Risk. The Fund may not be able to sell or close out a Derivative instrument.

Options Risk. Options contracts may be more volatile than investments directly in the underlying securities, involve additional costs and may involve a small initial investment relative to the risk assumed.

Swap Agreements Risk. A swap contract may not be assigned without the consent of the counterparty, and may result in losses in the event of a default or bankruptcy of the counterparty.

Distressed Securities Risk. The Fund may invest in securities of companies that are experiencing significant financial or business difficulties, including companies involved in bankruptcy or other reorganization and liquidation proceedings. Although such investments may result in significant returns to the Fund, they involve a substantial degree of risk. Any one or all of the issuers of the securities in which the Fund may invest may be unsuccessful or not show any return for a considerable period of time. The level of analytical sophistication, both financial and legal, necessary for successful investment in companies experiencing significant business and financial difficulties is unusually high. There is no

assurance that the Adviser will correctly evaluate the value of the assets collateralizing the Fund's loans or the prospects for a successful reorganization or similar action. In any reorganization or liquidation proceeding relating to a company in which the Fund invests, the Fund may lose its entire investment or may be required to accept cash or securities with a value less than the Fund's original investment. Under such circumstances, the returns generated from the Fund's investments in distressed securities may not adequately compensate for the risks assumed. In addition, there is no minimum credit standard that is a prerequisite to the Fund's investment in any instrument, and a significant portion of the obligations and preferred stock in which the Fund invests may be less than investment grade.

Fixed Income Securities Market Risk. Difficult conditions in the broader financial markets have in the past resulted in a temporary but significant contraction in liquidity for fixed income securities. Liquidity relates to the ability of the Fund to sell its investments in a timely manner at a price approximately equal to its value on the Fund's books. To the extent that the market for fixed income securities suffers such a contraction, securities that were considered liquid at the time of investment could become temporarily illiquid, and the Adviser may experience delays or difficulty in selling assets at the prices at which the Fund carries such assets, which may result in a loss to the Fund. There is no way to predict reliably when such market conditions could re-occur or how long such conditions could persist.

In the event of a severe market contraction precipitated by general market turmoil, economic conditions, changes in prevailing interest rates or otherwise, coupled with extraordinary levels of Fund shareholder redemption requests, the Fund may have to consider selling its holdings at a loss including at prices below the current value on the Fund's books, borrowing money to satisfy redemption requests in accordance with the Fund's borrowing policy or postponing payment of redemption requests for up to seven days or longer, as permitted by applicable law, or other extraordinary measures. In addition, if the Fund needed to sell large blocks of investments to meet shareholder redemption requests or to raise cash, those sales could further reduce prices, particularly for lower-rated and unrated securities.

In 2022 and 2023, the Federal Reserve increased interest rates in an effort to combat inflation which has resulted in periods of volatility. Additional interest rate changes may have adverse effects on investment, volatility and liquidity in the market for fixed income securities. In general, the market price of fixed income securities with longer maturities will increase or decrease more in response to changes in interest rates than shorter-term securities.

Fixed Income Securities Risk. The Fund invests in bonds. Bonds are subject to credit risk and market risk, including interest rate risk. Credit risk is the risk of the issuer's inability to meet its principal and interest payment obligations. Market risk is the risk of price volatility due to such factors as interest rate sensitivity, market perception of the creditworthiness of the issuer and general market liquidity. There is no limitation on the maturities of bonds in which the Fund invests. Securities having longer maturities generally involve greater risk of fluctuations in value resulting from changes in interest rates.

Floating Rate Risk. Securities with floating interest rates generally are less sensitive to interest rate changes but may decline in value if their interest rates do not rise as much, or as quickly, as interest rates in general. Conversely, floating rate instruments will not generally increase in value if interest rates decline. Changes in interest rates will also affect the amount of interest income the Fund earns on its floating rate investments.

Foreign Investments Risk. Investments in bonds and instruments that are linked to fixed income securities (collectively, "Credit-Related Instruments") of foreign issuers involve certain risks not generally associated with investments in the securities of U.S. issuers, including changes in currency

exchange rates, unstable political, social and economic conditions, a lack of adequate or accurate company information, differences in the way securities markets operate, less secure international banks or securities depositories than those in the U.S. and foreign controls on investment. In addition, individual international country economies may differ favorably or unfavorably from the U.S. economy in such respects as growth of gross domestic product, rates of inflation, capital reinvestment, resources, self-sufficiency and balance of payments position. Income earned on foreign investments may be subject to foreign withholding taxes.

Forward Currency Contracts Risk. The Fund may enter into forward currency contracts. A forward currency contract is an obligation to purchase or sell a specific currency at a future date, which may be any fixed number of days from the date of the contract agreed upon by the parties, at a price set at the time of the contract. For example, the Fund might purchase a particular currency or enter into a forward currency contract to preserve the U.S. dollar price of securities it intends to or has contracted to purchase. Alternatively, it might sell a particular currency on either a spot or forward basis to hedge against an anticipated decline in the dollar value of securities it intends to or has contracted to sell. Although this strategy could minimize the risk of loss due to a decline in the value of the hedged currency, it could also limit any potential gain from an increase in the value of the currency.

General Market Risk. Certain securities selected for the Fund's portfolio may be worth less than the price originally paid for them, or less than they were worth at an earlier time.

Government Securities Risk. The Fund invests in securities issued or guaranteed by the Nordic Countries, their agencies and instrumentalities (including government-sponsored enterprises). Securities issued by agencies and instrumentalities may not be guaranteed or insured by the Nordic Countries and may only be supported by the credit of the issuing entity.

High Portfolio Turnover Rate Risk. The Fund pays transaction costs, such as commissions, when it buys and sells securities (or "turns over" its portfolio). A higher portfolio turnover rate may indicate higher transaction costs and may result in higher taxes when Fund shares are held in a taxable account. These costs, which are not reflected in Annual Fund Operating Expenses or in the Example, affect the Fund's performance.

Interest Rate Risk. The prices of securities in general and fixed income securities in particular tend to be sensitive to interest rate fluctuations. Increases in interest rates can result in significant declines in the prices of fixed income securities. Securities with floating interest rates generally are less sensitive to interest rate changes but may decline in value if their interest rates do not rise as much, or as quickly, as interest rates in general. The negative impact on fixed income securities generally from rate increases, regardless of the cause, could be swift and significant, which could result in losses by the Fund, even if anticipated by the Adviser.

Leverage Risk. Derivatives may create economic leverage and can result in losses to the Fund that exceed the original amount invested.

Liquidity Risk. Certain investments and markets can become illiquid at times and negatively impact the price of an investment if the Fund were to sell during times of illiquidity.

Management Risk. Investment strategies employed by the Adviser in selecting investments for the Fund may not result in an increase in the value of your investment or in overall performance equal to other investments.

New Fund Risk. The Fund is a recently organized, management investment company with a limited operating history. As a result, prospective investors have a limited track record on which to base their investment decision. There is also a risk that the Fund will not grow to or maintain an economically viable size, in which case it could ultimately liquidate without shareholder approval.

Nordic Countries Risk. Investments in issuers of the Nordic Countries may subject the Fund to legal, regulatory, political, currency, security, and economic risks specific to each of the Nordic Countries. The economies of the Nordic Countries are heavily dependent on natural resources and trade amongst one another and with the members of the European Union. Decreasing European imports, new trade regulations, changes in exchange rates, a recession in Europe, or a slowing of economic growth in this region could have an adverse impact on the securities in which the Fund invests. The Nordic Countries have historically maintained generous welfare programs. Such welfare programs can negatively impact the economies of the Nordic Countries by causing increased government spending, higher production costs and lower productivity.

Prepayment Risk. The risk that the issuer of a debt security repays all or a portion of the principal prior to the security's maturity therefore resulting in lower yields to shareholders of the Fund. The Fund may be unable to re-invest the proceeds in an investment with as great a yield.

Recent Market Events Risk. U.S. and international markets have experienced and may continue to experience significant periods of volatility in recent years and months due to a number of economic, political and global macro factors including uncertainty regarding inflation and central banks' interest rate changes, the possibility of a national or global recession, trade tensions, political events, the war between Russia and Ukraine, and armed conflict between Israel and Hamas in the Middle East. As a result of continuing political tensions and armed conflicts, including the war between Ukraine and Russia, the U.S. and the European Union imposed sanctions on certain Russian individuals and companies, including certain financial institutions, and have limited certain exports and imports to and from Russia. The war has contributed to recent market volatility and may continue to do so. Continuing market volatility as a result of recent market conditions or other events may have an adverse effect on the performance of the Fund.

Redemption Risk. The Fund may experience periods of heavy redemptions that could cause the Fund to liquidate its assets at inopportune times or at a loss or depressed value, particularly during periods of declining or illiquid markets.

Rule 144A Securities Risk. The market for Rule 144A Securities typically is less active than the market for publicly-traded securities. Rule 144A Securities carry the risk that the liquidity of these securities may become impaired, making it more difficult for the Fund to sell these securities.

Tax Risk. The Fund's investment strategies, specifically its investments in Derivatives, may subject the Fund to special tax rules, the effect of which may be to accelerate income to the Fund, defer losses to the Fund, cause adjustments in the holding periods of the Fund's securities, convert long-term capital gains into short-term capital gains or convert short-term capital losses into long-term capital losses.

Tracking Risk. The value of the Derivative instruments the Fund uses may not correlate to (or track) the values of the underlying securities. When used for hedging purposes, lack of correlation between price or rate movements of the Derivative instrument and the underlying investment sought to be hedged may prevent the Fund from achieving the intended hedging effect or expose the Fund to risk of loss.

Trade Versus Settlement Risk. The Fund may invest in securities that have varied settlement terms and dates. The longer the amount of time between trade date and settlement date the greater the risk that settlement will occur on a timely basis.

Yankee Bond Risk. Yankee bonds are subject to the same risks as other debt issues, notably credit risk, market risk, currency and liquidity risk. Other risks include adverse political and economic developments; the extent and quality of government regulations of financial markets and institutions; the imposition of foreign withholding taxes; and the expropriation or nationalization of foreign issuers.

Zero-Coupon Bond Risk. While interest payments are not made on such securities, holders of such securities are deemed to have received income annually, notwithstanding that cash may not be received currently. Some of these securities may be subject to substantially greater price fluctuations during periods of changing market interest rates than are comparable securities that pay interest currently.

Performance

When the Fund has been in operation for a full calendar year, performance information will be shown in the Prospectus. Updated performance information will be available on the Fund's website at www.crossingbridgefunds.com or by calling the Fund toll-free at (855) 839-2800.

Management

Investment Adviser. CrossingBridge Advisors, LLC, located at 427 Bedford Road, Suite 220, Pleasantville, New York, 10570, is the Fund's investment adviser.

Portfolio Managers. David K. Sherman, Chief Investment Officer ("CIO") of the Adviser, and Spencer Rolfe, Portfolio Manager of the Adviser, have served as Portfolio Managers of the Fund since its inception in 2024. Chen Ling, Analyst of the Adviser, has served as Assistant Portfolio Manager of the Fund since its inception in 2024.

For important information about the purchase and sale of Fund shares, tax information and financial intermediary compensation, please turn to "Purchase and Sale of Fund Shares, Taxes and Financial Intermediary Compensation" on page 51 of the Prospectus.

Purchase and Sale of Fund Shares, Taxes and Financial Intermediary Compensation

Purchase and Sale of Fund Shares

You may conduct transactions (share purchases or redemptions) via written request by mail (CrossingBridge Funds, c/o U.S. Bank Global Fund Services, P.O. Box 701, Milwaukee, WI 53201-0701), by wire transaction, or by contacting the Funds by telephone at 888-898-2780, on any day the New York Stock Exchange (“NYSE”) is open for trading. Investors who wish to purchase or redeem Fund shares through a financial intermediary should contact the financial intermediary directly. Minimum initial and subsequent investment amounts are shown below.

Share Purchase Amounts	Institutional Class - All Funds	Retail Class - Low Duration High Income Fund and Strategic Income Fund Only
Minimum Initial Investment – All Accounts	\$0 for certain institutional investors as described under “Minimum Investment Amounts”; \$5,000 for all other investors	\$2,500
Minimum Subsequent Investment	None	None
Automatic Investment Plan (Low Duration High Income Fund, Ultra-Short Duration, Responsible Credit, Nordic High Income Bond Fund)	\$100	\$100
Automatic Investment Plan (Strategic Income Fund)	\$1,000	\$100

Tax Information

Each Fund’s distributions will be taxed as ordinary income or long-term capital gains, unless you are investing through a tax-deferred arrangement, such as a 401(k) plan or an IRA. You may be taxed later upon withdrawal of monies from tax-deferred arrangements.

Payments to Broker-Dealers and Other Financial Intermediaries

If you purchase Fund shares through a broker-dealer, or other financial intermediary (such as a bank), the Funds and their related companies may pay the intermediary for the sale of Fund shares and related services. These payments may create conflicts of interest by influencing the broker-dealer or other intermediary and your salesperson to recommend the Funds over other investments. Ask your salesperson or visit your financial intermediary’s website for more information.

Investment Objectives, Principal Investment Strategies, Related Risks and Disclosure of Portfolio Holdings

CrossingBridge Low Duration High Income Fund

Investment Objective

The Low Duration High Income Fund seeks high current income and capital appreciation consistent with the preservation of capital using a low duration mandate.

Principal Investment Strategies

Under normal market conditions, the Low Duration High Income Fund will seek to achieve its investment objective by investing at least 80% of its net assets (plus any borrowings for investment purposes) in a portfolio of income producing fixed income securities. The Adviser will construct a portfolio for the Fund that the Adviser believes has the potential to generate a high level of current income, while maintaining a fixed income portfolio duration of 2.0 or less. The Fund may invest in below investment grade fixed income securities and loans (*i.e.*, “junk” bonds and loans) without limit. The Fund considers below investment grade instruments to include instruments with ratings lower than BBB- by S&P Global Ratings Services (“S&P”) or Baa3 by Moody’s Investors Service, Inc. (“Moody’s”), or that are not rated or considered by the Adviser to be equivalent to high yield instruments. The Fund generally invests in high yield instruments rated CCC or better by S&P or Moody’s, but retains the discretion to invest in lower rated instruments.

The income producing fixed income securities in which the Low Duration High Income Fund invests include bills, notes, bonds, debentures, convertible bonds, bank loans, loan participations, mortgage- and asset-backed securities, Rule 144A fixed income securities, zero coupon securities, syndicated loan assignments, sovereign debt and other evidence of indebtedness issued by U.S. or foreign corporations, governments, government agencies or government instrumentalities, including floating-rate securities (*i.e.*, fixed income securities that provide income that can increase or decrease with interest rates), commercial paper, and preferred stock. The Fund may also invest fixed income-like equity securities such as SPACs that provide interest income and/or the potential for capital appreciation while having an effective maturity. The Fund may also invest up to 35% of its total assets in foreign currency denominated securities. To the extent the Fund invests in other investment companies, including ETFs, the Fund will consider the underlying holdings of such funds for purposes of meeting its policy of investing at least 80% of its net assets in a portfolio of income producing fixed income securities.

The Adviser seeks to preserve the Low Duration High Income Fund’s principal by managing interest rate, default and currency risks. The Adviser manages interest rate risk by maintaining, under normal market conditions, an average fixed income portfolio duration of 2.0 or less by investing primarily in short-term, medium-term and floating rate securities. The Fund typically focuses on instruments that have short durations (*i.e.*, have an expected duration of three years or less from the time of purchase through maturity, call, or corporate action). Duration is a measure of a debt instrument’s price sensitivity to yield. Higher duration indicates debt instruments that are more sensitive to interest rate changes. Bonds with shorter duration are typically less sensitive to interest rate changes. For example, a security with a duration of two would be expected to decrease in price 2% for every 1% rise in interest rates. Duration takes into account a debt instrument’s cash flows over time, including the possibility that a debt instrument might be prepaid by the issuer or redeemed by the holder prior to its stated maturity date. In contrast, maturity measures only the time until final payment is due.

The Low Duration High Income Fund's investments in Derivatives, specifically options, swap agreements and forward currency contracts are generally used to reduce exposure to, or "hedge," against market volatilities and other risks. The Fund may use a Derivative rather than investing directly in an underlying asset class as a low-cost, effective means to gain exposure to an asset class. Derivatives involve the use of leverage. Accordingly, the Fund will maintain long positions in securities available for collateral, consisting of cash, cash equivalents and other liquid securities, to comply with applicable legal requirements. Additionally, for hedging purposes, the Fund may invest up to 25% of its total assets in other investment companies, such as exchange-traded funds. The Fund may also utilize leverage of no more than 33% of the Fund's total assets as part of the portfolio management process.

The Adviser manages default risk by selecting securities of issuers that it believes will pay interest and principal regardless of their credit rating, based upon the Adviser's credit analysis of each issuer. However, the Adviser also selects securities that are in default, subject to bankruptcy or reorganization where the Adviser believes the risks to be consistent with capital preservation, based on the Adviser's analysis of an issuer's liquidation value or post-bankruptcy or post-reorganization value. The Adviser believes that the combination of this fundamental analysis and the short duration characteristics of the securities result in a low volatility, absolute return risk profile. The Adviser manages foreign currency risk by investing primarily in securities denominated in U.S. dollars, such as Yankee bonds, or, where appropriate, by hedging foreign currency exposure.

Due to the nature of securities in which the Low Duration High Income Fund invests, the Fund is expected to have relatively high portfolio turnover compared to other types of funds. The Fund's portfolio turnover rate is expected to exceed 100% per year. To implement its principal investment strategies, the Fund may invest in various types of high yield securities, as discussed in greater detail below.

The Adviser applies a "bottom up" approach in choosing the Low Duration High Income Fund's investments. In other words, the Adviser looks at each fixed income security to determine whether that security is an attractive investment opportunity, consistent with the Fund's investment objective. Fixed income securities are generally held in the Fund's portfolio until maturity or effective maturity. However, a fixed income security may be sold prior to maturity. For example, a fixed income security may be sold prior to maturity in light of a corporate action or announcement affecting the issuer. In addition, a security may be purchased at a discount and/or sold prior to maturity where the Adviser believes it is advantageous to do so.

Fixed Income Securities. The Low Duration High Income Fund intends to invest in fixed income securities that are subject to the risk of default by the issuer with respect to principal and interest payments on its obligations (*i.e.* credit risk) as well as price volatility due to such factors as interest rate sensitivity, market perception of the creditworthiness of the issuer and general market liquidity (*i.e.* market risk). Bonds and similar fixed income securities generally are either secured or unsecured. Although secured bonds entitle holders to an interest in the assets of the issuer that are pledged as collateral for the bonds, the proceeds from the sale of such collateral may not fully repay the creditors in the event of a default. Holders of unsecured bonds represent the most junior position of an issuer's creditors.

Bank Loans. The Low Duration High Income Fund may invest up to 35% of its net assets in bank loans. Bank loans generally take longer to settle than other domestic fixed income securities.

Below Investment Grade Securities. The Low Duration High Income Fund may invest without limit in fixed income instruments which are or are deemed to be the equivalent in terms of quality to securities rated below investment grade by Moody's and S&P and accordingly involve great risk. Such securities are regarded as predominantly speculative with respect to the issuer's capacity to pay interest and repay principal in accordance with the terms of the obligations and involve major risk to adverse conditions. These securities offer higher returns than bonds with higher ratings as compensation for holding an obligation of an issuer perceived to be less creditworthy.

Foreign Securities. The Low Duration High Income Fund may invest up to 35% of the total portfolio in foreign securities, including sovereign debt. Such investments may include direct investments in securities of foreign issuers and investments in depositary receipts (such as ADRs) that represent indirect interests in securities of foreign issuers.

Illiquid Securities. The Low Duration High Income Fund may invest up to 15% of its net assets in illiquid securities.

Investments in Asset-Backed Securities. Asset-backed securities are bonds backed by pools of assets such as motor vehicle installment sale contracts, sale/lease-back obligations in the utility, airline and rail shipping industries, installment loan contracts, leases of various types of real and personal property, receivables from revolving credit (credit card) agreements, corporate receivables or cash flows from operating assets such as royalties and leases. The value of asset-backed securities, like that of traditional fixed-income securities, typically increases when interest rates fall and decreases when interest rates rise. However, asset-backed securities differ from traditional fixed income securities because of their potential for prepayment. The value of asset-backed securities may also be affected by the creditworthiness of the servicing agent for the pool, the originator of the loans or receivables, or the financial institution(s) providing the credit support. In addition, asset-backed securities are not backed by any governmental agency.

Investments in Mortgage-Backed Securities. Mortgage-backed securities are securities that directly or indirectly represent a participation in, or are secured by and payable from, mortgage loans secured by real property. There currently are three basic types of mortgage-backed securities:

1. those issued or guaranteed by the U.S. Government or one of its agencies or instrumentalities, such as GNMA or "Ginnie Mae" (Government National Mortgage Association), FNMA or "Fannie Mae" (Federal National Mortgage Association) and FHLMC or "Freddie Mac" (Federal Home Loan Mortgage Corporation);
2. those issued by private issuers that represent an interest in or are collateralized by mortgage-backed securities issued or guaranteed by the U.S. Government or one of its agencies or instrumentalities; and,
3. those issued by private issuers that represent an interest in or are collateralized by whole mortgage loans or mortgage-backed securities without a government guarantee but that usually have some form of private credit enhancement.

The yield characteristics of mortgage-backed securities differ from traditional debt securities. Among the major differences are that interest and principal payments are made more frequently, usually monthly, and that principal may be prepaid at any time because the underlying mortgage loans generally may be prepaid at any time. The rate of pre-payments on underlying mortgages will affect the price and volatility of a mortgage-backed security, and may have the effect of shortening or extending the effective duration

of the mortgage-backed security relative to what was anticipated at the time of purchase. To the extent that unanticipated rates of pre-payment on underlying mortgages increase the effective duration of a mortgage-backed security, the volatility of such mortgage-backed security can be expected to increase.

Other Information about the Low Duration High Income Fund and its Non-Principal Investment Strategies

Short Sales. As a non-principal investment strategy, the Low Duration High Income Fund may engage in short selling of securities. Selling securities short involves selling securities the seller (*e.g.*, the Fund) does not own (but has borrowed) in anticipation of a decline in the market price of such securities. To deliver the securities to the buyer, the seller must arrange through a broker to borrow the securities and, in so doing, the seller becomes obligated to replace the securities borrowed at their market price at the time of the replacement. In a short sale, the proceeds the seller receives from the sale may be retained by the broker until the seller replaces the borrowed securities. The seller may have to pay a premium to borrow the securities and must pay any dividends or interest payable on the securities until they are replaced.

CrossingBridge Ultra-Short Duration Fund

Investment Objective

The Ultra-Short Duration Fund seeks to offer a higher yield than cash instruments while maintaining a low duration.

Principal Investment Strategies

The Ultra-Short Duration Fund seeks to offer a higher yield than cash instruments while maintaining a low duration by investing primarily in fixed income securities consistent with capital preservation. The Fund defines fixed income securities to include: bills, notes, bonds, debentures, convertible bonds, loan participations, syndicated loan assignments, mortgage- and asset-backed securities, Rule 144A fixed income securities, zero coupon securities, sovereign debt and other evidence of indebtedness issued by U.S. or foreign corporations, governments, government agencies or government instrumentalities, including floating-rate securities, preferred stock and fixed income-like equities. Convertible bonds, preferred stocks, and fixed income-like equities (*e.g.*, SPACs) provide interest income and/or the potential for capital appreciation while having an effective maturity. Floating-rate securities provide interest income that can increase or decrease with interest rates. The Fund invests in individual fixed income securities without restriction as to issuer credit quality, capitalization or security maturity. Though the Fund can invest in securities domiciled in foreign countries and denominated in foreign currencies, the Fund invests primarily in securities denominated in U.S. dollars issued by issuers domiciled in developed markets. The Fund may invest up to 100% of its assets in lower-quality fixed income securities — commonly known as “high yield” or “junk” bonds. Junk bonds are generally rated lower than Baa3 by Moody’s or lower than BBB- by S&P. The Adviser believes these investments are consistent with the preservation of capital. The Fund may invest in companies that are in default, subject to bankruptcy or reorganization.

The Adviser seeks to manage interest rate, default and currency risks. The Adviser manages interest rate risk by maintaining, under normal market conditions, an average portfolio duration of 1.0 or less by investing in short-term, medium-term and floating rate securities. The stated maturity for a fixed income security may be longer than its expected maturity used for the portfolio duration calculation. The stated maturity may differ from the expected maturity as a result of market conditions or corporate actions (such as a change of control ‘put’ provision or corporate redemption feature). Duration is a measure of

sensitivity of a security's price to changes in interest rates. For example, a security with a duration of 1.0 would be expected to decrease in price 1% for every 1% rise in interest rates (the inverse is true as well).

The Adviser manages default risk by selecting securities of issuers that it believes will pay interest and principal regardless of their credit rating, based upon the Adviser's credit analysis of each issuer. The Adviser may also select securities that are in default, subject to bankruptcy or reorganization where the Adviser believes the risks to be consistent with capital preservation, based on the Adviser's analysis of an issuer's liquidation value or post-bankruptcy or post-reorganization value.

The Adviser manages foreign currency risk by investing primarily in securities denominated in U.S. dollars, such as Yankee bonds. If the Ultra-Short Duration Fund were to invest in foreign currency denominated securities, the Fund restricts such activity to less than 35% of the Fund's total assets. When deemed appropriate, the Adviser may hedge the foreign currency exposure typically, and primarily, with forward currency contracts. A forward currency contract is an obligation to purchase or sell a specific currency at a future date, which may be any fixed number of days from the date of the contract agreed upon by the parties.

The Adviser applies a "bottom up" approach in selecting investments for the Ultra-Short Duration Fund. The Adviser looks at each security to determine whether that security is an attractive investment opportunity, consistent with the Fund's investment objective. The Adviser may choose to sell securities as it deems appropriate. For example, the Adviser monitors Fund investments for both market movements as well as for changes in operations and/or credit quality and investments will be sold if they meet price targets or if the Adviser's initial investment thesis has changed. To the extent it is determined that a position is deteriorating with uncertainty of recovery, the Adviser will take proactive steps to limit losses.

Due to the nature of securities in which the Ultra-Short Duration Fund invests, the Fund is expected to have relatively high portfolio turnover compared to other types of funds.

Fixed Income Securities. The Ultra-Short Duration Fund intends to invest primarily in fixed income securities. Such securities are subject to the risk of default by the issuer with respect to principal and interest payments on its obligations (*i.e.* credit risk) as well as price volatility due to such factors as interest rate sensitivity, market perception of the creditworthiness of the issuer and general market liquidity (*i.e.* market risk). Bonds and similar fixed income securities generally are either secured or unsecured. Although secured bonds entitle holders to an interest in the assets of the issuer that are pledged as collateral for the bonds, the proceeds from the sale of such collateral may not fully repay the creditors in the event of a default. Holders of unsecured bonds represent the most junior position of an issuer's creditors.

Bank Loans. The Ultra-Short Duration Fund may invest up to 35% of its net assets in bank loans. Bank loans generally take longer to settle than other domestic fixed income securities.

Below Investment Grade Securities. The Ultra-Short Duration Fund may invest without limitation in fixed income instruments which are or are deemed to be the equivalent in terms of quality to securities rated below investment grade by nationally recognized statistical rating agencies and accordingly involve greater risk. These securities have a higher risk of default. Such securities are regarded as predominantly speculative with respect to the issuer's capacity to pay interest and repay principal in accordance with the terms of the obligations and involve major risk to adverse conditions.

Foreign Securities. The Ultra-Short Duration Fund may invest up to 35% of its net assets in foreign fixed income securities. Such investments may include direct investments in securities of foreign issuers and investments in depositary receipts (such as ADRs) that represent indirect interests in securities of foreign issuers. The Fund will not invest in the debt of companies located in emerging markets. A company will be deemed to be located in an emerging market for this purpose when both its headquarters and principal place of business are located in an emerging market.

Asset-Backed Securities. The Fund may invest in asset-backed securities that are equipment trust certificates.

Other Information about the Ultra-Short Duration Fund and its Non-Principal Investment Strategies

Illiquid Investments. The Ultra-Short Duration Fund may invest up to 15% of its net assets in illiquid investments. Illiquid investments include any investment that the Fund reasonably expects cannot be sold or disposed of in current market conditions in seven calendar days or less without the sale or dispositions significantly changing the market value of the investment.

Short Sales. As a non-principal strategy, the Ultra-Short Duration Fund may effect short sales of securities. Loans in the aggregate, to cover overdrafts and for investment purposes, may not exceed the maximum amount that the borrower is permitted under the 1940 Act. The Fund may not sell a security short if, as a result of that sale, the current value of securities sold short by the Fund would exceed 15% of the value of the Fund's net assets. However, short sales effected "against the box" to hedge against a decline in the value of a security owned by the Fund are not subject to this 15% limitation.

CrossingBridge Responsible Credit Fund

Investment Objective

The Responsible Credit Fund seeks to preserve capital and attain long-term total return through income and moderate capital appreciation over a credit cycle.

Principal Investment Strategies

The Responsible Credit Fund seeks to achieve its investment objective by investing primarily in fixed income securities while actively managing interest rate and default risks. Under normal circumstances, the Fund invests at least 80% of its net assets (plus the amount of any borrowings for investment purposes) in fixed income securities and other credit-related instruments that meet the Adviser's responsible investing criteria.

Investment decisions for the Responsible Credit Fund are made by the Adviser based on a bottom-up analysis of an issuer's business model, quantitative and qualitative factors, as well as the Adviser's "responsible investing criteria" (*i.e.*, specific exclusionary and inclusionary criteria based on ESG standards). The Adviser utilizes a proprietary matrix to measure an issuer's ESG engagement. The Adviser's proprietary matrix sets a minimum threshold level that must be achieved for an issuer's securities or other instruments to satisfy the Fund's responsible investing criteria. The Adviser sources information relating to its responsible investing criteria from publicly-available resources such as financial filings, presentations, news articles, and management discussions. The Adviser monitors an issuer's conformity to its responsible investing criteria and each holding will be formally reviewed by the Adviser at least annually.

The Adviser believes that ESG industry standards will evolve over time, and such standards will continue to enhance the Adviser's ability to identify and measure behaviors. The Adviser believes that certain products and business practices of an issuer may be detrimental and incompatible with mainstream views of responsible investing. Therefore, certain exclusionary criteria are applied by the Adviser as a first step in determining an individual investment's suitability for the Responsible Credit Fund. Issuers whose business is primarily engaged in one of the following activities will be excluded from the Fund:

- Weapons;
- Tobacco;
- Alcohol and Marijuana (for Recreational Purposes);
- Gambling;
- Pornography/Adult Entertainment;
- Certain Fossil Fuels (including Coal Mining and Fracking Exploration);
- Nuclear Fission (typically Power Plants);
- International Norms Violations; and
- Corporations or Sovereign Entities not adhering to the United Nations Global Compact Principles and the Organization for Economic Co-operation and Development (OECD) Guidelines for Multi-National Enterprises.

The Adviser considers any issuer whose business generates 10% or more of its revenues from one of the activities noted above to be "primarily engaged" in such activities and subject to exclusion. The Adviser may expand the list of exclusionary activities from time to time. The Adviser applies its exclusionary criteria to any investment considered for inclusion in the Responsible Credit Fund's portfolio.

The Adviser believes that applying an exclusionary screen to issuers that are non-conforming to its ESG standards is an important first step, but believes it is also important to integrate those issuers that have a positive ESG impact or ESG mindfulness that meet the Adviser's inclusionary criteria described in the objectives below. The Adviser believes that responsible issuers can reward shareholders while being mindful of their ESG impact. As a responsible investor, the Adviser seeks to invest with issuers providing positive leadership in the pursuit of the following objectives:

Environmental Objectives:

- Reduce the negative operational impact and practices on the environment;
- Reduce the use of scarce resources;
- Reduce carbon emissions; and
- Pursue resource efficiency, sustainability, and innovation.

Social Objectives:

- Treat all constituencies in a proper and ethical manner;
- Address all constituencies in a fair and equitable manner;
- Promote health and well-being for all constituencies;
- Protect sensitive data for all constituencies;
- Market products in a sincere and factual approach;
- Provide employees with development and opportunity in an appropriate workplace; and
- Recognize barriers of underrepresented groups by supporting diversity and inclusion.

Governance Objectives:

- Independent members of an issuers Board that provide checks and balances;
- Diversification of backgrounds, skills, and philosophy among an issuers Board or executive officers;
- Promote transparency and communication;
- Exercise and supports law abidingness externally and from within;
- Develop programs to measure and improve environmental impact and social practices;
- Respect lenders rights and value similarly to shareholders; and
- Advocate ethical standards in operations and dealings with customers, employees, regulators, business partners and the greater community.

At least 80% of the Responsible Credit Fund's assets will be comprised of investments of issuers satisfying the Adviser's minimum threshold for the inclusionary criteria. The Adviser deems governmental securities of G7 countries (Canada, France, Germany, Italy, Japan, the United Kingdom and the United States) to be of the highest ESG quality. Governmental securities of non-G7 countries will be evaluated by the Adviser on a case-by-case basis for inclusion in the Fund's investment portfolio.

The Responsible Credit Fund defines fixed income securities to include: bills, notes, bonds, debentures, convertible bonds, loan participations, mortgage- and asset-backed securities, Rule 144A fixed income securities, zero coupon securities, syndicated loan assignments, sovereign debt and other evidence of indebtedness issued by U.S. or foreign corporations, governments, government agencies or government instrumentalities, including floating-rate securities, commercial paper, preferred stock and fixed income-like equities. Convertible bonds, preferred stocks, and fixed income-like equities (*e.g.* special purpose acquisition companies ("SPACs")) provide interest income and/or the potential for capital appreciation while having an effective maturity. Floating-rate securities provide interest income that can increase or decrease with interest rates. The Fund invests in individual fixed income securities without restriction as to issuer credit quality, capitalization or security maturity. The Fund may invest up to 100% of its assets in lower-quality fixed income securities — commonly known as "high yield" or "junk" bonds. Junk bonds are generally rated lower than Baa3 by Moody's Investors Service ("Moody's") or lower than BBB- by Standard and Poor's Rating Group ("S&P"). The Fund may invest in junk bonds that are in default, subject to bankruptcy or reorganization. High yield bonds have a higher expected rate of default than higher quality bonds.

The Adviser seeks to manage duration, currency, and default risks. Although the Adviser will take macro factors into consideration, the portfolio duration is primarily driven by bottom-up investment opportunities. Under normal market conditions, the Adviser will generally pursue a portfolio duration of 2.0 to 4.0. Duration is a measure of sensitivity of a security's price to changes in interest rates. For example, a security with a duration of 2.0 would be expected to decrease in price 2% for every 1% rise in interest rates (the inverse is true as well).

The Adviser manages default risk by selecting securities of issuers that it believes will pay interest and principal regardless of their credit rating, based upon the Adviser's credit analysis of each issuer. The Adviser may also select securities that are in default, subject to bankruptcy or reorganization where the Adviser believes the risks to be consistent with capital preservation, based on the Adviser's analysis of an issuer's liquidation value or post-bankruptcy or post-reorganization value.

The Adviser manages foreign currency risk by investing primarily in securities denominated in U.S. dollars, such as Yankee bonds. If the Responsible Credit Fund were to invest in foreign currency

denominated securities, the Fund restricts such activity to less than 35% of the Fund's total assets. When deemed appropriate, the Adviser may hedge the foreign currency exposure typically, and primarily, with forward currency contracts. A forward currency contract is an obligation to purchase or sell a specific currency at a future date, which may be any fixed number of days from the date of the contract agreed upon by the parties.

In selecting investments for the Responsible Credit Fund, the Adviser looks at each security to determine whether that security is an attractive investment opportunity, consistent with the Fund's investment objective. The Adviser may choose to sell securities as it deems appropriate. For example, the Adviser monitors Fund investments for both market movements as well as for changes in operations and/or credit quality and investments will be sold if they meet price targets or if the Adviser's initial investment thesis has changed. To the extent it is determined that a position is deteriorating with uncertainty of recovery, the Adviser will take proactive steps to limit losses.

The Responsible Credit Fund is "non-diversified" for purposes of the 1940 Act, which means that the Fund may invest in fewer securities at any one time than a diversified fund. However, the adviser manages the impact of the risk of each investment by a considered analysis of appropriate sizing and portfolio diversification.

Due to the nature of securities in which the Responsible Credit Fund invests, the Fund is expected to have relatively high portfolio turnover compared to other types of funds.

Fixed Income Securities. Under normal circumstances the Responsible Credit Fund intends to invest at least 80% of its net assets (plus the amount of any borrowings for investment purposes) in fixed income securities. Such securities are subject to the risk of default by the issuer with respect to principal and interest payments on its obligations (*i.e.* credit risk) as well as price volatility due to such factors as interest rate sensitivity, market perception of the creditworthiness of the issuer and general market liquidity (*i.e.* market risk). Bonds and similar fixed income securities generally are either secured or unsecured. Although secured bonds entitle holders to an interest in the assets of the issuer that are pledged as collateral for the bonds, the proceeds from the sale of such collateral may not fully repay the creditors in the event of a default. Holders of unsecured bonds are general obligations of the issuer and creditors may have limited recourse to assets.

Below Investment Grade Securities. The Responsible Credit Fund may invest without limitation in fixed income instruments which are or are deemed to be the equivalent in terms of quality to securities rated below investment grade by nationally recognized statistical rating agencies and accordingly involve greater risk. These securities have a higher risk of default. Such securities are regarded as predominantly speculative with respect to the issuer's capacity to pay interest and repay principal in accordance with the terms of the obligations and involve major risk to adverse conditions.

Income Producing Equities. The Responsible Credit Fund may invest up to 35% of its net assets in income producing equities to include preferred stock, liquidating trusts and other securities with a defined maturity, liquidation or put date. These securities include equities with an above average dividend yield, preferred equities and equities that in the Adviser's opinion will distribute assets to shareholders over a certain period of time.

Special Purpose Acquisition Companies. The Responsible Credit Fund may invest in blank check companies, such as SPACs or similar special purpose entities that pool funds to seek potential acquisition opportunities. A SPAC is a publicly-traded company that raises funds from public investors in an initial

public offering (“IPO”) in order to pursue the acquisition of an unspecified company. Unless and until an acquisition meeting the SPAC’s requirements is completed, a SPAC generally invests its assets (less a portion retained to cover expenses) in U.S. Government securities, money market securities and cash; if an acquisition that meets the requirements for the SPAC is not completed within a pre-established period of time, the invested funds are returned to the entity’s shareholders. If an acquisition is proposed, investors have the choice of holding their shares or redeeming them for their pro rata share of the SPAC’s assets. Because SPACs and similar entities have no operating history or ongoing business other than seeking acquisitions, the value of their securities is particularly dependent on the ability of the entity’s management to identify and complete a profitable acquisition. Some SPACs may pursue acquisitions only within certain industries or regions, which may increase the volatility of their securities’ prices. In addition, these securities, which are typically traded in the OTC market, may be considered illiquid and/or be subject to restrictions on resale.

Foreign Securities. The Responsible Credit Fund may invest up to 35% of its net assets in foreign fixed income securities. Such investments may include direct investments in securities of foreign issuers and investments in depositary receipts (such as ADRs) that represent indirect interests in securities of foreign issuers. The Fund will not invest in the debt of companies located in emerging markets. A company will be deemed to be located in an emerging market for this purpose when both its headquarters and principal place of business are located in an emerging market.

Convertible Bonds. The Responsible Credit Fund may invest up to 25% of its net assets in convertible bonds.

Distressed Securities. The Responsible Credit Fund may invest up to 25% of its net assets in securities of companies that are experiencing significant financial or business difficulties, including companies involved in bankruptcy or other reorganization and liquidation proceedings. Although such investments may result in significant returns to the Fund, they involve a substantial degree of risk.

Bank Loans. The Responsible Credit Fund may invest up to 35% of its net assets in bank loans. Bank loans generally take longer to settle than other domestic fixed income securities.

Asset-Backed Securities. The Responsible Credit Fund may invest in asset-backed securities.

Other Information about the Responsible Credit Fund and its Non-Principal Investment Strategies

Collateralized Loan Obligations and Privately Issued Securities. As a non-principal strategy, the Responsible Credit Fund may also invest in collateralized loan obligations (“CLOs”) and privately issued securities.

Illiquid Investments. The Responsible Credit Fund may invest up to 15% of its net assets in illiquid investments. Illiquid investments include any investment that the Fund reasonably expects cannot be sold or disposed of in current market conditions in seven calendar days or less without the sale or dispositions significantly changing the market value of the investment.

Short Sales. As a non-principal strategy, the Responsible Credit Fund may invest up to 15% of the value of its total assets to effect short sales of securities. The Fund may not sell a security short if, as a result of that sale, the current value of securities sold short by the Fund would exceed 15% of the value of the Fund’s net assets. However, short sales effected “against the box” to hedge against a decline in the value of a security owned by the Fund are not subject to this 15% limitation.

RiverPark Strategic Income Fund

Investment Objective

The Strategic Income Fund seeks high current income and capital appreciation consistent with the preservation of capital.

Principal Investment Strategies

The Strategic Income Fund seeks to achieve its investment objective by investing in Securities that the Adviser deems appropriate for the Fund's investment objective. The Fund will invest at least 80% of its net assets (plus the amount of any borrowings for investment purposes) in fixed income securities and income producing equities.

The Fund may invest up to 100% of its assets in fixed income securities. The fixed income securities in which the Fund will invest include fixed income securities of various credit qualities (*i.e.*, investment grade and below investment grade (*i.e.*, junk bonds) and maturities (*i.e.*, long-term, intermediate and short-term). The Fund may invest up to 100% of its assets in below investment grade fixed income securities. The Fund will invest in individual fixed income securities without restriction as to duration. The Adviser does not rely on independent rating agencies to determine the risk associated with an investment. Rather, it relies on its own research and familiarity with an issue to make investment decisions. The Fund will invest across various maturities (*i.e.*, long-term, intermediate and short-term). The Adviser will analyze the expected yield to maturity of a potential investment to determine if the yield, in the Adviser's opinion, fairly compensates the Fund for the risks associated with investing in longer dated maturities. The income producing equities that the Fund may invest in include those that either have a substantial dividend yield or the Adviser believes the issuing company will distribute significant assets over a certain period of time.

The Strategic Income Fund will invest primarily in U.S. Denominated securities but may invest up to 35% of its assets in foreign fixed income securities including sovereign debt and foreign currency denominated securities. The Fund may hedge the foreign currency exposure by investing in forward currency contracts. A forward currency contract is an obligation to purchase or sell a specific currency at a future date, which may be any fixed number of days from the date of the contract agreed upon by the parties. The Fund may also invest up to 35% of its assets in income producing equities. The Fund's investments will be diversified across individual issuers and industries. The Fund, however, will invest without restriction as to issuer credit quality, capitalization, or security maturity. The Adviser believes there are periods of time where high yield Securities have a superior risk return trade off than other times and will invest a greater percentage of the Fund in high yield Securities when it determines it is advantageous to do so. Similarly, there are periods of time, where the risks of rising interest rates are higher than normal, and the Fund will likely invest a larger percentage of its assets in shorter dated fixed income instruments to mitigate some of those risks.

Although the Adviser will take macro factors (*i.e.*, the effect of interest rates on the Strategic Income Fund's investments) into consideration, the Fund's portfolio construction is primarily driven by bottom-up investment analysis. This means that the Adviser looks at Securities on an individual basis to determine if a Security is an attractive investment opportunity and if it is consistent with the Fund's investment objective. The Fund's buy and sell decisions are driven by the Adviser's investment process. The Fund may hold Securities until maturity but will sell a Security when the Adviser determines a Security is no longer an attractive investment opportunity consistent with the Fund's investment objective, when a more attractive investment opportunity becomes available or to satisfy redemption requests. The Fund may invest up to 15% of the value of its total assets to effect short sales of securities,

including up to 15% in short sales of ETFs. In addition, a Security may be purchased at a premium or discount and/or sold prior to maturity where the Adviser believes it is advantageous to do so. Other than for temporary purposes, the Fund will not borrow in order to gain leverage.

The Strategic Income Fund may engage in active trading of its portfolio, resulting in a high turnover rate.

There is no assurance that the Strategic Income Fund will achieve its investment objectives. In pursuing its investment objective, the Fund will invest in the following types of Securities:

Fixed Income Securities. The Strategic Income Fund may invest up to 100% of its assets in fixed income securities. There is no limitation on the maturities of fixed income securities in which the Fund invests. Securities having longer maturities generally involve greater risk of fluctuations in value resulting from changes in interest rates.

Below Investment Grade Securities. The Strategic Income Fund may invest without limitation in fixed-income instruments which are or are deemed to be the equivalent in terms of quality to securities rated below investment grade by nationally recognized statistical rating agencies and accordingly involve greater risk. These securities have a higher risk of default. Such securities are regarded as predominantly speculative with respect to the issuer's capacity to pay interest and repay principal in accordance with the terms of the obligations and involve major risk to adverse conditions.

Income Producing Equities. The Strategic Income Fund may invest up to 35% of its net assets in income producing equities to include preferred stock, liquidating trusts and other securities with a defined maturity, liquidation or put date.

Special Purpose Acquisition Companies. The Strategic Income Fund may invest in blank check companies, such as SPACs or similar special purpose entities that pool funds to seek potential acquisition opportunities. A SPAC is a publicly-traded company that raises funds from public investors in an initial public offering ("IPO") in order to pursue the acquisition of an unspecified company. Unless and until an acquisition meeting the SPAC's requirements is completed, a SPAC generally invests its assets (less a portion retained to cover expenses) in U.S. Government securities, money market securities and cash; if an acquisition that meets the requirements for the SPAC is not completed within a pre-established period of time, the invested funds are returned to the entity's shareholders. If an acquisition is proposed, investors have the choice of holding their shares or redeeming them for their pro rata share of the SPAC's assets. Because SPACs and similar entities have no operating history or ongoing business other than seeking acquisitions, the value of their securities is particularly dependent on the ability of the entity's management to identify and complete a profitable acquisition. Some SPACs may pursue acquisitions only within certain industries or regions, which may increase the volatility of their securities' prices. In addition, these securities, which are typically traded in the OTC market, may be considered illiquid and/or be subject to restrictions on resale.

Foreign Securities. The Strategic Income Fund may invest up to 35% of its net assets in foreign fixed income securities. Such investments may include direct investments in securities of foreign issuers and investments in depositary receipts (such as ADRs) that represent indirect interests in securities of foreign issuers. The Fund will not invest in the debt of companies located in emerging markets. A company will be deemed to be located in an emerging market for this purpose when both its headquarters and principal place of business are located in an emerging market. Investments in non-US companies include American Depositary Receipts ("ADRs") and similar investments, including European Depositary Receipts ("EDRs") and Global Depositary Receipts ("GDRs"), dollar-denominated foreign securities and securities

purchased directly on foreign exchanges. ADRs, EDRs and GDRs are depositary receipts for non-US company stocks that are not themselves listed on a U.S. exchange, and are issued by a bank and held in trust at that bank, and that entitle the owner of such depositary receipts to any capital gains or dividends from the foreign company stocks underlying the depositary receipts. ADRs are U.S. dollar denominated. EDRs and GDRs are typically U.S. dollar denominated but may be denominated in a foreign currency.

Convertible Bonds. The Strategic Income Fund may invest up to 25% of its net assets in convertible bonds.

Distressed Securities. The Strategic Income Fund may invest up to 25% of its net assets in securities of companies that are experiencing significant financial or business difficulties, including companies involved in bankruptcy or other reorganization and liquidation proceedings. Although such investments may result in significant returns to the Fund, they involve a substantial degree of risk.

Bank Loans. The Strategic Income Fund may invest up to 35% of its net assets in bank loans. Bank loans generally take longer to settle than other domestic fixed income securities.

Asset-Backed Securities. The Strategic Income Fund may invest up to 15% of its net assets in asset-backed securities including equipment trust certificates.

Mortgage-Backed Securities. The Strategic Income Fund may invest up to 15% of its net assets in mortgage-backed securities.

Short Sales. The Strategic Income Fund may invest up to 15% of the value of its total assets to effect short sales of securities. The Fund may not sell a security short if, as a result of that sale, the current value of securities sold short by the Fund would exceed 15% of the value of the Fund's net assets. However, short sales effective to hedge against a decline in the value of a security owned by the Fund are not subject to this 15% limitation.

Other Information about the Strategic Income Fund and its Non-Principal Investment Strategies

Illiquid Investments. The Strategic Income Fund may invest up to 15% of its net assets in illiquid investments. Illiquid investments include any investment that the Fund reasonably expects cannot be sold or disposed of in current market conditions in seven calendar days or less without the sale or dispositions significantly changing the market value of the investment.

CrossingBridge Nordic High Income Fund

Investment Objective

The Nordic High Income Bond Fund seeks high current income and capital appreciation consistent with the preservation of capital.

Principal Investment Strategies

Under normal market conditions, the Nordic High Income Bond Fund seeks to achieve its investment objective by investing at least 80% of its net assets, (plus the amount of any borrowings for investment purposes) in income producing bonds that are issued, originated, or underwritten out of the Nordic Countries. The Adviser will construct the Fund's portfolio by investing in corporate bonds, including, but not limited to, fixed or floating rate bonds, zero-coupon bonds and convertible bonds, and bonds issued by governments, government agencies or government instrumentalities of the Nordic Countries. The Fund may invest in below investment grade bonds without limit. The Fund considers below investment

grade bonds to include bonds with ratings lower than BBB- by S&P or Baa3 by Moody's, or that are not rated or considered by the Adviser to be equivalent to high yield instruments. The Fund generally invests in high yield bonds rated CCC or better by S&P or Moody's, but retains the discretion to invest in lower rated instruments.

The Nordic High Income Bond Fund will invest in both bonds that are secured by the assets of the issuer and unsecured bonds. The Fund may invest in Rule 144A Securities and may also invest up to 100% of its total assets in foreign currency denominated securities.

The Adviser seeks to manage default and currency risks.

The Adviser seeks to manage default risk by selecting securities of issuers that it believes will pay interest and principal regardless of their credit rating, based upon the Adviser's credit analysis of each issuer. However, the Adviser also selects securities that are in default, subject to bankruptcy or reorganization where the Adviser believes the risks to be consistent with capital preservation, based on the Adviser's analysis of an issuer's liquidation value or post-bankruptcy or post-reorganization value. The Adviser believes that the combination of this fundamental analysis and the short duration characteristics of the securities result in a low volatility, absolute return risk profile.

The Adviser seeks to manage currency risk, when appropriate, by hedging foreign currency exposure typically, and primarily, with forward currency contracts. A forward currency contract is an obligation to purchase or sell a specific currency at a future date, which may be any fixed number of days from the date of the contract agreed upon by the parties. The Fund may also manage currency risk by investing in bonds denominated in U.S. dollars, such as Yankee bonds.

The Nordic High Income Bond Fund's investments in Derivatives, specifically options, swap agreements and forward currency contracts are generally used to reduce exposure to, or "hedge," against market volatilities and other risks. The Fund may use a Derivative rather than investing directly in an underlying asset class as a low-cost, effective means to gain exposure to an asset class. Derivatives involve the use of leverage. Accordingly, the Fund will maintain long positions in securities available for collateral, consisting of cash, cash equivalents and other liquid securities, to comply with applicable legal requirements. The Fund may also utilize leverage of no more than 33% of the Fund's total assets as part of the portfolio management process. The Fund will count the notional value of investments in derivative instruments towards compliance with the 80% investment policy discussed above, except that investments in derivative instruments for the purpose of hedging foreign currency risk will not be counted towards the 80% investment policy.

The Adviser applies a "bottom up" approach in choosing the Nordic High Income Bond Fund's investments. In other words, the Adviser looks at each bond to determine whether that security is an attractive investment opportunity, consistent with the Fund's investment objective. Bonds are generally held in the Fund's portfolio until maturity or effective maturity. However, a bond may be sold prior to maturity. For example, a bond may be sold prior to maturity in light of a corporate action or announcement affecting the issuer. In addition, a security may be purchased at a discount and/or sold prior to maturity where the Adviser believes it is advantageous to do so.

Fixed Income Securities. The Nordic High Income Bond Fund intends to invest in bonds that are subject to the risk of default by the issuer with respect to principal and interest payments on its obligations (*i.e.* credit risk) as well as price volatility due to such factors as interest rate sensitivity, market perception of the creditworthiness of the issuer and general market liquidity (*i.e.* market risk). Bonds generally are

either secured or unsecured. Although secured bonds entitle holders to an interest in the assets of the issuer that are pledged as collateral for the bonds, the proceeds from the sale of such collateral may not fully repay the creditors in the event of a default. Holders of unsecured bonds represent the most junior position of an issuer's creditors.

Below Investment Grade Securities. The Nordic High Income Bond Fund may invest without limit in bonds which are or are deemed to be the equivalent in terms of quality to securities rated below investment grade by Moody's and S&P and accordingly involve great risk. Such securities are regarded as predominantly speculative with respect to the issuer's capacity to pay interest and repay principal in accordance with the terms of the obligations and involve major risk to adverse conditions. These securities offer higher returns than bonds with higher ratings as compensation for holding an obligation of an issuer perceived to be less creditworthy.

Foreign Securities. The Nordic High Income Bond Fund may invest up to 100% of the total portfolio in foreign securities, including sovereign debt. Such investments may include direct investments in securities of foreign issuers and investments in depositary receipts (such as ADRs) that represent indirect interests in securities of foreign issuers.

Illiquid Securities. The Nordic High Income Bond Fund may invest up to 15% of its net assets in illiquid securities.

Other Information about the Nordic High Income Bond Fund and its Non-Principal Investment Strategies

Short Sales. As a non-principal investment strategy, the Nordic High Income Bond Fund may engage in short selling of securities. Selling securities short involves selling securities the seller (*e.g.*, the Fund) does not own (but has borrowed) in anticipation of a decline in the market price of such securities. To deliver the securities to the buyer, the seller must arrange through a broker to borrow the securities and, in so doing, the seller becomes obligated to replace the securities borrowed at their market price at the time of the replacement. In a short sale, the proceeds the seller receives from the sale may be retained by the broker until the seller replaces the borrowed securities. The seller may have to pay a premium to borrow the securities and must pay any dividends or interest payable on the securities until they are replaced.

General Investment Policies of the Funds

Temporary or Defensive Positions. During periods of adverse market, political or economic conditions, or when, in the opinion of the Adviser, certain abnormal or extraordinary circumstances exist, including periodic episodes where certain issuers call a portion of a Fund's portfolio and the Adviser is unable to locate eligible portfolio securities in which to invest, the Fund may, as a temporary or defensive measure, invest all or a substantial portion of its assets in high quality, fixed income securities, money market instruments, or cash or cash equivalents, including investment grade short-term obligations. Investment grade obligations include securities issued or guaranteed by the U.S. Government, its agencies and instrumentalities, as well as securities rated in one of the four highest rating categories by at least two NRSROs rating that security. To the extent that a Fund invests in money market funds for its cash positions, there will be some duplication of expenses because the Fund will bear its pro rata portion of such money market funds' management fees and operational expenses. A Fund will not be pursuing its investment objectives in these circumstances.

Change in Investment Objective. Each Fund’s investment objective may be changed without the approval of the Fund’s shareholders upon 60 days’ prior written notice to shareholders.

The Low Duration High Income Fund may not make any change in its investment policy of investing at least 80% of net assets (plus any borrowing for investment purposes) in a portfolio of income producing fixed income securities without first changing the Fund’s name and providing shareholders with at least 60 days’ prior written notice.

The Responsible Credit Fund may not make any change in its investment policy of investing at least 80% of net assets in fixed income securities and other credit-related instruments that meet the Adviser’s responsible investing criteria (as defined herein), without first changing the Fund’s name and providing shareholders with at least 60 days’ prior written notice.

The Strategic Income Fund may not make any change to its investment policy of investing at least 80% of its net assets (plus the amount of any borrowings for investment purposes) in fixed income securities and income producing equities without first providing shareholders with at least 60 days’ prior written notice of the change to the Fund’s 80% policy and any accompanying changes to the Fund’s name, if applicable.

The Nordic High Income Fund may not make any change to its investment policy of investing at least 80% of its net assets (plus any borrowings for investment purposes) in income producing bonds issued, originated, or underwritten out of the Nordic Countries without first providing shareholders with at least 60 days’ prior written notice of the change to the Fund’s 80% policy and any accompanying changes to the Fund’s name, if applicable.

Principal Risks of Investing in the Funds

Before investing in a Fund, you should carefully consider your own investment goals, the amount of time you are willing to leave your money invested, and the amount of risk you are willing to take. Remember, in addition to possibly not achieving your investment goals, **you could lose all or a portion of your investment in a Fund.** The Funds’ principal risks are presented in alphabetical order to facilitate finding particular risks and comparing them with other funds. Each risk summarized below is considered a “principal risk” of investing in the Funds, regardless of the order in which it appears. Each Fund (except as specifically noted herein) is subject to the following risks:

Asset-Backed and Mortgage-Backed Securities Risk. Asset-backed and mortgage-backed securities are subject to risk of prepayment. This is more likely to occur when interest rates fall because many borrowers refinance mortgages to take advantage of more favorable rates. Prepayments on mortgage-backed securities are also affected by other factors, such as the volume of home sales. The Funds' yield will be reduced if cash from prepaid securities is reinvested in securities with lower interest rates. The risk of prepayment may also decrease the value of mortgage-backed securities. Asset-backed securities may have a higher level of default and recovery risk than mortgage-backed securities. However, both of these types of securities may decline in value because of mortgage foreclosures or defaults on the underlying obligations. Enforcing rights against the underlying assets or collateral may be difficult, or the underlying assets or collateral may be insufficient if the issuer defaults. The values of certain types of mortgage-backed securities, such as inverse floaters and interest-only and principal-only securities, may be extremely sensitive to changes in interest rates and prepayment rates. Asset-backed and mortgage-backed securities are also subject to extension risk, the risk that rising interest rates could cause prepayments to decrease, extending the life of asset-backed and mortgage-backed securities with lower payment rates. Mortgage-backed securities ("MBS") generally are classified as either commercial MBS ("CMBS") or residential MBS ("RMBS"), each of which are subject to certain specific risks. RMBS are subject to the risks generally associated with fixed income securities and mortgage-backed securities. Delinquencies and defaults by borrowers in payments on the underlying mortgages, and the related losses, are affected by general economic conditions, the borrower's equity in the mortgaged property and the borrower's financial circumstances. The market for CMBS developed more recently and is relatively small compared to the market for RMBS. CMBS may lack standardized terms, have shorter maturities than residential mortgage loans and may provide for payment of all or substantially all of the principal only at maturity rather than regular amortization of principal. Adverse changes in economic conditions and circumstances are more likely to have an adverse impact on MBS secured by loans on commercial properties than on those secured by loans on residential properties.

Bank Loans Risk. The Funds may invest in bank loans. The secondary market for bank loans is a private, unregulated inter-dealer or inter-bank resale market. Bank loans are usually rated below investment grade. The market for bank loans may be subject to irregular trading activity, wide bid/ask spreads and extended trade settlement periods. Purchases and sales of loans are generally subject to contractual restrictions that must be satisfied before a loan can be bought or sold. These restrictions may impede a Fund's ability to buy or sell loans and may negatively impact the transaction price. It may take longer than seven days for transactions in loans to settle. The Fund may hold cash, sell investments or temporarily borrow from banks or other lenders to meet short-term liquidity needs due to the extended loan settlement process, such as to satisfy redemption requests from Fund shareholders.

Investments in bank loans are typically in the form of an assignment or participation. Investors in a loan participation assume the credit risk associated with the borrower and may assume the credit risk associated with an interposed financial intermediary. Accordingly, if a lead lender becomes insolvent or a loan is foreclosed, the Funds could experience delays in receiving payments or suffer a loss. In an assignment, the Funds effectively become a lender under the loan agreement with the same rights and obligations as the assigning bank or other financial intermediary. Accordingly, if the loan is foreclosed, the Funds could become part owner of any collateral, and would bear the costs and liabilities associated with owning and disposing of the collateral. Due to their lower place in the borrower's capital structure and possible unsecured status, junior loans involve a higher degree of overall risk than senior loans of the same borrower. In addition, the floating rate feature of loans means that bank loans will not generally experience capital appreciation in a declining interest rate environment. Declines in interest rates may also increase prepayments of debt obligations and require the Fund to invest assets at lower yields.

A significant portion of bank loans may be “covenant lite” loans that may contain fewer or less restrictive constraints on the borrower and fewer or no financial maintenance covenants and restrictions. A covenant lite loan typically contains fewer clauses which allow an investor to proactively enforce financial covenants. Covenant lite loans also generally provide fewer investor protections if certain criteria are breached. The Funds may experience losses or delays in enforcing their rights on its holdings of covenant lite loans.

U.S. federal securities laws afford certain protections against fraud and misrepresentation in connection with the offering or sale of a security, as well as against manipulation of trading markets for securities. The typical practice of a lender in relying exclusively or primarily on reports from the borrower may involve the risk of fraud, misrepresentation, or market manipulation by the borrower. It is unclear whether U.S. federal securities law protections are available to an investment in a loan. In certain circumstances, loans may not be deemed to be securities, and in the event of fraud or misrepresentation by a borrower, lenders may not have the protection of the anti-fraud provisions of the federal securities laws. However, contractual provisions in the loan documents may offer some protections, and lenders may also avail themselves of common-law fraud protections under applicable state law.

Below Investment Grade Securities Risks (commonly referred to as “junk” bonds). Fixed income instruments that are or are deemed to be the equivalent in terms of quality to securities rated below investment grade by NRSROs are regarded as predominantly speculative with respect to the issuer’s capacity to pay interest and repay principal in accordance with the terms of the obligations and involve major risk to adverse conditions. These securities offer higher returns than bonds with higher ratings as compensation for holding an obligation of an issuer perceived to be less creditworthy. The market prices of such securities are also subject to abrupt and erratic market movements and above-average price volatility, and the spread between the bid and asked prices of such securities may be greater than those prevailing in other securities markets. Changes in economic conditions or developments regarding issuers of non-investment grade debt securities are more likely to cause price volatility and weaken the capacity of such issuers to make principal and interest payments than is the case for higher grade debt securities. In addition, the market for lower grade debt securities may be thinner and less active than for higher grade debt securities.

Convertible Securities Risk. A convertible security is a fixed income security (a debt instrument or a preferred stock) that may be converted at a stated price within a specified period of time into a certain quantity of the common stock of the same or a different issuer. The market value of a convertible security will perform the same as a regular fixed income security; that is, if market interest rates rise, the value of the convertible security falls. Convertible securities are senior to common stock in an issuer’s capital structure, but are subordinated to any senior debt securities. As a result, in the event of a liquidation of the issuing company, holders of convertible securities generally would be paid after the company’s creditors but before the company’s common shareholders. Consequently, an issuer’s convertible securities generally may be viewed as having more risk than its debt securities but less risk than its common stock. While providing a fixed income stream (generally higher in yield than the income derivable from common stock but lower than that afforded by a similar non-convertible security), a convertible security also gives an investor the opportunity, through its conversion feature, to participate in the capital appreciation of the issuing company depending upon a market price advance in the convertible security’s underlying common stock. If a convertible security held by a Fund is called for redemption, the Fund will be required to surrender the security for redemption, convert it into the issuing company’s common stock or cash at a time that may be unfavorable to the Fund.

Corporate Events Risks. Corporate event risk is the risk that a corporate transaction or opportunity will not occur, or a natural disaster or regulatory change will cause an abrupt downgrade in a corporate bond which may lower a Fund's performance.

Counterparty Risk. Counterparty risk arises upon entering into borrowing arrangements or derivative transactions and is the risk from the potential inability or unwillingness of counterparties to meet the terms of their contracts. If the counterparty defaults, the Funds' losses will generally consist of the net amount of contractual payments that it has not yet received, though the Funds' maximum risk due to counterparty credit risk could extend to the notional amount of the contract should the underlying asset on which the contract is written have no offsetting market value. The "notional value" is generally defined as the value of the Derivative's underlying assets at the spot price. The Funds could be exposed to increased leverage risk should it finance Derivative transactions without holding cash or cash equivalents equal to the notional value of its Derivative positions.

Credit-Related Instruments Risk. Credit-Related Instruments held by a Fund may be subject to interest rate risk, call risk, prepayment and extension risk, credit risk, and liquidity risk, which are more fully described below.

Call Risk. During periods of declining interest rates, a bond issuer may "call," or repay, its high yielding bonds before their maturity dates. A Fund would then be forced to invest the unanticipated proceeds at lower interest rates, resulting in a decline in its income.

Credit Risk. Credit-Related Instruments are generally subject to the risk that the issuer may be unable to make principal and interest payments when they are due. There is also the risk that the investments could lose value because of a loss of confidence in the ability of the borrower to pay back debt. Lower rated Credit-Related Instruments involve greater credit risk, including the possibility of default or bankruptcy.

Interest Rate Risk. Credit-Related Instruments are subject to the risk that the investments could lose value because of interest rate changes. For example, bonds tend to decrease in value if interest rates rise. Credit-Related Instruments with longer maturities sometimes offer higher yields, but are subject to greater price shifts as a result of interest rate changes than fixed income investments with shorter maturities.

Liquidity Risk. Trading opportunities are more limited for Credit-Related Instruments that have not received any credit ratings, have received ratings below investment grade or are not widely held. These features make it more difficult to sell or buy an investment at a favorable price or time. Consequently, a Fund may have to accept a lower price to sell an investment, sell other securities to raise cash or give up an investment opportunity, any of which could have a negative effect on its performance. Infrequent trading of securities may also lead to an increase in their price volatility. Liquidity risk also refers to the possibility that a Fund may not be able to sell an investment or close out an investment contract when it wants to. If this happens, a Fund will be required to hold the investment or keep the position open, and it could incur losses.

Prepayment and Extension Risk. Many types of Credit-Related Instruments are subject to prepayment risk. Prepayment occurs when the issuer of a fixed income investment can repay principal prior to the security's maturity. Credit-Related Instruments subject to prepayment can offer less potential for gains during a declining interest rate environment and similar or greater potential for loss in a rising interest rate environment. In addition, the potential impact of prepayment features on the price of a fixed income security can be difficult to predict and result in greater volatility. On the

other hand, rising interest rates could cause prepayments of the obligations to decrease, extending the life of mortgage- and asset-backed securities with lower payment rates. This is known as extension risk and may increase a Fund's sensitivity to rising rates and its potential for price declines.

Credit Risk. Debt portfolios are subject to credit risk. Credit risk refers to the likelihood that an issuer will default in the payment of principal and/or interest on an instrument. Financial strength and solvency of an issuer are the primary factors influencing credit risk. In addition, lack or inadequacy of collateral or credit enhancement for a debt instrument may affect its credit risk. Credit risk may change over the life of an instrument, and debt obligations which are rated by rating agencies are often reviewed and may be subject to downgrade.

Cybersecurity Risk. With the widespread use of technologies such as the Internet to conduct business, the Funds are susceptible to operational, information security, and related risks. In general, cyber incidents can result from deliberate attacks or unintentional events. Cyber attacks include, but are not limited to, gaining unauthorized access to digital systems (e.g., through "hacking" or malicious software coding) for purposes of misappropriating assets or sensitive information, corrupting data, or causing operational disruption. Cyber attacks may also be carried out in a manner that does not require gaining unauthorized access, such as causing denial-of-service attacks on websites (i.e., efforts to make network services unavailable to intended users). Cyber incidents affecting a Fund or its service providers have the ability to cause disruptions and impact business operations, potentially resulting in financial losses, interference with a Fund's ability to calculate its NAV, impediments to trading, the inability of shareholders to transact business, violations of applicable privacy and other laws, regulatory fines, penalties, reputational damage, reimbursement or other compensation costs, or additional compliance costs. Similar adverse consequences could result from cyber incidents affecting issuers of securities in which a Fund invests, counterparties with which a Fund engages in transactions, governmental and other regulatory authorities, exchange and other financial market operators, banks, brokers, dealers, insurance companies and other financial institutions (including financial intermediaries and service providers for shareholders) and other parties. In addition, substantial costs may be incurred in order to prevent any cyber incidents in the future. While the Funds' service providers have established business continuity plans in the event of, and risk management systems to prevent, such cyber incidents, there are inherent limitations in such plans and systems including the possibility that certain risks have not been identified. Furthermore, the Funds cannot control the cybersecurity plans and systems put in place by their service providers or any other third parties whose operations may affect the Funds or their shareholders. As a result, the Funds and their shareholders could be negatively impacted.

Derivatives Risk. Derivatives are financial instruments that derive their performance, at least in part, from the performance of an underlying asset, index or interest rate. Derivatives entered into by a Fund can be volatile and involve various types and degrees of risk, depending upon the characteristics of a particular Derivative and the portfolio of the Fund. Derivatives permit portfolio managers or the Adviser to increase or decrease the level of risk of an investment portfolio, or change the character of the risk to which an investment portfolio is exposed in much the same way as the managers can increase or decrease the level of risk, or change the character of the risk, of an investment portfolio by making investments in specific securities. Derivatives may entail investment exposures that are greater than their cost would suggest, meaning that a small investment in Derivatives could have a large potential effect on performance of the Fund. In addition, Derivatives also involve the risk of mispricing or improper valuation. The Low Duration High Income Fund's use of Derivatives may include total return swaps, options and futures designed to replicate the performance of a Fund or to adjust market or risk exposure.

If a Fund invests in Derivatives at inopportune times or incorrectly judges market conditions, the investments may reduce the return of the Fund or result in a loss. The Fund could also experience losses if Derivatives are poorly correlated with its other investments, or if the Fund is unable to liquidate the position because of an illiquid secondary market. The market for many Derivatives is, or suddenly can become, illiquid. Changes in liquidity may result in significant, rapid and unpredictable changes in the prices for Derivatives. Furthermore, when seeking to obtain short exposure by investing in Derivatives, the Fund may be subject to regulatory restrictions. To the extent the Fund invests in Derivatives, the risks below may affect its performance:

Interest Rate Risk. Underlying investments may lose value due to interest rate changes.

Liquidity Risk. The Fund may not be able to sell or close out a Derivative instrument.

Options Risk. Options contracts are subject to the same risks as the investments in which the Fund invests directly, but also may involve risks different from, and possibly greater than, the risks associated with investing directly in the underlying investments. Investments in options involve additional costs, may be more volatile than other investments and may involve a small initial investment relative to the risk assumed. If the Adviser incorrectly forecasts the value of investments in using an option contract, the Fund might have been in a better position if the Fund had not entered into the contract. In addition, the value of an option may not correlate perfectly to the underlying financial asset, index or other investment or overall securities markets.

Swap Agreements Risk. Swap agreements are two-party contracts entered into primarily by institutional investors for periods ranging from a few weeks to more than a year, and will not have liquidity beyond the counterparty to the agreement. In a standard swap transaction, two parties agree to exchange the returns earned on specific assets, such as the return on, or increase in value of, a particular dollar amount invested at a particular interest rate, in a particular foreign currency, or in a “basket” of securities representing a particular index. A swap contract may not be assigned without the consent of the counter-party, and may result in losses in the event of a default or bankruptcy of the counter-party.

Distressed Securities Risk. The Funds may invest in securities of companies that are experiencing significant financial or business difficulties, including companies involved in bankruptcy or other reorganization and liquidation proceedings. Although such investments may result in significant returns to the Funds, they involve a substantial degree of risk. Any one or all of the issuers of the securities in which the Funds may invest may be unsuccessful or not show any return for a considerable period of time. The level of analytical sophistication, both financial and legal, necessary for successful investment in companies experiencing significant business and financial difficulties is unusually high. There is no assurance that the Adviser will correctly evaluate the value of the assets collateralizing the Funds’ loans or the prospects for a successful reorganization or similar action. In any reorganization or liquidation proceeding relating to a company in which the Funds invest, the applicable Fund may lose its entire investment or may be required to accept cash or securities with a value less than the applicable Fund’s original investment. Under such circumstances, the returns generated from the applicable Fund’s investments may not adequately compensate for the risks assumed. In addition, there is no minimum credit standard that is a prerequisite to the Funds’ investments in any instrument, and a significant portion of the obligations and preferred stock in which a Fund invests may be less than investment grade.

Equity Securities Risk. The Funds will be exposed to equity market risk through direct investments in equity securities, and its investment in other equity-linked instruments. Common stocks are susceptible to general stock market fluctuations and to volatile increases and decreases in value as market confidence in and perceptions of their issuers change. Preferred stocks are subject to the risk that the dividend on the stock may be changed or omitted by the issuer, and participation in the growth of an issuer may be limited.

ESG Investment Risk. A Fund's focus on sustainability considerations (ESG criteria) may limit the number of investment opportunities available to the Fund, and as a result, at times, the Fund may underperform funds that are not subject to similar investment considerations.

Fixed Income Securities Market Risk. The Funds may invest in fixed income securities. Difficult conditions in the broader financial markets have in the past resulted in a temporary but significant contraction in liquidity for fixed income securities. Liquidity relates to the ability of a Fund to sell its investments in a timely manner at a price approximately equal to its value on the Fund's books. To the extent that the market for fixed income securities suffers such a contraction, securities that were considered liquid at the time of investment could become temporarily illiquid, and the Adviser may experience delays or difficulty in selling assets at the prices at which the Fund carries such assets, which may result in a loss to such Fund. There is no way to predict reliably when such market conditions could re-occur or how long such conditions could persist.

In the event of a severe market contraction precipitated by general market turmoil, economic conditions, changes in prevailing interest rates or otherwise, coupled with extraordinary levels of Fund shareholder redemption requests, a Fund may have to consider selling its holdings at a loss including at prices below the current value on the Fund's books, borrowing money to satisfy redemption requests in accordance with the Fund's borrowing policy or postponing payment of redemption requests for up to seven days or longer, as permitted by applicable law, or other extraordinary measures. In addition, if a Fund needed to sell large blocks of investments to meet shareholder redemption requests or to raise cash, those sales could further reduce prices, particularly for lower-rated and unrated securities.

In 2022 and 2023, the Federal Reserve increased interest rates in an effort to combat inflation which resulted in periods of volatility. Additional interest rate changes may have adverse effects on investments, volatility and liquidity in the market for fixed income securities. In general, the market price of fixed income securities with longer maturities will increase or decrease more in response to changes in interest rates than shorter-term securities.

Fixed Income Securities Risk. The Funds invest a significant portion of their assets in fixed income securities. Fixed income securities are subject to credit risk and market risk, including interest rate risk. Credit risk is the risk of the issuer's inability to meet its principal and interest payment obligations. Market risk is the risk of price volatility due to such factors as interest rate sensitivity, market perception of the creditworthiness of the issuer and general market liquidity. There is no limitation on the maturities of fixed income securities in which the Funds invest. Securities having longer maturities generally involve greater risk of fluctuations in value resulting from changes in interest rates.

Floating Rate Risk. Securities with floating interest rates generally are less sensitive to interest rate changes but may decline in value if their interest rates do not rise as much, or as quickly, as interest rates in general. Conversely, floating rate instruments will not generally increase in value if interest rates

decline. Changes in interest rates will also affect the amount of interest income the Fund earns on its floating rate investments.

Foreign Investments Risk. The Funds' performance will be influenced by political, social and economic factors affecting the non-US countries and companies in which the Funds invest. Non-US securities carry special risks, such as less developed or less efficient trading markets, political instability, a lack of company information, differing auditing and legal standards, and, potentially, less liquidity. Additionally, certain non-US markets may rely heavily on particular industries and are more vulnerable to diplomatic developments, the imposition of economic sanctions against a particular country or countries, organizations, entities and/or individuals, changes in international trading patterns, trade barriers, and other protectionist or retaliatory measures. International trade barriers or economic sanctions against foreign countries, organizations, entities and/or individuals may adversely affect the Funds' foreign holdings or exposures.

Investments in non-US companies include American Depositary Receipts ("ADRs") and similar investments, including European Depositary Receipts ("EDRs") and Global Depositary Receipts ("GDRs"), dollar-denominated foreign securities and securities purchased directly on foreign exchanges. ADRs, EDRs and GDRs are depositary receipts for non-US company stocks that are not themselves listed on a U.S. exchange, and are issued by a bank and held in trust at that bank, and that entitle the owner of such depositary receipts to any capital gains or dividends from the foreign company stocks underlying the depositary receipts. ADRs are U.S. dollar denominated. EDRs and GDRs are typically U.S. dollar denominated but may be denominated in a foreign currency.

Forward Currency Contracts Risk. The Funds may enter into forward currency contracts. A forward currency contract is an obligation to purchase or sell a specific currency at a future date, which may be any fixed number of days from the date of the contract agreed upon by the parties, at a price set at the time of the contract. For example, the Fund might purchase a particular currency or enter into a forward currency contract to preserve the U.S. dollar price of securities it intends to or has contracted to purchase. Alternatively, it might sell a particular currency on either a spot or forward basis to hedge against an anticipated decline in the dollar value of securities it intends to or has contracted to sell. Although this strategy could minimize the risk of loss due to a decline in the value of the hedged currency, it could also limit any potential gain from an increase in the value of the currency.

General Market Risk. The market value of a security may move up or down, sometimes rapidly and unpredictably. These fluctuations may cause a security to be worth less than the price originally paid for it, or less than it was worth at an earlier time. Market risk may affect a single issuer, industry, sector of the economy or the market as a whole. Global economies and financial markets are increasingly interconnected, which increases the possibilities that conditions in one country or region might adversely impact issuers in a different country or region. The securities markets have experienced substantially lower valuations, reduced liquidity, price volatility, credit downgrades, increased likelihood of default, and valuation difficulties, all of which may increase the risks of investing in securities held by the Funds.

Government Securities Risk (Low Duration High Income Fund, Ultra-Short Duration Fund and Responsible Credit Fund Only). U.S. Government obligations include securities issued or guaranteed as to principal and interest by the U.S. Government, its agencies or instrumentalities, such as the U.S. Treasury. Payment of principal and interest on U.S. Government obligations may be backed by the full faith and credit of the United States or may be backed solely by the issuing or guaranteeing agency or instrumentality itself. In the latter case, the investor must look principally to the agency or instrumentality issuing or guaranteeing the obligation for ultimate repayment, which agency or instrumentality may be

privately owned. There can be no assurance that the U.S. Government would provide financial support to its agencies or instrumentalities (including government-sponsored enterprises) where it is not obligated to do so. As a result, there is a risk that these entities will default on a financial obligation. For instance, securities issued by Ginnie Mae are supported by the full faith and credit of the U.S. Government. Securities issued by Fannie Mae and Freddie Mac are supported only by the discretionary authority of the U.S. Government. However, the obligations of Fannie Mae and Freddie Mac have been placed into conservatorship until the entities are restored to a solvent financial condition. Securities issued by the Student Loan Marketing Association or “Sallie Mae” are supported only by the credit of that agency.

Government Securities Risk (Nordic High Income Bond Fund Only). The obligations Nordic Countries include securities issued or guaranteed as to principal and interest by the Nordic Countries, their agencies or instrumentalities. Payment of principal and interest on Nordic Country obligations may be backed by the full faith and credit of the applicable Nordic Country or may be backed solely by the issuing or guaranteeing agency or instrumentality itself. In the latter case, the investor must look principally to the agency or instrumentality issuing or guaranteeing the obligation for ultimate repayment, which agency or instrumentality may be privately owned. There can be no assurance that the Nordic Countries would provide financial support to its agencies or instrumentalities (including government-sponsored enterprises) where it is not obligated to do so. As a result, there is a risk that these entities will default on a financial obligation.

High Portfolio Turnover Rate Risk. The Funds pay transaction costs, such as commissions, when they buy and sell securities (or “turns over” their portfolios). A higher portfolio turnover rate may indicate higher transaction costs and may result in higher taxes when Fund shares are held in a taxable account. These costs, which are not reflected in Annual Fund Operating Expenses or in the Example, affect the Funds’ performance.

Illiquid Investments Risk. Illiquid investments include any investment that a Fund reasonably expects cannot be sold or disposed of in current market conditions in seven calendar days or less without the sale or dispositions significantly changing the market value of the investment, and include repurchase agreements maturing in more than seven days. Illiquid investments involve the risk that the securities will not be able to be sold at the time desired by the Adviser or at prices approximating the value at which a Fund is carrying the securities.

Insolvency Risk. The Funds’ investments in fixed income securities may be subject to various laws enacted in the jurisdiction or state of the borrower for the protection of creditors. If an unpaid creditor files a lawsuit seeking payment, the court may invalidate all or part of the borrower’s debt as a fraudulent conveyance, subordinate such indebtedness to existing or future creditors of the borrower or recover amounts previously paid by the borrower in satisfaction of such indebtedness, based on certain tests for borrower insolvency and other facts and circumstances, which may vary by jurisdiction. There can be no assurance as to what standard a court would apply in order to determine whether the borrower was “insolvent” after giving effect to the incurrence of the indebtedness, or that regardless of the method of valuation, a court would not determine that the borrower was “insolvent” after giving effect to such incurrence. In addition, in the event of the insolvency of a borrower, payments made on fixed income securities could be subject to avoidance as a “preference” if made within a certain period of time (which may be as long as one year and one day) before insolvency.

Interest Rate Risk. The prices of securities in general and fixed income securities in particular tend to be sensitive to interest rate fluctuations. Increases in interest rates can result in significant declines in the

prices of fixed income securities. Securities with floating interest rates generally are less sensitive to interest rate changes but may decline in value if their interest rates do not rise as much, or as quickly, as interest rates in general. The negative impact on fixed income securities generally from rate increases, regardless of the cause, could be swift and significant, which could result in losses by the Fund, even if anticipated by the Adviser.

Leverage Risk. Investments in Derivatives and selling securities short involve the use of leverage. Leverage can increase the investment returns of the Funds. However, if the investment decreases in value, the Funds will suffer a greater loss than would have resulted without the use of leverage. The Fund will maintain long positions in securities available for collateral, consisting of cash, cash equivalents, and other liquid securities, to meet any applicable asset coverage obligations under the 1940 Act. However, if the value of such collateral declines, margin calls by lending brokers could result in the liquidation of such collateral securities at disadvantageous prices.

Liquidity Risk. Certain securities, including Credit-Risk Related Instruments in which the Funds invest, and markets can become illiquid at times and negatively impact the price of an investment if the Funds were to sell during times of illiquidity. The Funds may have to lower the price, sell other securities or forego an investment opportunity, any of which may have a negative effect on the management or performance of the Funds.

Management Risk. The ability of a Fund to meet its investment objective is directly related to the Adviser's investment strategies for the Fund. The value of your investment in a Fund may vary with the effectiveness of the Adviser's research, analysis and asset allocation among portfolio securities. If the Adviser's investment strategies do not produce the expected results, your investment could be diminished or even lost.

New Fund Risk. There can be no assurance that the Nordic High Income Bond Fund will grow to or maintain an economically viable size, in which case the Board of Trustees may determine to liquidate the Fund. Liquidation of the Fund can be initiated without shareholder approval by the Board of Trustees if it determines that liquidation is in the best interest of shareholders. The timing of such liquidation may not be favorable and could have negative tax consequences for shareholders.

Non-Diversification Risk. The Responsible Credit Fund is classified as a "non-diversified" investment company under the Investment Company Act of 1940, as amended (the "1940 Act"). Therefore, the Responsible Credit Fund may invest a relatively high percentage of its assets in a smaller number of issuers or may invest a larger proportion of its assets in the obligations of a single issuer. As a result, the gains and losses on a single investment may have a greater impact on the Responsible Credit Fund's net asset value ("NAV") and may make the Responsible Credit Fund more volatile than more diversified funds.

Nordic Countries Risk. Investments in issuers of the Nordic Countries may subject the Nordic High Income Bond Fund to legal, regulatory, political, currency, security, and economic risks specific to each of the Nordic Countries. The economies of the Nordic Countries are heavily dependent on natural resources and trade amongst one another and with the members of the European Union. Decreasing European imports, new trade regulations, changes in exchange rates, a recession in Europe, or a slowing of economic growth in this region could have an adverse impact on the securities in which the Nordic High Income Bond Fund invests. The Nordic Countries have historically maintained generous welfare programs. Such welfare programs can negatively impact the economies of the Nordic Countries by causing increased government spending, higher production costs and lower productivity.

Other Investment Companies and Exchange-Traded Funds Risk. Federal law generally prohibits a mutual fund from acquiring shares of an investment company if, immediately after such acquisition, the Funds and their affiliated persons would hold more than 3% of such investment company's total outstanding shares. This prohibition may prevent the Funds from allocating its investments in an optimal manner. You will indirectly bear fees and expenses charged by the underlying funds in addition to the Funds' direct fees and expenses and, as a result, your cost of investing in the Funds will generally be higher than the cost of investing directly in the underlying fund shares.

An investment in an ETF generally presents the same primary risks as an investment in a conventional mutual fund (*i.e.*, one that is not exchange traded) that has the same investment objective, strategies and policies. The price of an ETF can fluctuate within a wide range, and the Funds could lose money when investing in an ETF if the prices of the securities owned by the ETF go down. In addition, ETFs are subject to the following risks that do not apply to conventional mutual funds: (1) the market price of the ETF's shares may trade at a discount to their NAV; (2) an active trading market for an ETF's shares may not develop or be maintained; or (3) trading of an ETF's shares may be halted if the listing exchange's officials deem such action appropriate, the shares are de-listed from the exchange, or the activation of market-wide "circuit breakers" (which are tied to large decreases in stock prices) halts stock trading generally. Additionally, ETFs have management and other fees, which increase their cost.

Preferred Stock Risk. The value of preferred stocks may decline due to general market conditions which are not specifically related to a particular company or to factors affecting a particular industry or industries. Preferred stocks may be more volatile than fixed income securities and are more correlated with the issuer's underlying common stock than fixed income securities. While most preferred stocks pay a dividend, the Funds may purchase preferred stock where the issuer has omitted, or is in danger of omitting, payment of its dividend.

Prepayment Risk. Many types of debt securities, including floating rate loans and mortgage-related securities, may reflect an interest in periodic payments made by borrowers. Although debt securities and other obligations typically mature after a specified period of time, borrowers may pay them off sooner. When a prepayment happens, all or a portion of the obligation will be prepaid. A borrower is more likely to prepay an obligation which bears a relatively high rate of interest. This means that in times of declining interest rates, there is a greater likelihood that a Fund's higher yielding securities will be prepaid and the Fund will probably be unable to re-invest those proceeds in an investment with as great a yield, causing the Fund's yield to decline. Securities subject to prepayment risk generally offer less potential for gains when prevailing interest rates fall. If a Fund buys those investments at a premium, accelerated prepayments on those investments could cause the Fund to lose a portion of its principal investment and result in lower yields to shareholders. The increased likelihood of prepayment when interest rates decline also limits market price appreciation, especially certain loans and mortgage-backed securities. The effect of prepayments on the price of a security may be difficult to predict and may increase the security's price volatility. Interest-only and principal-only securities are especially sensitive to interest rate changes, which can affect not only their prices but can also change the income flows and repayment assumptions about those investments.

Recent Market Events Risk. U.S. and international markets have experienced and may continue to experience significant periods of volatility in recent years and months due to a number of economic, political and global macro factors including uncertainty regarding inflation and central banks' interest rate changes, the possibility of a national or global recession, trade tensions, political events, the war between Russia and Ukraine, and armed conflict between Israel and Hamas in the Middle East. As a result of

continuing political tensions and armed conflicts, including the war between Ukraine and Russia, the U.S. and the European Union imposed sanctions on certain Russian individuals and companies, including certain financial institutions, and have limited certain exports and imports to and from Russia. The war has contributed to recent market volatility and may continue to do so. Continuing market volatility as a result of recent market conditions or other events may have an adverse effect on the performance of the Funds.

The Middle East conflict has led to significant loss of life, damaged infrastructure and escalated tensions both in the region and globally. These developments, as well as other events, could result in further market volatility and negatively affect financial asset prices, the liquidity of certain securities and the normal operations of securities exchanges and other markets, despite efforts to address market disruptions. As a result, the risk environment remains elevated. The Adviser will monitor developments and seek to manage the Funds in a manner consistent with achieving each Fund's investment objective, but there can be no assurance that they will be successful in doing so.

Redemption Risk. The Funds may experience periods of heavy redemptions that could cause a Fund to liquidate its assets at inopportune times or at a loss or depressed value, particularly during periods of declining or illiquid markets. Redemption risk is greater to the extent that a Fund has investors with large shareholdings, short investment horizons, or unpredictable cash flow needs. In addition, redemption risk is heightened during periods of overall market turmoil. If a Fund is forced to liquidate its assets under unfavorable conditions or at inopportune times, the value of your investment could decline.

Rule 144A Securities Risk. Rule 144A securities are purchased in transactions exempt from the registration requirements of the Securities Act of 1933, as amended, (the "Securities Act") pursuant to Rule 144A of the Securities Act. Rule 144A securities may only be sold to qualified institutional buyers, such as the Fund. The market for Rule 144A securities typically is less active than the market for public securities. Rule 144A securities carry the risk that the trading market may not continue and the Fund might be unable to dispose of these securities promptly or at reasonable prices and might thereby experience difficulty satisfying redemption requirements.

Securities Lending Risk. Each Fund, except the Nordic High Income Bond Fund, may make secured loans of its portfolio securities. Borrowers of the Fund's securities may provide collateral in the form of cash that is reinvested in securities. The securities in which the collateral is invested may not perform sufficiently to cover the return collateral payments owed to borrowers. In addition, delays may occur in the recovery of securities from borrowers, which could interfere with the Fund's ability to vote proxies or to settle transactions. To the extent a Fund lends its securities, it may be subject to these risks.

Short Sales Risk. A short sale is the sale by the Strategic Income Fund of a security which it does not own in anticipation of purchasing the same security in the future at a lower price to close the short position. A short sale will be successful if the price of the shorted security decreases. However, if the underlying security goes up in price during the period in which the short position is outstanding, the Strategic Income Fund will realize a loss. The risk on a short sale is unlimited because the Strategic Income Fund must buy the shorted security at the higher price to complete the transaction. Therefore, short sales may be subject to greater risks than investments in long positions. With a long position, the maximum sustainable loss is limited to the amount paid for the security plus the transaction costs, whereas there is no maximum attainable price of the shorted security. The Strategic Income Fund would also incur increased transaction costs associated with selling securities short. In addition, if the Strategic Income Fund sells securities short, it must maintain a segregated account with its custodian containing cash or high-grade securities equal to (i) the greater of the current market value of the securities sold short

or the market value of such securities at the time they were sold short, less (ii) any collateral deposited with the Strategic Income Fund's broker (not including the proceeds from the short sales).

Sovereign Debt Risk. The Funds may invest in securities issued or guaranteed by foreign governmental entities (known as sovereign debt securities). These investments are subject to the risk of payment delays or defaults, due, for example, to cash flow problems, insufficient foreign currency reserves, political considerations, large debt positions relative to the country's economy, or failure to implement economic reforms. There is no legal or bankruptcy process for collecting sovereign debt.

Certain issuers of sovereign debt may be dependent on disbursements from foreign governments, multilateral agencies and others abroad to reduce principal and interest liabilities on their debt. Such disbursements may be conditioned upon a debtor's implementation of economic reforms and/or economic performance and the timely service of such debtor's obligations. A failure on the part of the debtor to implement such reforms, achieve such levels of economic performance or repay principal or interest when due may result in the cancellation of such third parties' commitments to lend funds to the debtor, which may impair the debtor's ability to service its debts on a timely basis. As a holder of sovereign debt, the Funds may be requested to participate in the restructuring of such sovereign indebtedness, including the rescheduling of payments and the extension of further loans to debtors, which may adversely affect the Funds. There can be no assurance that such restructuring will result in the repayment of all or part of the debt.

SPACs Risk. The Funds invest in equity securities of SPACs, which raise assets to seek potential business combination opportunities. Unless and until a business combination is completed, a SPAC generally invests its assets in U.S. government securities, money market securities, and cash. If a business combination that meets the requirements for the SPAC is not completed within a pre-established period of time (e.g., two years), the invested funds are returned to the entity's shareholders. Because SPACs have no operating history or ongoing business other than seeking a business combination, the value of their securities is particularly dependent on the ability of the entity's management to identify and complete a profitable acquisition. Public stockholders of SPACs may not be afforded a meaningful opportunity to vote on a proposed initial business combination because certain stockholders, including stockholders affiliated with the management of the SPAC, may have sufficient voting power, and a financial incentive, to approve such a transaction without support from public stockholders. As a result, a SPAC may complete a business combination even though a majority of its public stockholders do not support such a combination. There is no guarantee that the SPACs in which a Fund invests will complete a business combination or that any business combination that is completed will be profitable. Some SPACs may pursue a business combination only within certain industries or regions, which may increase the volatility of their prices. SPACs may also encounter intense competition from other entities having a similar business objective, such as private investors or investment vehicles and other SPACs, competing for the same acquisition targets, which could make completing an attractive business combination more difficult. To the extent a SPAC is invested in cash or cash equivalents, this may impact the ability of a Fund to meet its investment objectives. Investments in a SPAC may be considered illiquid and/or subject to restrictions on resale.

The economic terms of the investments made by a SPAC's sponsors, directors, officers and their affiliates usually differ from those of the public shareholders such as the Funds. Sponsors, directors, officers and their affiliates may have financial incentives that differ from public shareholders which may result from securities ownership, compensation arrangements or relationships with affiliated entities that may lead to conflicts of interest when evaluating potential business combination opportunities. The compensation arrangement of a SPAC's sponsors, directors, officers or affiliates may create financial incentives to

complete a business combination transaction even if the transaction may not be in the best interest of other shareholders.

Tax Risk. Each Fund's investments and investment strategies, specifically its investments in Derivatives, may subject the Fund to special federal income tax provisions that may, among other things: (i) disallow, suspend or otherwise limit the allowance of certain losses or deductions; (ii) accelerate income to the Fund; (iii) convert long-term capital gain taxed at lower rates into short-term capital gain or ordinary income taxed at higher rates; (iv) convert an ordinary loss or a deduction into a capital loss (the deductibility of which is more limited); (v) treat dividends that would otherwise constitute "qualified dividend" income as non-qualified dividend income; or (vi) create a risk that the Fund will fail the diversification and source of income requirements under Sections 851 to 855 of the Internal Revenue Code of 1986, as amended (the "Code"), which could cause the Fund to fail to qualify for the tax treatment applicable to a regulated investment company.

Tracking Risk. The value of the Derivative instruments that the Low Duration High Income Fund and Nordic High Income Bond Fund use may not correlate to (or track) the values of the underlying securities. When used for hedging purposes, lack of correlation between price or rate movements of the Derivative instrument and the underlying investment sought to be hedged may prevent the Funds from achieving the intended hedging effect or expose the Funds to risk of loss.

Trade Versus Settlement Risk. The Funds may invest in securities that have varied settlement terms and dates. The longer the amount of time between trade date and settlement date the greater the risk that settlement will occur on a timely basis.

Yankee Bond Risk. Yankee bonds are subject to the same risks as other debt issues, notably credit risk, market risk, currency and liquidity risk. Other risks include adverse political and economic developments; the extent and quality of government regulations of financial markets and institutions; the imposition of foreign withholding taxes; and the expropriation or nationalization of foreign issuers.

Zero Coupon Securities Risk. While interest payments are not made on such securities, holders of such securities are deemed to have received income ("phantom income") annually, notwithstanding that cash may not be received currently. The effect of owning instruments that do not make current interest payments is that a fixed yield is earned not only on the original investment but also, in effect, on all discount accretion during the life of the obligations. This implicit reinvestment of earnings at a fixed rate eliminates the risk of being unable to invest distributions at a rate as high as the implicit yield on the zero coupon bond, but at the same time eliminates the holder's ability to reinvest at higher rates in the future. For this reason, some of these securities may be subject to substantially greater price fluctuations during periods of changing market interest rates than are comparable securities that pay interest currently. Longer term zero coupon bonds are more exposed to interest rate risk than shorter term zero coupon bonds. Zero coupon securities may be subject to greater fluctuation in value and less liquidity in the event of adverse market conditions than comparably rated securities that pay cash interest at regular intervals. Further, to maintain its qualification for pass-through treatment under the Federal tax laws, the Fund is required to distribute income to its shareholders and, consequently, may have to dispose of other, more liquid portfolio securities under disadvantageous circumstances or may have to leverage itself by borrowing in order to generate the cash to satisfy these distributions. The required distributions may result in an increase in the Fund's exposure to zero coupon securities. During a period of severe market conditions, the market for such securities may become even less liquid. In addition, as these securities do

not pay cash interest, the Fund's investment exposure to these securities and their risks, including credit risk, will increase during the time these securities are held in the Fund's portfolio.

Portfolio Holdings Information

A description of the Funds' policies and procedures with respect to the disclosure of the Funds' portfolio holdings is available in the Funds' Statement of Additional Information ("SAI"). Disclosure of the Funds' holdings is required to be made quarterly within 60 days of the end of each fiscal quarter in the annual and semi-annual reports to Fund shareholders and in the quarterly holdings report on Form N-CSR. The annual and semi-annual reports to Fund shareholders are available free of charge by contacting the CrossingBridge Funds, c/o U.S. Bank Global Fund Services, P.O. Box 701, Milwaukee, WI 53201-0701 or calling 888-898-2780, or by visiting the Funds' website at www.crossingbridgefunds.com. Part F of Form N-PORT is available on the SEC's website at www.sec.gov.

Management of the Funds

The Adviser

The Trust, on behalf of the Funds, has entered into an investment advisory agreement ("Advisory Agreement") with CrossingBridge Advisors, LLC, located at 427 Bedford Road, Suite 220, Pleasantville, NY 10570. The Adviser is registered as an investment adviser with the SEC and was formed in December 2016. CrossingBridge Advisors, LLC is a wholly-owned subsidiary of ENDI Corp. The Adviser and its affiliates have managed a variety of credit-related investment vehicles and/or accounts since 1996. As of September 30, 2024, the Adviser managed over \$3.3 billion in assets. Under the Advisory Agreement, the Adviser has overall responsibility for the general management and investment of each Fund's portfolio, subject to the supervision of the Board of Trustees. Each Fund compensates the Adviser for its services at the annual rate of 0.65% of its average annual net assets, payable on a monthly basis in arrears. For the fiscal year ended September 30, 2024, the Adviser received a management fee of 0.65% of the Low Duration High Income Fund's average daily net assets. For the fiscal year ended September 30, 2024, the Adviser received a management fee of 0.56% (net of fee waiver) of the Ultra-Short Duration Fund's average daily net assets. For the fiscal year ended September 30, 2024, the Adviser received a management fee of 0.05% (net of fee waiver) of the Responsible Credit Fund's average daily net assets. For the fiscal year ended September 30, 2024, the Adviser received a management fee of 0.65% of the Strategic Income Fund's average daily net assets.

Fund Expenses. Each Fund is responsible for its own operating expenses; however, pursuant to an operating expense limitation agreement between the Adviser and the Trust, on behalf of the Funds, the Adviser has agreed to waive its management fees and/or reimburse expenses of the Funds to ensure that the total amount of each Fund's operating expenses (exclusive of Excluded Expenses) does not exceed 0.80% of the average net assets of each of the Low Duration High Income Fund, Ultra-Short Duration Fund and Responsible Credit Fund, through at least January 31, 2026; 0.82% of the average net assets of the Strategic Income Fund, and 0.85% of the average net assets of the Nordic High Income Bond Fund. The expense limitation agreement is in place through at least September 30, 2026 for the Nordic High Income Bond Fund and January 31, 2026 for the other Funds. Each expense limitation agreement is subject to annual re-approval of the agreement by the Board of Trustees thereafter. Any waiver of management fees or payment of expenses made by the Adviser may be reimbursed by the Funds in subsequent years if the Adviser so requests. This reimbursement may be requested if the aggregate amount actually paid by a Fund toward operating expenses for such fiscal year (taking into account the reimbursement) does not exceed the applicable limitation on Fund expenses at the time of the waiver. The Adviser may request recoupment of previously waived fees and paid expenses from a Fund for three years

from the date such fees and expenses were waived or paid, subject to the operating expense limitation agreement and is permitted to be reimbursed for fee reductions and/or expense payments made in the prior three years, if such reimbursement will not cause the Fund's expense ratio, after recoupment has been taken into account, to exceed the lesser of: (1) the expense limitation in place at the time of the waiver and/or expense payment; or (2) the expense limitation in place at the time of the recoupment. Any such reimbursement will be reviewed by the Board of Trustees. The operating expense limitation agreement can be terminated only by, or with the consent of, the Board of Trustees.

A discussion regarding the basis of the Board of Trustees' approval of the Advisory Agreement between the Adviser and the Trust, on behalf of the Low Duration High Income Fund, Ultra-Short Duration Fund, Responsible Credit Fund, and Strategic Income Fund, is available in the Funds' Annual Report to Shareholders on Form N-CSR for the fiscal year ended September 30, 2024. A discussion regarding the basis of the Board of Trustees' approval of the Advisory Agreement between the Adviser and the Trust, on behalf of the Nordic High Income Bond Fund, will be available in the Nordic High Income Bond Fund's first Semi-Annual Report to Shareholders on Form N-CSR for the fiscal period ended March 31, 2025.

The Adviser also serves as investment adviser to the CrossingBridge Pre-Merger SPAC ETF, a separate series of the Trust.

Portfolio Managers

David K. Sherman David Sherman founded Cohanzick Management, LLC in 1996 and CrossingBridge Advisors, LLC in 2016 and currently serves as the CIO for the CrossingBridge Fund family. Mr. Sherman has 35+ years of investment management experience. Earlier in his career, Mr. Sherman was actively involved as a senior executive in Leucadia National Corporation's corporate investments and acquisitions and was Treasurer of the holding company's insurance operations. Mr. Sherman holds a B.S. from Washington University.

T. Kirk Whitney, CFA® is a Portfolio Manager of the Adviser, and serves as a Portfolio Manager of the Low Duration High Income Fund, Ultra-Short Duration Fund and Responsible Credit Fund. Mr. Whitney joined Cohanzick Management, LLC as a Portfolio Analyst in 2013. Mr. Whitney has over 20 years of experience having worked at the Solaris Group, Concordia Advisors, Alliance Capital and Bloomberg. Mr. Whitney holds a B.S. from Pennsylvania State University.

Michael De Kler is a Portfolio Manager of the Adviser and serves as a Portfolio Manager of the Ultra-Short Duration Fund. Michael De Kler joined Cohanzick Management, LLC in 1999 and has been an employee of CrossingBridge since 2024 where he serves as a Portfolio Manager. Mr. De Kler holds a B.S. and a M.B.A. from Fairleigh Dickinson University.

Spencer Rolfe is a Portfolio Manager of the Adviser and serves as a Portfolio Manager of the Responsible Credit Fund, Strategic Income Fund and Nordic High Income Bond Fund. Prior to joining the Adviser, Mr. Rolfe was a Managing Director at Corvid Peak Capital Management and an Analyst at Arena Investors, focusing on credit opportunities and special situations. Mr. Rolfe began his career at Cohanzick Management, LLC, an affiliate of the Adviser, in 2017, covering performing and distressed credit opportunities and equity special situations. In addition, Mr. Rolfe is a Teaching Assistant within the Finance Department of New York University's Stern Business School with a focus on Global Value Investing. Mr. Rolfe received his B.A. from the University of Missouri.

Chen Ling is an Analyst of the Adviser and serves as the Assistant Portfolio Manager of the Nordic High Income Bond Fund. Ms. Ling joined the Adviser as an investment analyst in 2021. Prior to joining the Adviser, Ms. Ling worked in equity trading at TD Ameritrade from 2012 to 2015, private wealth management at Stratos Wealth Partners from 2016 to 2019, and sell-side equity research at Credit Suisse in 2020. Ms. Ling holds a B.S. from University of California San Diego, and an MBA from NYU Stern School of Business.

The SAI provides additional information about the portfolio managers' compensation, other accounts managed and ownership of securities in the Funds.

CFA® is a registered trademark owned by the CFA Institute.

Derivative Actions

Pursuant to the Trust's Amended and Restated Declaration of Trust (the "Declaration of Trust"), and subject to the limitations disclosed in the Declaration of Trust, a Fund shareholder may only bring a derivative action if (i) the shareholder or shareholders make a pre-suit demand upon the Board of Trustees to bring the subject action unless an effort to cause the Board of Trustees to bring such an action is not likely to succeed (as defined in the Declaration of Trust); (ii) shareholders eligible to bring such derivative action under the Delaware Statutory Trust Act who hold at least 10% of the outstanding voting securities of the Trust, or 10% of the outstanding voting securities of the series or class to which such action relates, shall join in the request for the Board of Trustees to commence such action; and (iii) the Board of Trustees is afforded a reasonable amount of time to consider such shareholder request and to investigate the basis of such claim. The Board of Trustees shall be entitled to retain counsel or other advisors in considering the merits of the request and shall require an undertaking by the shareholders making such request to reimburse the Trust for the expense of any such advisors in the event that the Trustees determine not to bring such action. The provision requiring at least 10% of the outstanding voting securities of the Trust, applicable series or class to join in the request to bring the derivative action and the provision requiring an undertaking by the requesting shareholders to reimburse the Trust for the expense of any advisors retained by the Board of Trustees in the event that the Trustees determine not to bring such action, do not apply to claims brought under federal securities laws.

Shareholder Information

Choosing a Share Class

The Low Duration High Income Fund and Strategic Income Fund each offer Institutional Class shares and Retail Class shares. The Ultra-Short Duration Fund, Responsible Credit Fund and Nordic High Income Bond Fund offer Institutional Class shares. The different classes of shares represent investments in the same portfolio of securities, but the classes are subject to different expenses and may have different share prices as outlined below.

Institutional Class Shares. Institutional Class shares are offered for sale at NAV without the imposition of a sales charge or Rule 12b-1 distribution fee. Institutional Class shares are subject to a shareholder servicing fee at an annual rate not to exceed 0.15% of a Fund's average daily net assets, attributable to Institutional Class shares. Currently, the shareholder servicing fee charged is 0.10% for the Low Duration High Income Fund, Ultra-Short Duration Fund, Responsible Credit Fund and Nordic High Income Bond Fund's average daily net assets, and 0.11% for the Strategic Income Fund's average daily net assets; however, the fee may be increased to 0.15% of a Fund's average daily net assets attributable to

Institutional Class shares at any time. Institutional Class shares are offered primarily to institutions such as pension and profit sharing plans, employee benefit trusts, endowments, foundations, corporations and high net worth individuals. Institutional Class shares may also be offered through certain financial intermediaries that charge their customers transaction or other distribution or service fees with respect to their customer's investments in the Fund. Pension and profit sharing plans, employee trusts and employee benefit plan alliances and "wrap account" or "managed fund" programs established with broker-dealers or financial intermediaries that maintain an omnibus or pooled account for the Fund and do not require the Fund to pay a fee, generally may purchase Institutional Class shares, subject to investment minimums.

Retail Class Shares. Retail Class shares of the Low Duration High Income Fund and Strategic Income Fund are offered for sale at NAV, without the imposition of a sales charge. Retail Class shares are subject to a 0.25% Rule 12b-1 distribution fee on an annual basis. Retail Class shares of a Fund are also subject to a shareholder servicing fee at an annual rate not to exceed 0.15% of a Fund's average daily net assets attributable to Retail Class shares. Currently, the shareholder servicing fee charged is 0.10% for the Low Duration High Income Fund and 0.11% for the Strategic Income Fund; however, the fee may be increased to 0.15% of a Fund's average daily net assets attributable to Retail Class shares at any time. As a result, Retail Class shares pay higher annual expenses than Institutional Class shareholders.

Distribution Plan (Rule 12b-1 Plan) - Low Duration High Income Fund and Strategic Income Fund Only

The Low Duration High Income Fund and Strategic Income Fund have adopted a Distribution Plan (the "Plan") pursuant to Rule 12b-1 under the 1940 Act. Under the Plan, a Fund is authorized to pay the Distributor, or such other entities as approved by the Board of Trustees, Rule 12b-1 distribution fees for the costs and services it provides and expenses it bears in the sale and distribution of Retail Class shares of a Fund (the "Rule 12b-1 Fee"). The maximum annual rate of the Rule 12b-1 Fee is 0.25% of a Fund's average daily net assets attributable to Retail Class shares. Amounts received under the Plan may be paid to other persons, including the Adviser, for any distribution or service activity. Because these fees are paid out of a Fund's assets attributable to Retail Class shares on an on-going basis, over time these fees will increase the cost of your investment in a Fund and may cost you more than paying other types of sales charges.

Shareholder Servicing Plan

The Trust, on behalf of the Funds, has also adopted a Shareholder Servicing Plan that allows the Funds to make payments to financial intermediaries and other persons for certain personal services for shareholders and/or the maintenance of shareholder accounts. The shares of the Funds are subject to shareholder servicing fee at an annual rate not to exceed 0.15% of a Fund's average daily net assets attributable to Institutional Class and Retail Class shares (as applicable). Currently, the shareholder servicing fee charged is 0.10% of the Low Duration High Income Fund, Ultra-Short Duration Fund, the Responsible Credit Fund and Nordic High Income Bond Fund's average daily net assets, and 0.11% of the Strategic Income Fund's average daily net assets; however, the fee may be increased to 0.15% of a Fund's average daily net assets, at any time. Because these fees are paid out of a Fund's assets on an ongoing basis, over time these fees will increase the cost of your investment in the Fund and may cost you more than paying other types of sales charges.

Share Price

The price of a Fund's shares is its NAV. The NAV is calculated by dividing the value of a Fund's total assets, less its liabilities, by the number of its shares outstanding. In calculating the NAV, portfolio securities are valued using current market values or official closing prices, if available. The NAV is calculated at the close of regular trading on the NYSE, (generally 4:00 p.m., Eastern time). The NAV will not be calculated on days on which the NYSE is closed for trading. If the NYSE closes early, the Funds will calculate the NAV as of the close of trading on the NYSE on that day. If an emergency exists as permitted by the SEC, the NAV may be calculated at a different time.

Each equity security owned by a Fund, including shares of closed-end funds, that is listed on a national securities exchange, except for portfolio securities listed on the NASDAQ Stock Market, LLC ("NASDAQ"), is valued at its last sale price on that exchange on the close of that exchange on the date as of which assets are valued. If a security is listed on more than one exchange, the Funds will use the price on the exchange that the Funds generally consider to be the principal exchange on which the security is traded.

Portfolio securities listed on NASDAQ will be valued at the NASDAQ Official Closing Price ("NOCP"), which may not necessarily represent the last sale price. If the NOCP is not available, such securities shall be valued at the last sell price on the day of valuation. If there has been no sale on such exchange or on NASDAQ on such day, the security is valued at the mean between the most recent quoted bid and asked prices at the close of the exchange on such day or the security is valued at the latest sales price on the "composite market" for the day such security is being valued. The composite market is defined as the consolidation of the trade information provided by national securities and foreign exchanges and over-the-counter ("OTC") markets as published by an approved independent pricing service ("Pricing Service").

Exchange-traded options are valued at the composite price, using the National Best Bid and Offer quotes. If there are no trades for the option on a given business day, composite option pricing calculates the mean of the highest bid price and lowest ask price across the exchanges where the option is traded. Option contracts on securities, currencies and other financial instruments traded in the OTC market with less than 180 days remaining until their expiration are valued at the evaluated price provided by the broker-dealer with which the option was traded. Option contracts on securities, currencies and other financial instruments traded in the OTC market with 180 days or more remaining until their expiration are valued at the prices provided by a recognized independent broker-dealer.

Debt securities, including short-term debt securities having a maturity of 60 days or less, are valued at the mean in accordance with prices supplied by a Pricing Service. Pricing Services may use various valuation methodologies such as the mean between the bid and ask prices, matrix pricing method or other analytical pricing models as well as market transactions and dealer quotations. If a price is not available from a Pricing Service, the most recent quotation obtained from one or more broker-dealers known to follow the issue will be obtained. Quotations will be valued at the mean between the bid and the offer. Fixed income securities purchased on a delayed-delivery basis are typically marked to market daily until settlement at the forward settlement date. Any discount or premium is accreted or amortized using the constant yield method until maturity. Forward currency contracts are valued at the mean between the bid and asked prices.

If market quotations are not readily available or deemed unreliable, a security or other asset will be valued at its fair value as determined under the Adviser's fair value pricing procedures subject to oversight by the Board of Trustees. These fair value pricing procedures will also be used to price a security when corporate events, events in the securities market or world events cause the Adviser to believe that the

security's last sale price may not reflect its actual fair market value. The intended effect of using fair value pricing procedures is to ensure that a Fund's shares are accurately priced. The Adviser will regularly evaluate whether a Fund's fair value pricing procedures continue to be appropriate in light of the specific circumstances of the Fund and the quality of prices obtained.

When fair value pricing is employed, the prices of securities used by each Fund to calculate its NAV may differ from quoted or published prices for the same securities. Due to the subjective and variable nature of fair value pricing, it is possible that the fair value determined for a particular security may be materially different (higher or lower) from the price of the security quoted or published by others or the value when trading resumes or realized upon its sale. Therefore, if a shareholder purchases or redeems Fund shares when a Fund holds securities priced at a fair value, the number of shares purchased or redeemed may be higher or lower than it would be if the Fund were using market-value pricing. The Adviser anticipates that the Funds' portfolio holdings will be fair valued only if market quotations for those holdings are not readily available or considered unreliable.

In the case of foreign securities, the occurrence of certain events after the close of foreign markets, but prior to the time a Fund's NAV is calculated (such as a significant surge or decline in the U.S. or other markets) often will result in an adjustment to the trading prices of foreign securities when foreign markets open on the following business day. If such events occur, the Funds will value foreign securities at fair value, taking into account such events, in calculating the NAV. In such cases, use of these evaluated prices can reduce an investor's ability to seek to profit by estimating the Funds' NAV in advance of the time the NAV is calculated. In the event a Fund holds portfolio securities that trade in foreign markets or that are primarily listed on foreign exchanges that trade on weekends or other days when the Fund does not price its shares, the Fund's NAV may change on days when shareholders will not be able to purchase or redeem the Fund's shares.

How to Purchase Shares

All purchase requests received in good order by the Funds' transfer agent, U.S. Bancorp Fund Services, LLC (the "Transfer Agent") or by an authorized financial intermediary (an "Authorized Intermediary," as defined below) before the close of the NYSE (generally 4:00 p.m., Eastern time) will be processed at that day's NAV per share. Purchase requests received by the Transfer Agent or an Authorized Intermediary after the close of the NYSE (generally 4:00 p.m., Eastern time) will receive the next business day's NAV per share. An Authorized Intermediary is a financial intermediary (or its authorized designee) that has made arrangements with a Fund to receive purchase and redemption orders on its behalf ("Authorized Intermediary"). For additional information about purchasing shares through financial intermediaries, please see "Purchasing Shares Through a Financial Intermediary," below.

All account applications (each an "Account Application") to purchase Fund shares are subject to acceptance by the Funds and are not binding until so accepted. It is the policy of the Funds not to accept applications under certain circumstances or in amounts considered disadvantageous to shareholders. Your order will not be accepted until the Funds or the Transfer Agent receives a completed Account Application in good order. The Funds reserve the right to reject any Account Application.

The Funds reserve the right to reject any purchase order or suspend the offering of shares if, in their discretion, it is in a Fund's best interest to do so. For example, a purchase order may be refused if it appears so large that it would disrupt the management of the Funds. Purchases may also be rejected from persons believed to be "market-timers," as described under the section entitled "Tools to Combat Frequent Transactions," below. In addition, a service fee, which is currently \$25, as well as any loss sustained by the Funds, will be deducted from a shareholder's account for any payment that is returned to the Transfer Agent unpaid. Written notice of a rejected purchase order will be provided to the investor

within one or two business days under normal circumstances. The Funds and the Transfer Agent will not be responsible for any losses, liability, cost or expense resulting from rejecting any purchase order. Your order will not be accepted until a completed Account Application is received by the Funds or the Transfer Agent.

Shares of the Funds have not been registered for sale outside of the United States. The Funds generally do not sell shares to investors residing outside the United States, even if they are United States citizens or lawful permanent residents, except to investors with United States military APO or FPO addresses.

Minimum Investment Amounts

The Low Duration High Income Fund and the Strategic Income Fund each offer investors two classes of shares: Institutional Class shares and Retail Class shares. The Ultra-Short Duration Fund, Responsible Credit Fund and Nordic High Income Bond Fund each offer Institutional Class shares. Minimum initial investment amounts are shown below. There is no minimum investment requirement for subsequent investments.

Share Purchase Amounts	Institutional Class - All Funds	Retail Class - Low Duration High Income Fund and Strategic Income Fund Only
Minimum Initial Investment – All Accounts	\$0 for certain institutional investors as described under “Minimum Investment Amounts”; \$5,000 for all other investors	\$2,500
Minimum Subsequent Investment	None	None
Automatic Investment Plan (Low Duration High Income Fund, Ultra-Short Duration, Responsible Credit, Nordic High Income Bond Fund)	\$100	\$100
Automatic Investment Plan (Strategic Income Fund)	\$1,000	\$100

Institutional Class shares are offered without any minimum initial investment to the following types of qualifying institutional investors:

1. Broker-dealers, registered investment advisers, insurance companies, trust institutions or bank trust departments purchasing for their own account or for the account of other institutional investors;
2. Managed account programs that charge an asset-based fee provided by a broker-dealer, registered investment adviser, insurance company, trust institution or bank trust departments;
3. Employee benefit plans investing through an investment adviser, a broker-dealer or another financial intermediary;
4. Any state, county, or city, or any governmental instrumentality, department, authority or agency;
5. Charitable organizations (as defined for purposes of Section 501(c)(3) of the Code) or charitable remainder trusts or life income pools established for the benefit of a charitable organization;
6. Insurance company separate accounts;
7. Health savings account programs provided by a broker-dealer, registered investment adviser, insurance company, trust institution or bank trust department;

8. Other institutions and intermediaries approved by the Funds' distributor; and
9. Officers, directors and employees of the Adviser and its affiliates; trustees, officers and service providers of the Trust and the Funds; registered representatives and employees of financial intermediaries with a current selling agreement with the Distributor or the Adviser; and immediate family members of such persons.

The Funds reserve the right to waive or change the minimum initial investment or minimum subsequent investment amounts at its discretion. Shareholders will be given at least 30 days' written notice of any increase in the minimum dollar amount of initial or subsequent investments. For accounts sold through financial intermediaries, it is the primary responsibility of the financial intermediary to ensure compliance with investment minimums.

Purchase Requests Must be Received in Good Order

Your share price will be the next NAV per share calculated after the Transfer Agent or your Authorized Intermediary receives your purchase request in good order. For purchases made through the Transfer Agent, "good order" means that your purchase request includes:

- the name of the Fund and share class you are investing in;
- the dollar amount of shares to be purchased;
- your Account Application or investment stub; and
- a check payable to the Fund you are investing in.

For information about your financial intermediary's requirements for purchases in good order, please contact your financial intermediary.

Purchase by Mail

To purchase Fund shares by mail, simply complete and sign the Account Application and mail it, together with your check made payable to the Fund you are investing in, to one of the addresses below. To make additional investments once you have opened your account, write your account number on the check and send it together with the Invest by Mail form from your most recent confirmation statement received from the Transfer Agent. If you do not have the Invest by Mail form, include the name of the Fund you are investing in and your name, address, and account number on a separate piece of paper and mail it with your check made payable to the Fund you are investing in, to:

Regular Mail

CrossingBridge Funds
c/o U.S. Bank Global Fund Services
P.O. Box 701
Milwaukee, WI 53201-0701

Overnight or Express Mail

CrossingBridge Funds
c/o U.S. Bank Global Fund Services
615 East Michigan Street, 3rd Floor
Milwaukee, WI 53202

The Funds do not consider the U.S. Postal Service or other independent delivery services to be their agents. Therefore, deposit in the mail or with such services, or receipt at the Transfer Agent's post office box, of purchase orders or redemption requests does not constitute receipt by the Transfer Agent. Receipt of purchase orders or redemption requests is based on when the order is received at the Transfer Agent's offices. All purchase checks must be in U.S. dollars drawn on a domestic financial institution. The Funds will not accept payment in cash or money orders. To prevent check fraud, the Funds will not accept third party checks, Treasury checks, credit card checks, traveler's checks or starter checks for the purchase of shares. The Funds are unable to accept post-dated checks or any conditional order or payment.

Purchase by Wire

If you are making your first investment in the Funds through a wire purchase, the Transfer Agent must have a completed Account Application before you wire funds. You can mail or use an overnight service to deliver your Account Application to the Transfer Agent at the above address. Upon receipt of your completed Account Application, the Transfer Agent will establish an account for you. Once your account has been established, you may instruct your bank to send the wire. Prior to sending the wire, please call the Transfer Agent at 888-898-2780 to advise them of the wire and to ensure proper credit upon receipt. Your bank must include the name of the Fund you are investing in, your name and your account number so that monies can be correctly applied. Your bank should transmit immediately available funds by wire to:

Wire to:	U.S. Bank National Association 777 East Wisconsin Avenue Milwaukee, Wisconsin 53202
ABA Number:	075000022
Credit:	U.S. Bancorp Fund Services, LLC
Account:	112-952-137
Further Credit:	(name of the Fund you are investing in) (Shareholder Name/Account Registration) (Shareholder Account Number)

Wired funds must be received prior to the close of the NYSE (generally 4:00 p.m., Eastern time) to be eligible for same day pricing. The Funds and U.S. Bank National Association, the Funds' custodian, are not responsible for the consequences of delays resulting from the banking or Federal Reserve wire system, or from incomplete wiring instructions.

Investing by Telephone

Telephone purchase privileges are automatically provided unless you specifically decline the option on your Account Application. If your account has been open for at least 7 business days, you may purchase additional shares by calling the Funds toll free at 888-898-2780. You must also have submitted a voided check or a savings deposit slip to have banking information established on your account. This option allows investors to move money from their bank account to their Fund account upon request. Only bank accounts held at domestic financial institutions that are Automated Clearing House ("ACH") members may be used for telephone transactions. Telephone purchases are subject to applicable minimum investment amounts for subsequent investments. If your order is received prior to the close of the NYSE (generally 4:00 p.m., Eastern time), shares will be purchased in your account at the applicable price determined on the day your order is placed. During periods of high market activity, shareholders may encounter higher than usual call waiting times. Please allow sufficient time to place your telephone transaction.

Retirement Accounts

The Funds offer prototype documents for a variety of retirement accounts for individuals and small businesses. Please call 888-898-2780 for information on:

- Individual Retirement Plans, including Traditional IRAs and Roth IRAs.
- Small Business Retirement Plans, including Simple IRAs and SEP IRAs.

There may be special distribution requirements for a retirement account, such as required distributions or mandatory federal income tax withholdings. For more information, call the number listed above. Direct shareholder accounts may be charged a \$15 annual account maintenance fee for each retirement account up to a maximum of \$30 annually and a \$25 fee for transferring assets to another custodian or for closing a retirement account. Fees charged by other institutions may vary.

Automatic Investment Plan

For your convenience, the Funds offer an Automatic Investment Plan (“AIP”). Under the AIP, after your initial investment, you may authorize the Funds to withdraw automatically from your personal checking or savings account any amount that you wish to invest, which must be at least \$100 on a monthly basis. In order to participate in the AIP, your bank must be a member of the ACH network. If you wish to enroll in the AIP, complete the appropriate section in the Account Application. The Funds may terminate or modify this privilege at any time. You may terminate your participation in the AIP at any time by notifying the Transfer Agent five days prior to the effective date of the request. A \$25 fee will be charged if your bank does not honor the AIP draft for any reason.

Purchasing Shares Through a Financial Intermediary

Investors may be charged a fee if they effect transactions through a financial intermediary. If you are purchasing shares through a financial intermediary, you must follow the procedures established by your financial intermediary. Your financial intermediary is responsible for sending your purchase order and wiring payment to the Transfer Agent. Your financial intermediary holds the shares in your name and receives all confirmations of purchases and sales. Financial intermediaries placing orders for themselves or on behalf of their customers should call the Funds toll free at 888-898-2780, or follow the instructions listed in the sections above entitled “Investing by Telephone,” “Purchase by Mail” and “Purchase by Wire.”

If you place an order for a Fund’s shares through a financial intermediary that is not an Authorized Intermediary in accordance with such financial intermediary’s procedures, and such financial intermediary then transmits your order to the Transfer Agent in accordance with the Transfer Agent’s instructions, your purchase will be processed at the NAV next calculated after the Transfer Agent receives your order. The financial intermediary must promise to send to the Transfer Agent immediately available funds in the amount of the purchase price in accordance with the Transfer Agent’s procedures. If payment is not received within the time specified, the Transfer Agent may rescind the transaction and the financial intermediary will be held liable for any resulting fees or losses.

In the case of Authorized Intermediaries that have made satisfactory payment or redemption arrangements with the Funds, orders will be processed at the NAV next calculated after receipt in good order by the Authorized Intermediary (or its authorized designee), consistent with applicable laws and regulations. An order is deemed to be received when the Funds or an Authorized Intermediary accepts the order. Authorized Intermediaries may be authorized to designate other intermediaries to receive purchase and redemption requests on behalf of the Funds.

For more information about your financial intermediary’s rules and procedures, whether your financial intermediary is an Authorized Intermediary, and whether your financial intermediary imposes cut-off times for the receipt of orders that are earlier than the cut-off times established by the Funds, you should contact your financial intermediary directly.

Anti-Money Laundering Program

The Trust has established an Anti-Money Laundering Compliance Program as required by the Uniting and Strengthening America by Providing Appropriate Tools Required to Intercept and Obstruct Terrorism Act of 2001 (the “USA PATRIOT Act”) and related anti-money laundering laws and regulations. To ensure compliance with these laws, the Account Application asks for, among other things, the following information for all “customers” seeking to open an “account” (as those terms are defined in rules adopted pursuant to the USA PATRIOT Act):

- full name;
- date of birth (individuals only);
- Social Security or taxpayer identification number; and
- permanent street address (a P.O. Box number alone is not acceptable).

If you are opening an account in the name of certain legal entities (*e.g.*, a partnership, limited liability company, business trust, corporation, etc.), you must also supply the identity of the beneficial owners of the legal entity. Accounts opened by entities, such as corporations, limited liability companies, partnerships or trusts, will require additional documentation.

If any information listed above is missing, your Account Application will be returned and your account will not be opened. In compliance with the USA PATRIOT Act and other applicable anti-money laundering laws and regulations, the Transfer Agent will verify the information on your application. The Funds reserve the right to request additional clarifying information and may close your account and redeem your shares at the next computed NAV if such clarifying information is not received by the Funds within a reasonable time of the request or if the Fund cannot form a reasonable belief as to the true identity of a customer. In the rare event that we are unable to verify your identity, the Funds reserve the right to redeem your account at the current day’s NAV. If you require additional assistance when completing your application, please contact the Transfer Agent at 888-898-2780.

How to Redeem Shares

Orders to sell or “redeem” shares may be placed either directly with the Funds or through an Authorized Intermediary. If you originally purchased your shares through an Authorized Intermediary, your redemption order must be placed with the same Authorized Intermediary in accordance with the procedures established by that Authorized Intermediary. Your Authorized Intermediary is responsible for sending your order to the Transfer Agent and for crediting your account with the proceeds. You may redeem the Funds’ shares on any business day that the Funds calculate their NAV. The price at which redemptions are effected is based on the NAV next calculated after the request is received in good order. To redeem shares directly with the Funds, you must contact the Funds either by mail or by phone to place a redemption request. Your redemption request must be received in good order (as discussed under “Payment of Redemption Proceeds,” below) prior to the close of the regular trading sessions of the NYSE (generally 4:00 p.m., Eastern time) by the Transfer Agent or by your Authorized Intermediary in order to obtain that day’s closing NAV. Redemption requests received by the Transfer Agent or an Authorized Intermediary after the close of the NYSE will be treated as though received on the next business day.

Shareholders who hold their shares through an IRA or other tax-advantaged account must indicate on their written redemption request whether or not to withhold federal income tax. Redemption requests failing to indicate an election not to have tax withheld will generally be subject to 10% withholding. Shares held in IRA or other retirement plan accounts may be redeemed by telephone at 888-898-2780. Investors will be asked whether or not to withhold taxes from any distribution.

Payment of Redemption Proceeds

You may redeem your Fund shares at the NAV per share next determined after the Transfer Agent or your Authorized Intermediary receives your redemption request in good order. Your redemption request cannot be processed on days the NYSE is closed. Redemption proceeds with respect to all requests received by the Transfer Agent or your Authorized Intermediary in good order before the close of the regular trading session of the NYSE (generally 4:00 p.m., Eastern time) will usually be sent one to three business days following the receipt of your redemption request.

A redemption request made through the Transfer Agent will be deemed in “good order” if it includes:

- the shareholder’s name;
- the name of the Fund and share class you are redeeming from;
- the account number;
- the share or dollar amount to be redeemed; and
- signatures by all shareholders on the account and signature guarantee(s), if applicable.

The Funds reserve the right to change the requirements of “good order.” Shareholders will be given advance notice if the requirements of “good order” change. For information about your financial intermediary’s requirements for redemption requests in good order, please contact your financial intermediary.

You may receive proceeds of your sale by a check sent to the address of record, electronically via the ACH network using the previously established bank instructions or via federal wire transfer to your pre-established bank account. The Funds typically expect that it will take one to three business days following the receipt of your redemption request to pay out redemption proceeds regardless of whether the redemption proceeds are paid by check, ACH transfer or wire. Please note that wires are subject to a \$15 fee. There is no charge to have proceeds sent via ACH; however, funds are typically credited to your bank within two to three business days after redemption. In all cases, proceeds will be sent within seven calendar days after the Funds receive your redemption request.

The Funds typically expect they will hold cash or cash equivalents to meet redemption requests. The Funds may also use the proceeds from the sale of portfolio securities to meet redemption requests if consistent with the management of the Funds. These redemption methods will be used regularly under normal market conditions and may also be used during periods of stressed market conditions.

If the Transfer Agent has not yet collected payment for the shares you are selling, it may delay sending the proceeds until the payment is collected, which may take up to twelve calendar days from the purchase date or until your payment has cleared. Shareholders can avoid this delay by utilizing the wire purchase option. Furthermore, there are certain times when you may be unable to sell Fund shares or receive proceeds. Specifically, the Funds may suspend the right to redeem shares or postpone the date of payment upon redemption for more than seven calendar days as determined by the SEC: (1) for any period during which the NYSE is closed (other than customary weekend or holiday closings) or trading on the NYSE is restricted; (2) for any period during which an emergency exists as a result of which disposal by the Funds of securities owned by them is not reasonably practicable or it is not reasonably practicable for the Funds to fairly determine the value of their net assets; or (3) for such other periods as the SEC may permit for the protection of shareholders. Your ability to redeem shares online or by telephone may be delayed or restricted after you change your address. You may change your address at any time by telephone or written request, addressed to the Transfer Agent. Confirmations of an address change will be sent to both your old and new address. Redemption proceeds will be sent to the address of

record. The Funds are not responsible for interest lost on redemption amounts due to lost or misdirected mail.

Please note, under unusual circumstances, the Funds may suspend redemptions, as permitted by federal securities law. The Funds may delay paying redemption proceeds for up to seven calendar days after receiving a request if an earlier payment could adversely affect the Funds.

Redemptions in Kind. The Funds generally pay redemption proceeds in cash. However, the Trust, on behalf of the Funds, has filed a notice of election under Rule 18f-1 under the 1940 Act, under which the Trust, on behalf of the Funds, has reserved the right for the Funds to redeem in-kind under certain circumstances, meaning that redemption proceeds are paid in liquid securities with a market value equal to the redemption price. These securities redeemed in kind remain subject to general market risks until sold. If the Funds pay your redemption proceeds by a distribution of securities, you could incur brokerage or other charges when converting the securities to cash. For federal income tax purposes, redemptions in kind are taxed in the same manner to a redeeming shareholder as redemptions paid in cash. In addition, sales of such in-kind securities may generate taxable gains.

Redemption in-kind proceeds are limited to securities that are traded on a public securities market or for which quoted bid prices are available. In the unlikely event that a Fund does redeem shares in kind, the procedures utilized by the Fund to determine the securities to be distributed to redeeming shareholders will generally be representative of a shareholder's interest in the Fund's portfolio securities. However, the Funds may also redeem in kind using individual securities as circumstances dictate. Redemptions in-kind are typically used to meet redemption requests that represent a large percentage of a Fund's net assets in order to minimize the effect of large redemptions on the Fund and its remaining shareholders. Redemptions in-kind may be used in circumstances as described above and during periods of stressed market conditions.

Signature Guarantees

The Transfer Agent may require a signature guarantee for certain redemption requests. Signature guarantees can be obtained from domestic banks, brokers, dealers, credit unions, national securities exchanges, registered securities associations, clearing agencies and savings associations, as well as from participants in the New York Stock Exchange Medallion Signature Program and the Securities Transfer Agents Medallion Program ("STAMP"), but not from a notary public. A signature guarantee, from either a Medallion program member or a non-Medallion program member, of each owner is required in the following situations:

- if ownership is being changed on your account;
- when redemption proceeds are payable or sent to any person, address or bank account not on record;
- when a redemption request is received by the Transfer Agent and the account address has changed within the last 15 calendar days.

Non-financial transactions, including establishing or modifying certain services on an account, may require a signature guarantee, a signature verification from a Signature Validation Program member, or other acceptable form of authentication from a financial institution source.

In addition to the situations described above, the Funds and/or the Transfer Agent reserve the right to require a signature guarantee or other acceptable signature verification in other instances based on the circumstances relative to the particular situation.

Redemption by Mail

You can execute most redemptions by furnishing an unconditional written request to the Funds to redeem your shares at the current NAV. Redemption requests in writing should be sent to the Transfer Agent at:

Regular Mail

CrossingBridge Funds
c/o U.S. Bank Global Fund Services
P.O. Box 701
Milwaukee, WI 53201-0701

Overnight or Express Mail

CrossingBridge Funds
c/o U.S. Bank Global Fund Services
615 East Michigan Street, 3rd Floor
Milwaukee, WI 53202

The Funds do not consider the U.S. Postal Service or other independent delivery services to be their agents. Therefore, deposit in the mail or with such services, or receipt at the Transfer Agent's post office box, of purchase orders or redemption requests does not constitute receipt by the Transfer Agent. Receipt of purchase orders or redemption requests is based on when the order is received at the Transfer Agent's offices.

Telephone Redemption

Telephone redemption privileges are automatically provided unless you specifically decline the option on your Account Application. You may redeem shares, in any amount, by instructing the Funds by telephone at 888-898-2780. A signature verification from a Signature Validation Program member or other acceptable form of authentication from a financial institution source may be required of all shareholders in order to add or change telephone redemption privileges on an existing account. Telephone redemptions will not be made if you have notified the Transfer Agent of a change of address within 15 calendar days before the redemption request. Once a telephone transaction has been placed, it may not be cancelled or modified after the close of regular trading on the NYSE (generally, 4:00 p.m., Eastern time). If an account has more than one owner or authorized person, the Funds will accept telephone instructions from any one owner or authorized person. All telephone calls will be recorded for your protection. Written confirmations will be provided for all purchase and redemption transactions initiated by telephone.

Wire Redemption

Wire transfers may be arranged to redeem shares. The Transfer Agent charges a fee, currently \$15, per wire redemption against your account on dollar specific trades, and from proceeds on complete redemptions and share-specific trades. There is no charge to have proceeds sent via ACH.

Systematic Withdrawal Program ("SWP")

The Funds offer a SWP whereby shareholders or their representatives may request a redemption in a specific dollar amount be sent to them each month, calendar quarter or year. Investors may choose to have a check sent to the address of record, or proceeds may be sent to a pre-designated bank account via the ACH network. To start the SWP, your account must have Fund shares with a value of at least \$10,000, and the minimum payment amount is \$100. The SWP may be terminated or modified by the Funds at any time. You may terminate your participation in the SWP at any time in writing or by telephoning the Transfer Agent no later than five days before the next scheduled withdrawal. A withdrawal under the SWP involves a redemption of Fund shares, and may result in a taxable capital gain or loss for federal income tax purposes. In addition, if the amount withdrawn exceeds the amounts credited to your account, the account ultimately may be depleted. To establish the SWP, complete the SWP section of the Account Application. Please call 888-898-2780 for additional information regarding the SWP.

The Funds' Right to Redeem an Account

The Funds reserve the right to redeem the shares of any shareholder whose account balance is less than \$2,500, other than as a result of a decline in the NAV of the Funds or for market reasons. The Funds will provide a shareholder with written notice 30 calendar days prior to redeeming the shareholder's account. A redemption by the Funds of a shareholder's account may result in a taxable capital gain or loss for federal income tax purposes.

Exchanging Shares

You may exchange all or a portion of your investment from one CrossingBridge Fund to an identically registered account in another CrossingBridge Fund within the same class. Any new account established through an exchange will be subject to the minimum investment requirements described above under "How to Purchase Shares," unless the account qualifies for a waiver of the initial investment requirement. Exchanges will be executed on the basis of the relative NAV of the shares exchanged. An exchange of Fund shares is considered to be a sale of shares for federal income tax purposes on which you may realize a taxable capital gain or loss. A \$5 fee will be applied to all exchanges of Fund shares requested by telephone.

Call the Funds (toll-free) at 888-898-2780 to learn more about exchanges.

Tools to Combat Frequent Transactions

The Funds are intended for long-term investors. Short-term "market-timers" who engage in frequent purchases and redemptions may disrupt a Fund's investment program and create additional transaction costs that are borne by all of the Funds' shareholders. The Board of Trustees has adopted policies and procedures that are designed to discourage excessive, short-term trading and other abusive trading practices that may disrupt portfolio management strategies and harm performance. The Funds take steps to reduce the frequency and effect of these activities in the Funds. These steps may include, among other things, monitoring trading activity and using fair value pricing, when the Adviser determines current market prices are not readily available. Although these efforts are designed to discourage abusive trading practices, these tools cannot eliminate the possibility that such activity will occur. The Funds seek to exercise their judgment in implementing these tools to the best of their abilities in a manner that they believe is consistent with shareholder interests. Except as noted herein, the Funds apply all restrictions uniformly in all applicable cases.

Monitoring Trading Practices. The Funds monitor selected trades in an effort to detect excessive short-term trading activities. If, as a result of this monitoring, the Funds believe that a shareholder has engaged in excessive short-term trading, they may, in their discretion, ask the shareholder to stop such activities or refuse to process purchases in the shareholder's accounts. In making such judgments, the Funds seek to act in a manner that they believe is consistent with the best interests of their shareholders. The Funds use a variety of techniques to monitor for and detect abusive trading practices. These techniques may change from time to time as determined by the Funds in their sole discretion. To minimize harm to the Funds and their shareholders, the Funds reserve the right to reject any purchase order (but not a redemption request), in whole or in part, for any reason (including, without limitation, purchases by persons whose trading activity in Fund shares is believed by the Adviser to be harmful to a Fund) and without prior notice. The Funds may decide to restrict purchase and sale activity in their shares based on various factors, including whether frequent purchase and sale activity will disrupt portfolio management strategies and adversely affect Fund performance.

Fair Value Pricing. The Funds employ fair value pricing selectively to ensure greater accuracy in their daily NAVs and to prevent dilution by frequent traders or market timers who seek to take advantage of temporary market anomalies. The Adviser has developed procedures which utilize fair value pricing when reliable market quotations are not readily available or the Funds' Pricing Service does not provide a valuation (or provides a valuation that, in the judgment of the Adviser, does not represent the security's fair value), or when, in the judgment of the Adviser, events have rendered the market value unreliable. Valuing securities at fair value involves reliance on judgment. Fair value determinations are made in good faith in accordance with procedures adopted by the Adviser. There can be no assurance that the Funds will obtain the fair value assigned to a security if they were to sell the security at approximately the time at which the Funds determine their NAV per share. More detailed information regarding fair value pricing and changes to the Funds' fair value pricing procedures can be found in this Prospectus under the heading entitled "Share Price."

Due to the complexity and subjectivity involved in identifying abusive trading activity and the volume of shareholder transactions the Funds handle, there can be no assurance that the Funds' efforts will identify all trades or trading practices that may be considered abusive. In particular, since the Funds receive purchase and sale orders through Authorized Intermediaries that use group or omnibus accounts, the Funds cannot always detect frequent trading. However, the Funds will work with Authorized Intermediaries as necessary to discourage shareholders from engaging in abusive trading practices and to impose restrictions on excessive trades. In this regard, the Funds have entered into information sharing agreements with Authorized Intermediaries pursuant to which these intermediaries are required to provide to the Funds, at the Funds' request, certain information relating to their customers investing in the Funds through non-disclosed or omnibus accounts. The Funds will use this information to attempt to identify abusive trading practices. Authorized Intermediaries are contractually required to follow any instructions from the Funds to restrict or prohibit future purchases from shareholders that are found to have engaged in abusive trading in violation of the Funds' policies. However, the Funds cannot guarantee the accuracy of the information provided to them from Authorized Intermediaries and cannot ensure that they will always be able to detect abusive trading practices that occur through non-disclosed and omnibus accounts. As a result, the Funds' ability to monitor and discourage abusive trading practices in non-disclosed and omnibus accounts may be limited.

Other Fund Policies

Telephone Transactions. If you have not declined telephone privileges on the Account Application or in a letter to the Funds, you may be responsible for any fraudulent telephone orders as long as the Funds have taken reasonable precautions to verify your identity. In addition, once you place a telephone transaction request, it cannot be canceled or modified after the close of regular trading on the NYSE (generally 4:00 p.m., Eastern time).

During periods of significant economic or market change, telephone transactions may be difficult to complete. If you are unable to contact the Funds by telephone, you may also mail the requests to the Funds at the address listed previously in the section entitled "How to Purchase Shares," above. Neither the Funds nor the Transfer Agent are liable for any loss incurred due to failure to complete a telephone transaction prior to the close of the NYSE (generally 4:00 p.m., Eastern time).

Telephone trades must be received by or prior to the close of the NYSE (generally 4:00 p.m., Eastern time). During periods of high market activity, shareholders may encounter higher than usual call waiting times. Please allow sufficient time to ensure that you will be able to complete your telephone transaction

prior to the close of the NYSE. The Funds are not responsible for delays due to communication or transmission outages subject to applicable law.

Neither the Funds nor any of their service providers will be liable for any loss or expense in acting upon instructions that are reasonably believed to be genuine subject to applicable law. If an account has more than one owner or authorized person, the Funds will accept telephone instructions from any one owner or authorized person. To confirm that all telephone instructions are genuine, the Funds will use reasonable procedures, such as requesting that you correctly state:

- that you correctly state your Fund account number;
- the name in which your account is registered; or
- the Social Security or taxpayer identification number under which the account is registered.

Policies of Authorized Intermediaries. Your Authorized Intermediary may establish policies that differ from those of the Funds. For example, the institution may charge transaction fees, set higher minimum investments or impose certain limitations on buying or selling shares in addition to those identified in this Prospectus. Please contact your Authorized Intermediary for details.

Closure of a Fund. The Adviser retains the right to close a Fund (or partially close a Fund) or to place restrictions on purchases of Fund shares if it is determined to be in the best interest of shareholders. Based on market and Fund conditions, the Adviser may decide to close a Fund to new investors, all investors or certain classes of investors (such as fund supermarkets) at any time. If a Fund is closed to new purchases it will continue to honor redemption requests, unless the right to redeem shares has been temporarily suspended as permitted by federal law.

Householding. In an effort to decrease costs, the Funds intend to reduce the number of duplicate prospectuses, supplements and certain other shareholder documents you receive by sending only one copy of each to those addresses shared by two or more accounts and to shareholders the Funds reasonably believe are from the same family or household. If you would like to discontinue householding for your accounts, please call toll-free at 888-898-2780 to request individual copies of these documents, or if your shares are held through an Authorized Intermediary, please contact them. Once the Funds receive notice to stop householding, the Funds will begin sending individual copies within 30 days after receiving your request. This policy does not apply to account statements.

Lost Shareholders, Inactive Accounts and Unclaimed Property. It is important that the Funds maintain a correct address for each shareholder. An incorrect address may cause a shareholder's account statements and other mailings to be returned to the Funds. Based upon statutory requirements for returned mail, the Funds will attempt to locate the shareholder or rightful owner of the account. If the Funds are unable to locate the shareholder, then it will determine whether the shareholder's account can legally be considered abandoned. Your mutual fund account may be transferred to the state government of your state of residence if no activity occurs within your account during the "inactivity period" specified in your state's abandoned property laws. The Funds are legally obligated to escheat (or transfer) abandoned property to the appropriate state's unclaimed property administrator in accordance with statutory requirements. The shareholder's last known address of record determines which state has jurisdiction. Please proactively contact the Transfer Agent toll-free at 888-898-2780 at least annually to ensure your account remains in active status.

If you are a resident of the state of Texas, you may designate a representative to receive notifications that, due to inactivity, your mutual fund account assets may be delivered to the Texas Comptroller. Please contact the Transfer Agent if you wish to complete a Texas Designation of Representative form.

IRA Accounts. IRA accounts will be charged a \$15 annual maintenance fee.

Distribution of Fund Shares

The Distributor

The Trust has entered into a Distribution Agreement (the “Distribution Agreement”) with Quasar Distributors, LLC (the “Distributor”) located at Three Canal Plaza, Suite 100, Portland, Maine 04104, pursuant to which the Distributor acts as the Funds’ principal underwriter, provides certain administration services and promotes and arranges for the sale of the Funds’ shares. The offering of the Funds’ shares is continuous, and the Distributor distributes the Funds’ shares on a best efforts basis. The Distributor is not obligated to sell any certain number of shares of a Fund. The Distributor is a registered broker-dealer and member of the Financial Industry Regulatory Authority, Inc.

Payments to Financial Intermediaries

The Funds may pay fees to intermediaries, such as banks, broker-dealers, financial advisors or other financial institutions, including affiliates of the Adviser, for recordkeeping, sub-administration, sub-accounting, sub-transfer agency and other shareholder services (collectively, “sub-TA services”) associated with shareholders whose shares are held of record in omnibus and networked accounts, retirement plans, other group accounts or accounts traded through registered securities clearing agents in lieu of the transfer agent providing such services.

The Adviser, out of its own resources and legitimate profits and without additional cost to the Funds or their shareholders, may provide additional cash payments to certain intermediaries. These payments, sometimes referred to as revenue sharing, are in addition to Rule 12b-1 fees, shareholder servicing plan fees and sub-TA fees paid by the Funds, if any. Revenue sharing payments may be made to intermediaries for sub-TA services or distribution-related services, such as marketing support; access to third party platforms; access to sales meetings, sales representatives and management representatives of the intermediary; and inclusion of the Funds on a sales list, including a preferred or select sales list, and in other sales programs. The Adviser may also pay cash compensation in the form of finder’s fees that vary depending on the dollar amount of the shares sold. From time to time, and in accordance with applicable rules and regulations, the Adviser may also provide non-cash compensation to representatives of various intermediaries who sell Fund shares or provide services to Fund shareholders.

Distributions and Taxes

Distributions

The Funds will make distributions of net investment income, if any, at least monthly. The Funds will make distributions of net capital gain, if any, at least annually, typically during the month of December. The Funds may make additional distributions if deemed to be desirable at another time during the year.

All distributions will be reinvested in additional Fund shares unless you choose one of the following options: (1) receive distributions of net capital gain in cash, while reinvesting net investment income distributions in additional Fund shares; (2) receive all distributions in cash; or (3) reinvest net capital gain distributions in additional Fund shares, while receiving distributions of net investment income in cash.

If you wish to change your distribution option, write to or call the Transfer Agent in advance of the payment date of the distribution. However, any such change will be effective only as to distributions for which the record date is five or more calendar days after the Transfer Agent has received the request.

If you elect to receive distributions in cash and the U.S. Postal Service is unable to deliver your check, or if a check remains uncashed for six months, the Funds reserve the right to reinvest the distribution check in your account at the Funds' then-current NAV per share and to reinvest all subsequent distributions.

Federal Income Tax Consequences

Changes in income tax laws, potentially with retroactive effect, could impact the Funds' investments or the tax consequences to you of investing in the Funds. Some of the changes could affect the timing, amount and tax treatment of the Funds' distributions made to shareholders. Please consult your tax advisor before investing.

Distributions of the Funds' investment company taxable income (which includes, but is not limited to, interest, dividends, net short-term capital gain and net gain from foreign currency transactions), if any, are generally taxable to the Funds' shareholders as ordinary income. For a non-corporate shareholder, to the extent that the Funds' distributions of investment company taxable income are attributable to and reported as "qualified dividend" income, such income may be subject to tax at the reduced federal income tax rates applicable to net long-term capital gain, if certain holding period requirements have been satisfied by the shareholder. For a corporate shareholder, a portion of the Funds' distributions of investment company taxable income may qualify for the intercorporate dividends-received deduction to the extent the Funds receive dividends directly or indirectly from U.S. corporations, report the amount distributed as eligible for the deduction and the corporate shareholder meets certain holding period requirements with respect to its shares. Due to the Funds' investment objectives, which generally involve investing in fixed income securities, it is possible that there will be no or limited income that qualifies for these "qualified dividend" income or dividends-received rules. To the extent that the Funds' distributions of investment company taxable income are attributable to net short-term capital gain, such distributions will be treated as ordinary income and cannot generally be offset by a shareholder's capital losses from other investments.

Distributions of the Funds' net capital gain (net long-term capital gain less net short-term capital loss) are generally taxable to such Fund's shareholders as long-term capital gain regardless of the length of time that a shareholder has owned Fund shares. Distributions of net capital gain are not eligible for qualified dividend income treatment or the dividends-received deduction referred to above.

You will be taxed in the same manner whether you receive your distributions (of investment company taxable income or net capital gain) in cash or reinvest them in additional Fund shares. Distributions are generally taxable when received. However, distributions declared in October, November or December to shareholders of record and paid the following January are taxable as if received on December 31.

In addition to the federal income tax, certain individuals, trusts and estates may be subject to a net investment income ("NII") tax of 3.8%. The NII tax is imposed on the lesser of: (i) a taxpayer's investment income, net of deductions properly allocable to such income, or (ii) the amount by which such taxpayer's modified adjusted gross income exceeds certain thresholds (\$250,000 for married individuals

filing jointly, \$200,000 for unmarried individuals, and \$125,000 for married individuals filing separately). The Funds' distributions are includable in a shareholder's investment income for purposes of this NII tax. In addition, any capital gain realized by a shareholder upon a sale, exchange or redemption of Fund shares is includable in such shareholder's investment income for purposes of this NII tax.

Shareholders who sell, exchange or redeem shares generally will have a capital gain or loss from the sale, exchange or redemption. The amount of the gain or loss and the applicable rate of federal income tax will depend generally upon the amount paid for the shares, the amount received from the sale, exchange or redemption (including redemptions in-kind) and how long the shares were held by a shareholder. Gain or loss realized upon a sale, exchange or redemption of Fund shares will generally be treated as a long-term capital gain or loss if the shares have been held for more than one year and, if held for one year or less, as a short-term capital gain or loss. Any loss arising from the sale, exchange or redemption of shares held for six months or less, however, is treated as a long-term capital loss to the extent of any distributions of net capital gain received or deemed to be received with respect to such shares. In determining the holding period of such shares for this purpose, any period during which your risk of loss is offset by means of options, short sales or similar transactions is not counted. If you purchase a Fund's shares (through reinvestment of distributions or otherwise) within 30 days before or after selling, exchanging or redeeming the same Fund's shares at a loss, all or part of that loss will not be deductible and will instead increase the basis of the new shares.

The Funds are required to report to certain shareholders and the IRS the cost basis of Fund shares acquired on or after January 1, 2012 when such shareholders subsequently sell, exchange or redeem those shares. The Funds will determine cost basis of such shares using the average cost method unless you elect in writing (and not over the telephone) any alternate IRS-approved cost basis method. Please see the SAI for more information regarding cost basis reporting.

The federal income tax status of all distributions made by a Fund for the preceding year will be annually reported to shareholders. Distributions made by a Fund may also be subject to state and local taxes. Additional tax information may be found in the SAI.

This section is not intended to be a full discussion of federal income tax laws and the effect of such laws on you. There may be other federal, state, foreign or local tax considerations applicable to a particular investor. You are urged to consult your own tax adviser.

Financial Highlights

The financial highlights tables are intended to help you understand a Fund's financial performance for the periods indicated. The following financial highlights tables show the Low Duration High Income Fund's financial performance information for the Fund's Institutional Class shares for the fiscal years ended September 30, 2020, 2021, 2022, 2023 and 2024, the Strategic Income Fund for the fiscal years ended September 30, 2020, 2021, 2022, 2023, 2024, and the Responsible Credit Fund and Ultra-Short Duration Fund's financial performance from June 30, 2021 (commencement of operations) to the fiscal period ended September 30, 2021 and the fiscal years ended September 30, 2022, 2023, and 2024.

As of September 30, 2024, the Low Duration High Income Fund's Retail Class shares had not commenced operations; accordingly, there are no financial highlights available for Retail Class shares as of the date of this Prospectus.

As of September 30, 2024, the Nordic High Income Bond Fund had not commenced investment operations; accordingly, there are no financial highlights available for the Fund as of the date of this Prospectus.

The Financial Highlights information presented for the Strategic Income Fund is the financial history of the Predecessor Fund for periods prior to the Reorganization. Prior to the Reorganization, the Fund was a "shell" fund with no assets and had not commenced operations.

Certain information reflects financial results for a single share of a Fund. The total returns in the tables represent the rate that you would have earned or lost on an investment in a Fund (assuming you reinvested all distributions). This information has been audited by Cohen & Company, Ltd., the independent registered public accounting firm of the Funds and the Predecessor Fund, whose report, along with the Funds' financial statements, are included in the Funds' 2024 [Annual Report to Shareholders](#) on Form N-CSR, which is available upon request.

CROSSINGBRIDGE LOW DURATION HIGH INCOME FUND

(4) This ratio includes dividend expense and interest expense. If these expenses were excluded, this ratio would have been 1.16%.

(5) This ratio includes dividend expense and interest expense. If these expenses were excluded, this ratio would have been 1.19%.

(6) This ratio includes dividend expense and interest expense. If these expenses were excluded, this ratio would have been 1.11%.

(7) This ratio includes dividend expense and interest expense. If these expenses were excluded, this ratio would have been 1.07%.

(8) This ratio includes dividend expense and interest expense. If these expenses were excluded, this ratio would have been 1.08%.

(9) Short-term securities with maturities less than or equal to 365 days are excluded from the portfolio turnover calculation.

PRIVACY NOTICE

The Funds collect non-public personal information about you from the following sources:

- information the Funds receive about you on applications or other forms;
- information you give the Funds orally; and/or
- information about your transactions with the Funds or others.

The types of non-public personal information we collect and share can include:

- social security numbers;
- account balances;
- account transactions;
- transaction history;
- wire transfer instructions; and
- checking account information.

What Information We Disclose

The Funds do not disclose any non-public personal information about their shareholders or former shareholders without the shareholder's authorization, except as permitted by law or in response to inquiries from governmental authorities. The Funds may share information with affiliated parties and unaffiliated third parties with whom they have contracts for servicing the Funds. The Funds will provide unaffiliated third parties with only the information necessary to carry out their assigned responsibility.

How We Protect Your Information

All shareholder records will be disposed of in accordance with applicable law. The Funds maintain physical, electronic and procedural safeguards to protect your non-public personal information and require third parties to treat your non-public personal information with the same high degree of confidentiality.

In the event that you hold shares of the Funds through a financial intermediary, including, but not limited to, a broker-dealer, bank or trust company, the privacy policy of your financial intermediary governs how your non-public personal information is shared with unaffiliated third parties.

FOR MORE INFORMATION

You can find additional information about the Funds in the following documents:

Statement of Additional Information

The Funds' SAI provides additional details about the investments and techniques of the Funds and certain other additional information. A current SAI dated January 28, 2025 is on file with the SEC and is incorporated into this Prospectus by reference. This means that the Funds' SAI is legally considered a part of this Prospectus even though it is not physically within this Prospectus.

Annual and Semi-Annual Reports

Additional information about the Funds' investments is available in the Funds' annual and semi-annual reports to shareholders and in Form N-CSR, with the exception of the Nordic High Income Bond Fund, which had not commenced investment operations as of September 30, 2024. The Funds' annual report contains a discussion of the market conditions and investment strategies that significantly affected the Funds' performance during the Funds' last fiscal year. In Form N-CSR, you will find the Funds' annual and semi-annual financial statements. Such information will be available for the Nordic High Income Bond Fund for the Funds' next completed fiscal period.

You can obtain a free copy of these documents, request other information, such as the Funds' financial statements, or make general inquiries about the Funds by calling the Funds (toll-free) at 888-898-2780, by visiting the Funds' website at www.crossingbridgefunds.com or by writing to:
